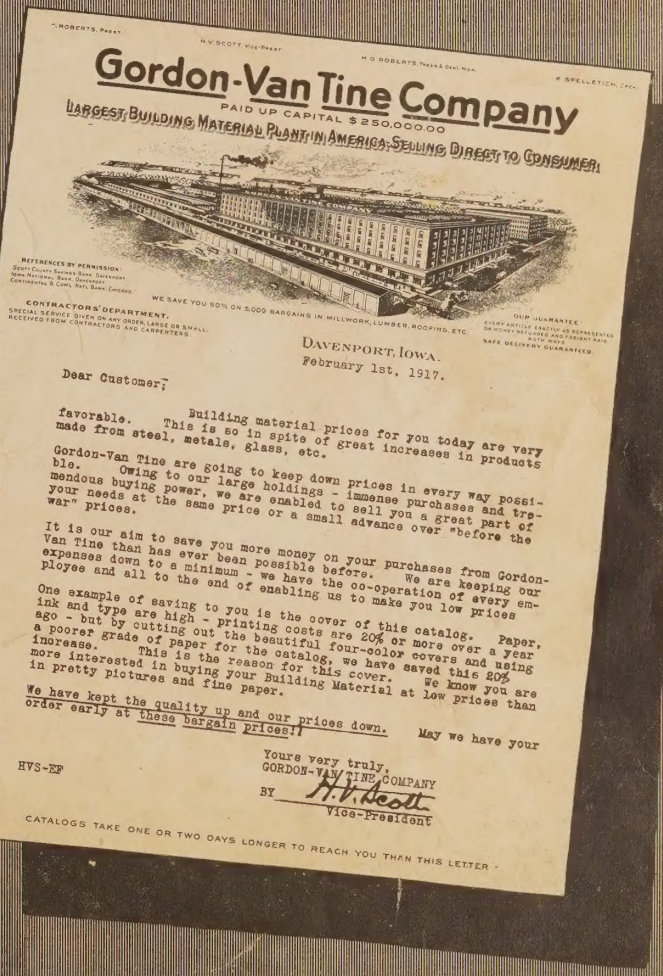
**Gordon-Van Tine Co.**
Davenport, Iowa.



Gordon-Van Tine Company
PAID UP CAPITAL $250,000.00
LARGEST BUILDING MATERIAL PLANT IN AMERICA SELLING DIRECT TO CONSUMER

WE SAVE YOU 50% ON 5,000 BARGAINS IN MILLWORK, LUMBER, ROOFING, ETC.

DAVENPORT, IOWA.
February 1st, 1917.

Dear Customer;

Building material prices for you today are very favorable. This is so in spite of great increases in products made from steel, metals, glass, etc.

Gordon-Van Tine are going to keep down prices in every way possible. Owing to our large holdings - immense purchases and tremendous buying power, we are enabled to sell you a great part of your needs at the same price or a small advance over "before the war" prices.

It is our aim to save you more money on your purchases from Gordon-Van Tine than has ever been possible before. We are keeping our expenses down to a minimum - we have the co-operation of every employee and all to the end of enabling us to make you low prices

One example of saving to you is the cover of this catalog. Paper, ink and type are high - printing costs are 20% or more over a year ago - but by cutting out the beautiful four-color covers and using a poorer grade of paper for the catalog, we have saved this 20% increase. This is the reason for this cover. We know you are more interested in buying your Building Material at low prices than in pretty pictures and fine paper.

We have kept the quality up and our prices down. May we have your order early at these bargain prices!!

Yours very truly,
GORDON-VAN TINE COMPANY
BY H. V. Scott
Vice-President

THE IOWA NATIONAL BANK

DAVENPORT, IOWA March 18, 1911

To Whom It May Concern:

Referring to the general standing of the GORDON VAN TINE COMPANY OF DAVENPORT, IOWA, we are pleased to say that we hold a very high opinion of the men composing its management, and consider them some of the best and strongest business men of this City. With the absolute reliability, honesty, and integrity of these men and the strong financial condition of their Company, we do not hesitate to recommend them to the public, and consider them entitled to every confidence.

To their patrons we are pleased to say that you are perfectly safe in sending them your money with your orders, as the Company rightfully enjoys a reputation of reliability and will return your money if their goods are not entirely satisfactory to you.

Very truly yours,

Vice Pre

DAVENPORT SAVINGS BANK

Davenport, Iowa

June 28, 1911.

TO WHOM IT MAY CONCERN:

We take pleasure in testifying to the honesty, reliability, and high business standing of the Gordon-Van Tine Company. We have known the officers of the Company for many years, and they enjoy a reputation in this community as men of upright business methods. They can be depended upon to treat all persons with fairness, and no one need hesitate to send money with orders for goods, as the same will be perfectly safe, and will be returned in case the goods are not entirely satisfactory.

The officers of the Gordon-Van Tine Company have a well deserved reputation for fair dealing and conservatism, and from our acquaintance with them, we believe that absolute reliance may be placed in their statements.

Very truly yours,

Cashier.

Scott County Savings Bank

Davenport, Iowa.

# A Chat With Our Customers

## Our Service to the Home-Builders of America

THE list of Gordon-Van Tine customers has grown to vast proportions and we like to think of you, one and all, as a great family, bound together by a common interest—the love of home. We have been doing business together for a good many years.

Thousands of you are today living in homes that you have built, from foundation to rooftree, out of the materials we have supplied.

Our relations have been mutually beneficial. All of you have saved money by dealing direct with us.

The present issue of our catalog offers greater savings to the home builder than ever before. Our enormously enlarged scale of operations has reduced the cost of production and handling very materially. On some items we can save you 20 per cent more than in our previous quotations.

Dealing as we do direct with the actual user of millwork, lumber and other building material, we entirely do away with all the middlemen's profits. We advertise widely in order to acquaint as many people as possible with the fact that here in Davenport is a supply depot for Home-Builders that gives wholesale prices to all.

Now we have a favor to ask of our great family of customers. It is this:

We ask every customer who has ever had dealings with us to send us the names and addresses of reliable people whom you know are going to build.

In complying with this request, you will not only be doing a favor to the Gordon-Van Tine Company, but to those whose names you send.

Pass the good word along!

## The World's Best Building Material

This catalog is in itself an immense exhibit of the finest Building Material produced in America.

It offers to the Home-Builder an almost unlimited variety of the latest styles in Building Materials of every description—Doors, Windows, Moulding, Inside and Outside Finish, Lumber, Builder's Hardware, Mantels, Grates, etc.

The prices are so far below market value that a man can build a much larger and finer house from our Building Material than would be possible if he paid the local dealer's inflated prices.

Or one can save enough money on the cost of a house to furnish it handsomely.

### OVER 5,000 BARGAINS

In this catalog you will find over 5,000 Bargains in Building Material, offered at prices much lower than are offered anywhere in America for goods of equal quality, and ofttimes 50 per cent lower than your dealer asks.

You will find a variety to select from infinitely greater than any retail dealer can possibly carry in stock.

You will find a Guarantee of Quality, Safe Delivery and Satisfaction as strong as the English language can make it—backed by our immense capital and resources.

You will find (see inside front cover) a letter from three of the largest banks in Davenport, telling of our responsibility and fair dealing.

You will find letters from customers all over the country proving that it pays to buy from us.

You will find photographs of complete houses built entirely of material purchased from us.

We are headquarters for everything needed for building or repairing any building, large or small—houses, barns, stores, churches, factories, etc.

Our business has been steadily growing for years, and our satisfied customers are to be found in every state and county in the Union.

Today we do an annual business of over a million dollars.

We employ an army of men—pay good wages for honest work—and give the consumer a liberal share of the saving due to our economical system of handling our goods.

We are independent of the retail lumber dealers, and the branch yards of the Lumber Trust, because our entire output is sold through catalogs, direct to the consumer.

We have no salesmen. This catalog tells the whole story as well or better than any salesman could tell it.

### WE UNDERSELL RETAIL DEALERS

This catalog, with its practically unlimited offerings of sash, doors, millwork and building material at an average reduction of about 50 per cent from retail dealers' prices, solves the biggest problem that confronts the builder today.

It is an actual fact that during the last ten years the retail prices of lumber and millwork have advanced many times.

There is some excuse for this advance in the increasing scarcity of timber. The cut of White Pine has fallen off more than 40 per cent within the past ten years, and the cut of Oak has fallen off more than 36 per cent during that period.

But the main reason for the advance in prices is that the Lumber Trust has been tightening its grip on the forests and at the same time arbitrarily boosting prices through all its vast network of retail lumber yards extending from one end of the country to the other.

### EXPLANATION OF OUR LOW PRICES

Our prices are so extraordinarily low that the public is naturally interested in knowing how we are able to sell building material of highest guaranteed quality at such tremendous reductions.

The explanation is simple. Read carefully these four reasons.

### RAW MATERIAL

(1) The owners of Gordon-Van Tine Co., anticipating high prices and increasing demand for lumber, purchased some years ago large tracts of timber lands, before the big advance, so as to guarantee their source of supply, which we are holding in reserve so as to be independent of the Lumber Trust.

### IMMENSE FACILITIES

(2) We own the largest direct-to-consumer Building Material Plant in the United States. We have every modern facility to aid the economical handling of our goods.

### ECONOMY IN MANUFACTURING

(3) In handling immense quantities of each article shown in our catalog, these goods are manufactured at a much lower cost than small plants can produce. This results in a big saving of time and labor—of extra handling—readjusting machinery, etc.—and thus enables you to buy these goods direct from us cheaper than most manufacturers can make them for.

### ECONOMY IN DISTRIBUTION

(4) Our method of dealing direct with the consumer instead of maintaining branch agencies or selling through retail lumber and building supply dealers means another great saving to you.

### CARLOAD SHIPMENTS

**Advantages of Co-operative Buying in Car Lots.**

Our prices are the same, whether an order is for $5 worth or $10,000 worth of goods, but we call the attention of our customers to the advantage of buying in car lots, which entitles you to the lower carload freight rate. Big contractors are not the only ones who can get the benefit of this saving. In many communities, we have dozens of customers, and by bunching their orders to us, we can fill a car, and secure them the lowest carload rate. Co-operation is the watchword of the business world today. Millions of dollars are saved to consumers annually by the adoption of this modern method. Your neighbors and friends will be glad to join in making up a carload order, when you call their attention to this simple plan of securing a still lower freight rate.

# Quality-Service-Price

## Guaranteed Building Material at About 50% Saving

**WE desire to state, with all the emphasis at our command, that Gordon-Van Tine quality is the highest.**

**Our goods are all manufactured according to the official grades prescribed by the Sash and Door Manufacturers' Association of the Northwest.**

**For full information about trade customs and usages see last page of this catalog.**

**In describing the various articles for sale in this catalog, we have confined ourselves to the plain, unvarnished truth, and have in no way exaggerated the facts regarding our goods and prices.**

**Thousands of our customers have written us that our goods were of much better quality than they had anticipated.**

**The Gordon-Van Tine Service meets, promptly and efficiently, every requirement of the Home-Builder from the time when he first begins to plan for a house until it is completed, ready for occupancy. Nowhere else in America is such complete service available to the builder.**

### OUR PLAN DEPARTMENT

Our Plan Department is in charge of expert practical architects of long and successful experience in designing attractive, convenient, economical and practical homes.

Our Free Plan Books are the accepted authority on architecture. They represent a cost of over $15,000 and contain 300 designs —accurately drawn by our skilled architects. Over 300 plans shown in the book for residences include city, country, suburban and farm homes costing from $370 to $6,000. Each of these plans is practical, having been proved by actual construction, which saves you the expense and worry of costly mistakes.

The services of our Plan Department are free to those who use our Building Material. (See pages 6 and 7 following for full and detailed description of Gordon-Van Tine Ready-Cut Homes—material cut to fit. Also Gordon-Van Tine's Standard Homes—material furnished in the standard way.)

### LET US FIGURE ON YOUR MATERIAL

Our Estimating Department gives its services without charge to those who intend to build. Simply send your contractor's List of Materials needed and our Estimators will cheerfully and promptly quote exact "Guaranteed Right Figures" on the cost with freight prepaid to your station. Don't place your order elsewhere for a large or small bill of material without comparing our grades and prices. We can save you money on any order and satisfy you fully in regard to quality.

### MILLWORK TO SPECIAL ORDER

**Orders for Odd Sizes and Special Designs Executed Promptly and Correctly, at Reasonable Prices.**

With our modern equipment, our expert draughtsmen and skilled workmen, and our large stock of the finest air-seasoned and kiln-dried lumber, we are in a position to turn out special orders promptly and satisfactorily.

Estimates on this class of work will be cheerfully furnished on receipt of the list of material, giving exact size, dimensions and sketches where necessary. We find it impossible to figure the hundreds of plans sent us and would consider it a favor if you would send us an itemized bill of material. We always advise the use of stock sizes where possible, as a matter of economy to our customers. But in the case of public buildings, especially, the architects' plans are not subject to change. Many residences are planned to please an owner who is not particular about extra expense for special odd-sized millwork.

## OUR TERMS

**1—Cash in full with the order.** You need not hesitate about sending us the full purchase price because, if we do not satisfy you in quality, service and saving, you get your money back without question, together with any freight charges you paid, provided the material is returned.

**2—Special C. O. D. Terms.** While we do not recommend C. O. D. shipments, we will accept orders amounting to $50 or over for C. O. D. shipments when accompanied by the part payments shown below:

**Send $15 with orders of $50 to $75.**
**Send $20 with orders of over $75 to $100.**
**Send $30 with orders of over $100 to $150.**
**Send $35 with orders of over $150 to $200.**
**Send $50 with orders of over $200 to $300.**
**Send 20% with orders of over $300; that is to say, one-fifth of the total amount of the order.**

**3—No cash with order.** If you want to examine the materials before paying any money you can deposit the full purchase price in your local bank, and then send us the certificate of deposit stating that the money will be paid to Gordon-Van Tine Co. after you have examined the material and find it to be satisfactory. Upon receipt of the certificate of deposit we will ship the material to you, and if you believe it to be good value for the price you can instruct your bank to forward the money to us, otherwise you do not have to pay for it.

**4—Pay for the material as the building goes up.** If you are building by an arrangement with a bank or building and loan association, we will ship the material to you upon receipt of an assurance from the bank or the building and loan association that payments for the material will be made at certain periods as the work progresses.

### SPLENDID SHIPPING FACILITIES

We have unexcelled facilities for prompt shipment at lowest possible freight rates, having the advantage of four trunk lines, with side tracks running directly into our warehouse. No teaming of goods to depots, causing expense and delay. Our loading platforms accommodate twenty-five cars at a time and we can load from both sides of each car.

### OUR TRAFFIC DEPARTMENT

We maintain our own Traffic Bureau of experts familiar with every detail of railroad freight and steamship business. This bureau attends to the routing of all shipments over the most direct lines, the tracing of goods in transit, and answers all correspondence with our customers relating to transportation rates, routes, etc.

### LOW FREIGHT FROM DAVENPORT TO ALL POINTS

All prices quoted in this catalog are at Davenport. The freight is exactly the same whether you pay it or we pay it. We can make you a price delivered at your station, if you desire it. We ship your goods under the classification that entitles you to the lowest rate. Davenport is almost the geographical center of the United States and freight rates to all parts of the United States and Canada are low. On page 10 you will find the Freight Classification of different kinds of building material and also the rate per 100 pounds from Davenport to your town or a town so near that the rate is practically the same. You pay exactly the same rate your local dealer pays.

We ship everywhere.

### CARE IN PACKING FOR SHIPMENT

As we assume all liability for the safe delivery of our goods, it goes without saying that we pack all material with extra care.

Plain doors are securely wrapped in extra thick Parchment Packing Paper and then crated. Glazed doors are boxed in addition to being wrapped in Parchment Packing Paper. Windows are boxed with extra thick lumber. The same care is exercised in packing every item to insure same reaching destination in the same bright, clean condition in which they leave the factory.

# Satisfaction Or Your Money Back

## The Gordon Van Tine Guarantee Gives Absolute Protection

**WE HAVE a paid up capital stock of $250,000.00 and our commercial and financial standing is of the highest. We refer by permission to the Continental and Commercial National Bank of Chicago, and the following banks in Davenport, Iowa, our home city: Scott County Savings Bank, Iowa National Bank, Union Savings Bank, First National Bank and Citizen's Trust and Savings Bank. In writing to these banks, be sure to enclose a 2-cent stamp for reply. See our capital and credit rating in R. G. Dun & Company and Bradstreet's Commercial Agency.**

**We have customers in practically every locality in the United States and on request will be pleased to refer to some individual in your own section or neighborhood who has done business with us.**

## Our Money Back Guarantee

### MONEY REFUNDED and FREIGHT PAID BOTH WAYS IF GOODS ARE NOT AS REPRESENTED.

The very life-blood of our business is the confidence and good will of our thousands of customers. The steady and unprecedented growth in our volume of business comes from the continued patronage of the people with whom we deal.

We reserve the right to return any order together with the remittance that we cannot fill or that we believe is not sent us in good faith.

When we accept an order, we assume full responsibility for filling same in a proper manner, and agree to refund the purchase price and pay the freight both ways if goods are not exactly as represented and in first-class condition.

All railroad claims must be filed within two weeks after goods are received. A recent ruling of the Interstate Commerce Commission compels us to file our claims promptly.

### WE GUARANTEE SAFE DELIVERY

We pack goods carefully and guarantee safe delivery anywhere. If goods reach your station in damaged condition—if glass is broken or anything is wrong, all you need to do is to send us the paid Freight Receipt with agent's notation stating condition of goods on arrival at destination.

We must have this statement of your agent in making claim against the railroad company for damages. In the case of broken glass, we allow you to purchase glass to replace it from your local dealer, sending us receipted bill, together with the Freight Receipt with the agent's notation of damage, and we will promptly refund the cost of the glass.

### OUR WORLD-WIDE EXPORT BUSINESS

We have built up an extensive export trade, having made shipments to almost all foreign countries, including South America, Cuba, Europe, Asia, Africa, Australia and the Pacific Islands. We are doing a rapidly increasing business with the Philippines, Hawaii and other island possessions of the United States.

We have full arrangements with the railroad companies to make through manifests for foreign shipments. We have export Agents in Mobile, Ala., Newport News, Va., Boston, Philadelphia and New Orleans. Goods are loaded in through cars to export points.

Please include with order enough money to prepay freight to the seaboard. It is necessary to prepay these charges and unless remitted, will delay order. Great care will be taken by us to secure the lowest rate possible for our customers, and we will promptly refund any amount paid us in excess of freight charges to the seaboard.

Our export Department is well organized, fully equipped, and thoroughly conversant with all regulations regarding the packing of export orders. We guarantee safe delivery of all our foreign shipments to seaboard.

Owing to the heavy cost of special packing on ocean shipments it is necessary for us to charge 10% extra on all shipments for foreign countries going via steamships, for extra cost of packing.

Correspondence in any language will receive prompt attention.

### LUMBER AT MILL PRICES

We want to figure with every man in the country who needs lumber.

In our main Storage Yards in St. Louis, Mo., we carry continuously many millions of feet of lumber in stock, ready for immediate shipment. St. Louis has 20 lines of railroad, giving us direct rail connection to any point in the United States.

### SAVE $100 TO $300 ON A CARLOAD

On Timbers and Rough Lumber the saving per carload averages $100. On mixed cars of Dressed and Rough Lumber the saving is about $250. On Finishing Lumber, such as Siding, Ceiling, Moulded Casing and Base, Flooring, etc., the saving runs as high as $300. You can usually figure on a saving of from 25 per cent to 50 per cent on any kind of lumber from the mills of Gordon-Van Tine Co.

### GUARANTEED GRADES

No better lumber ever came out of the Saw Mill than the vast stock of Dimension, Sheathing, Barn Boards, Flooring, Siding, Ceiling, Ship Lap, Fencing, Heavy Joists, Timbers, etc., etc., we are shipping to users everywhere at Saw Mill Prices. It is all bright, new, clean, thoroughly seasoned, well manufactured lumber. It is all worked to standard size. It is all graded in strict accordance with the official rules of the Lumbermen's Associations. It is all good lumber, that you will be proud to put into a building, and every piece is guaranteed to be exactly as represented. All our grades run much better than the average "yard" grades.

Our prices, grade for grade, are the lowest in the country. But in fairness to yourself and in justice to us make the other fellow specify his grade when he quotes you prices in competition with the Gordon-Van Tine Co.

The Gordon-Van Tine Lumber Book and Combination Order Blank and Price List will be sent free on application.

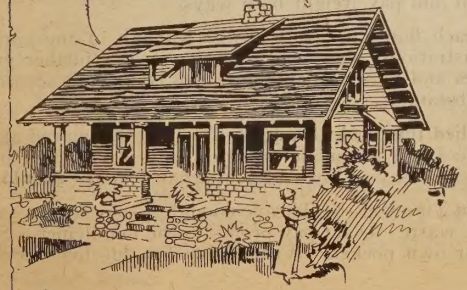
### NOTICE

**It is impossible for us to figure lists of millwork direct from plans and would request that you forward us a list which your carpenter has taken off and wherever possible use our designs and sizes, as it will mean a considerable saving to you.**

**Come to Davenport At Our Expense**

**SEE for Yourself**

**A Day's Time Will Save You Many Dollars**



## COME TO DAVENPORT

Come and see for yourself. Come at our expense.

If you will come to Davenport and visit us and buy a carload of Lumber and Millwork or a house bill, we will pay railroad fare both ways and do our best to entertain you while here.

Remember that we give you the advantage of our very lowest prices, and make this offer to CONVINCE YOU of the HIGH QUALITY of our material through personal inspection.

The trip will be worth your while.

# Send for Free Plan Book!

## 300 Homes, Photographs, Floor Plans all at

## GUARANTEED, LUMP SUM PRICES

SEND THE COUPON NOW

Before you build, be sure to get our big 160-page plan book, showing three hundred Gordon-Van Tine Homes—photos, interior views, floor plans which give **all** details, and **exact, guaranteed costs.** We send it **Free** on request. This is the last revised edition of the Home Plan Book that has made the name of Gordon-Van Tine famous among home builders all over the world.

Pages in color show you just how the homes will look when built, also how everything used in the interior finishing will look completed. You buy with your eyes open and you know what you're getting and exactly what you are going to pay for it.

## Material Ready-Cut or Not Ready-Cut

### At Wholesale Prices. Shipped Anywhere

## SATISFACTION OR MONEY BACK

The houses in this book are furnished either Ready-Cut, material all cut-to-fit, or not Ready-Cut, material in the standard mill-run lengths. You can buy your home either way of Gordon-Van Tine.

You run no risk buying from Gordon-Van Tine. If everything is not to your complete satisfaction, we refund your money without argument and pay freight both ways.

We guarantee that for the price quoted on each house we will furnish **enough** of the various kinds of material to complete it according to illustrations, plans and directions. We further guarantee that all materials will be of **standard grades** and that the building when completed according to our plans and directions will be strong and substantial.

Do not **think** of building until you have studied this book **through.** You will be amazed at the **difference** between this and the ordinary plan book—at the modernness of each plan shown in it. This book contains at least **one** plan that approximates your own idea of what a house **should** be.

On a bill of house material from Gordon-Van Tine you should save enough money to pay entire cost of construction, or buy your lot. Eliminate waste. Don't pay profits to the middlemen. Save the local lumber yard's rakeoff and put it in your own pocket. Write today for this big free 160-page book.

# The World's Greatest Authority on Barns and Farm Buildings FREE

Every type of barn and farm building is here shown, in its **best** form. Experts have spent months in gathering data from thousands of practical farmers the country over, so only **tried** and **true** features are included. Buildings are planned by the greatest farm building authorities, in the world, carefully checked and rechecked. The construction has been proven the strongest, most economical possible to devise.

This book is by far the most complete and exhaustive production ever published on farm buildings. Every plan has been tried out and tested, only the best are retained, and these are refined and improved until they will pass our rigid examination of our Board of Farm Building Experts.

There are also many convenience items shown, knock-down hog crates, self-feeders, hay rack, beds, all ready-cut and shipped bundled with the necessary hardware for less than the price of the rough lumber bought locally.

# The Big Organization that Cuts Building Costs for You

Study the above picture of our plant. We have shown the building with the side out that you can get an idea of how our business is systematized. This system is most important to you. It is because of perfect dovetailing in every part of our organization, perfect economy of time, labor and space, that we are able to rip the bottom out of building prices as we do. Waste motion is completely eliminated in the Gordon-Van Tine plants. The raw product of the forest goes through all processes in our plant in logical sequence. Cost of handling is cut to the quick. When you write to us about a plan, an estimate, or even the smallest building or remodeling item your orders are attended to by one of the most efficient organizations in the world. The smaller pictures on this page will show you how high power machines save money for you and will also give you some idea of the immense stock we carry which makes possible the extra quick service for which we are famous among home builders.

This is not intended to be a complete table of weights, but by making intelligent comparisons, a person can easily get the weight of any article in the catalog. A great many weights are given with the descriptions of the various articles.

**Canada.** Rates per 100 pounds from Davenport to

| | | | | | |
|---|---|---|---|---|---|
| Montreal, Quebec | Panel Doors, | $0.60 | Glazed Sash, | $0.90 |
| Halifax, Nova Scotia | " " | .76 | " " | 1.10 |
| Winnipeg, Manitoba | " " | .85 | " " | 1.29 |

## FREIGHT CLASSIFICATION

**ALL GOODS ARE DIVIDED INTO CLASSES,** and freight rates made on each different class. For example, in the Western States, lumber is 4th class; glazed windows 3rd class; nails 4th class; hardware 2nd class. The table in the next column tells you to what class most articles in this catalog belong. Suppose you live in Lincoln, Neb., and you want to know the freight rate on columns. Nebraska is in the "Western group." The table says columns take "4th class." Turn to the next page and it gives the "4th class" rate to Lincoln, Neb., as 31 cents per 100 pounds. That is all there is to it.

**REMEMBER, OUR FREIGHT EXPERTS** bill out your goods so they will take the lowest possible rate, and we pack and ship them in a manner to secure for you the lowest freight charges.

**WESTERN GROUP.** Arizona, Arkansas, California, Colorado, Idaho, Illinois, Iowa, Kansas, Louisiana, Minnesota, Missouri, Montana, Peninsula of Michigan Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wisconsin, Wyoming.

**EASTERN GROUP.** Connecticut, Delaware, District of Columbia, Indiana, Maine, Maryland, Massachusetts, lower Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

**SOUTHERN GROUP.** Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.

| ARTICLES | Western Group | Eastern Group | Southern Group |
|---|---|---|---|

| Tarred Felt | 4th " | 3rd " | 5th " |

## Freight Only 3½ Per Cent—We Save You About 50 Per Cent

Freight is cheap. If you will listen to the retail lumber dealer, he will make you think the freight is something awful. The facts are otherwise. It is wonderful how cheaply the railroads of the United States transport goods, and lumber and articles made from it seem to be especially favored, and the freight rates are very low. Here are some examples:

A Pine Door 2-8x6-8x1⅜ can be shipped 200 miles for only 6c, 350 miles for only 9c, 500 miles for only 15c, and greater distances less in proportion.

An ordinary glazed window can be shipped 200 miles for only 4c freight, 300 miles for only 6c, 500 miles for only 10c, and greater distances less in proportion.

## FREIGHT CHARGES ARE VERY SMALL

Freight charges are insignificant compared to the great saving we make you in the cost of the goods. It is very easy to tell, however, just what your freight will be, and we have gone to great pains to get up these tables of rates, and have made everything plain and simple and easy to understand. Owing to the very central location of Davenport and its splendid shipping facilities freight rates are very low to all parts of the country. Bear in mind and never forget that the freight charges on your shipment are not important compared to what you save in price. For example, if by buying of us you save $10.00 on a $25.00 shipment, and your freight charges are $1.15, it isn't a very big matter, is it? The tables on the following pages give the freight rates to every part of the United States, thus enabling you to determine just what your freight charges will be without waiting to write to us. After you have bought of us once or twice you will probably not care to refer to these tables, because you will find the freight amounts to so little compared to what you save in price. Should your own town not be named in the list, take the rate to the town nearest to you, and it will be practically the same as to your own town. Beware of misrepresentations of retail dealers, whom we find constantly exaggerate about freight charges and will try to force you into buying of them by scaring you into the belief that the freight will amount to as much as you save in price. We have hundreds of letters from customers telling us the large amounts they save after paying the freight.

To illustrate how low freight charges are, we show in first column a specimen order for shipment to St. Louis, Mo., a distance of 300 miles from our factory. You will notice that the freight on this good sized bill of goods is only $7c, which is only 3½% of the cost of the goods, whereas we save you about 50% under dealers' prices, so you see the freight cuts very little figure. As a matter of fact the retail dealer has to pay freight the same as you do and he adds his good big stiff profit besides. This is a free country and you have got a right to buy where you please and make your own shipments and pay your own freight if you can save money by it.

One roll of rubber roofing can be shipped 500 miles for only 12c, in fact, it can go from Davenport 1,800 miles clear to the coast of Maine for only 25c.

You can ship 1,000 feet of Yellow Pine ceiling, worth $24.50, a distance of 500 miles for only $4.90, and for the same stuff you would have to pay your local lumber dealer $40.00 or more, and quality not as good.

The freight on hardware is so little it is not worth while talking about, ½c on a lock worth 26c, for instance. Even on nails, you can ship a keg of nails 300 miles for 25c, and save a dollar in the price.

You can ship a gable ornament costing $1.05 clear out to towns in the Rocky Mountains for only 9c freight. The local dealer charges you $2.50 for the same thing, only it's dusty and shopworn—ours is bright and new.

We ship goods to Cuba, Mexico, Canada, California, South America and the Philippines, which is pretty good evidence that the freight cuts little figure compared to what they save in buying of us.

And Gordon-Van Tine's freight is not handled in the ordinary way. Our business is so large that the railroads have provided us with special facilities and accommodations. Most firms have to haul their goods to the different freight depots, perhaps over rough streets and in rainy weather. But a special train of freight cars is backed into our covered shed every morning and our own men pack and load everything snug and carefully. All cars containing our goods are followed by telegraphic tracers to speed them to destination.

**Carload Rates** average about 40% to 50% lower than on small shipments. For instance, the carload rate to almost all points in Texas is 33 cents; to Denver, Colo., 35½ cents; to New York City, 36 cents. By clubbing together with your neighbors, you can oftentimes make up enough for a carload. Lath and shingles will help to make up weight for a carload, and we sell these at extremely low prices.

# FREIGHT RATES PER 100 POUNDS FROM DAVENPORT, IOWA

**IMPORTANT** There is but little difference in the cost of freight from Davenport to the various towns in your State. So if your town is not given in this list, take the town nearest you, and it will give you practically what the freight rate is to your own town. It makes little difference whether the goods are shipped 1,500 miles or 1,575 miles, there is a very slight difference in the freight; sometimes no difference. In many states we give the average rate from Davenport, this average embracing all towns in a state. We can give you the exact rates to your town if you desire, but in our judgment the average rates are near enough for all practical purposes.

Thus no matter where you live, this enables you to figure accurately what your freight charges will be. Our customers are always surprised to find they are smaller than they expected. How much better to pay these small freight charges, getting your goods direct of a manufacturer, than to pay an enormous profit to the retail dealer.

## FREIGHT RATES ARE THE SAME TO ALL

The freight rates shown in this table are all taken from published tariffs, issued by the different railways, and are the same to all people. The humblest citizen can ship goods at these rates just as cheap as the millionaire manufacturer. No one has any advantage. This is the law of the land. The railroads cannot and do not charge you any more than these published rates.

Beware of what the local lumber dealer tells you about freight rates, as we get letters from our customers every day, telling of how the dealers misrepresent to them. For instance, a lumber dealer out in Kansas told our customer his freight rate from Davenport was $1.41, when really it was only 32 cents per hundred pounds. So you can see that you must look out for yourself and not believe what the dealer tells you.

### *IMPORTANT*

***When you order goods of us, always try to have at least 100 pounds, because most railways charge for 100 pounds anyway. The railroads will not make out a bill for less than 25 cents, no matter how small the shipment is.***

No. EH 70½. Dull Brass Finish on Genuine Bronze..... **3.40**

We make Veneered Oak Doors with a built-up core or center, which is built up of separate strips, dovetailed together and glued under hydraulic pressure, forming a solid water-proof foundation. The core is then planed on both sides until it has perfectly true surfaces, when the beautiful **RED OAK VENEER** is applied, being glued on with **Best Selected Veneer Glue** under enormous pressure. We always advise the use of stock sizes where possible, especially in Veneered Oak work, as it will require from three to four weeks time before shipment can be made on special Veneered Oak Doors. Please note the extremely large glass size. In comparing prices you will find that we use a much larger size glass than you usually get.

The designs are artistically and architecturally perfect and the workmanship is of the very highest class. Every Gordon-Van Tine Veneered Oak Door takes on a beautiful finish. **One or two coats of filler should be applied as soon as door is received, to prevent the absorption of moisture.** Care should also be exercised to see that the building in which door is to be hung is free from dampness.

The low prices of our solid Veneered Oak Doors make them a positive economy to every home builder. No better Veneered Doors can be manufactured. We pack and crate with extra care to insure them reaching you without a scratch or scar to mar their beauty.

No. EH 70½. Dull Brass Finish on Genuine Bronze..... **3.40**

The simple elegance of these Art Front Doors is indicated by the above illustrations, but the doors themselves must be seen to give you a true conception of the beauty of design and finish that makes each one a masterpiece. The side rails are very wide, giving plenty of room for locks and trimmings. Craftsman "D" door is furnished in veneered Red Oak only. All the balance of doors shown on this page are finest of White Pine, selected for beauty of grain. Each door is glazed with finest quality of **Polished Plate Glass**, finished with a 2-inch Polished Bevel. The carvings are genuine **Wood Carvings** (not composition), made from Selected Solid Wood. **We carry hundreds** of the above doors in stock—all full 1¾ inches thick, and can ship promptly.

**GLASS SIZE.** Please note that the plate glass in these doors shown on this page are extra long, which, of course, makes the door a bit more expensive. Most other manufacturers shorten up the light of plate glass, thus using more wood and cheapening the construction of the door, and in comparing our prices on these doors, please keep in mind the very large glass size.

**DOORS ON THIS PAGE ARE 1¾ INCH THICK. Other manufacturers quote these large doors in 1⅜ inch thick. We do not, because the weight of the plate glass will eventually rack the doors unless the frame work is 1¾ inch thick. So in comparing our prices with others remember these doors are 1¾ inch thick.**

All our doors are made from air-seasoned and kiln-dried lumber. Each door is glued with special glue, pressed together by heavy steam power press, finished and sand papered with extra care and guaranteed strictly up to the highest standard adopted by the Sash, Door and Blind Manufacturers' Association of the Northwest. We challenge comparison of quality and will ordinarily save you half the usual prices. Each door is carefully packed in strong packing paper and well crated with lumber of sufficient thickness to fully protect the lights and trimmings from damage in shipment. We guarantee safe delivery, in perfect condition, and will make good any damage that may occur in transit.

To the builder who is looking for good cheap doors of standard design at the lowest possible cost, we suggest these doors above shown in Fir, and White Pine in both "A" and "B" Quality. They are of the same design as our higher priced doors, and the workmanship is A-1 in every respect. For a finish paint, or graining, they are the best doors you can buy. We guarantee them to be exactly as represented in every respect. We have sold thousands of these doors and carry a large stock for prompt shipment. We cannot furnish these doors unglazed. Can furnish Santa Clara and Hollis in 1¾ inches thick in above signs at $1.25 net extra. Mexico, Chile and Peru in 1⅜ inches thick only.

# SIDE LIGHTS FOR FRONT DOORS

## THEY BEAUTIFY THE HOUSE AT LOW COST

### ADD A COLONIAL OR CRAFTSMAN ENTRANCE TO YOUR HOME AT THESE LOW PRICES

Side Light E 842

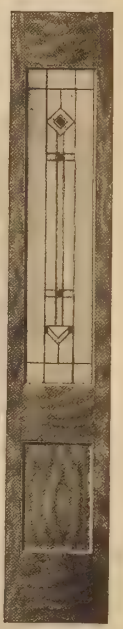
Side Light E 843

Side Light E 844

Side Light E 845

Side Light E 846

Side Light E 847



Side Light E 848

We offer the most complete assortment of side lights ever carried in stock by any firm. Usually side lights must be made to order at high prices and considerable delay. We actually carry in stock all the sizes and designs listed on this page and can ship immediately upon receipt of order.

Any side light can be used with any front door, but we have designed them to match up with certain patterns of front doors in kind of wood, size of rails and glass design. To obtain the most beautiful and harmonious entrances, therefore, we recommend that you combine your doors and side lights, as follows:

**Side Light No. E 842.** (This side light is glazed plain plate glass, divided with wood bars.) Use with Craftsman "A" or Mission "A" doors, illustrated on pages 12 and 13. **Side Light No. E 843.** (This side light is glazed with rich art glass.) Use with Craftsman "D" door, illustrated on page 12. **Side Lights No. E 844 and No. E 845.** Use with doors illustrated on pages 12, 13, 14 and 15. No E 844 is glazed clear bevel plate. No. E 845 is glazed "Art Nouveau" glass, set in coppered bars. The body of this glass is clear. The vertical strips are white moss, and the diamonds at the top have a touch of rich color.

## PRICES ON ABOVE SIDE LIGHTS

| 1 - 2 | x 6 - 8 | $4.75 | $5.40 | $6.95 | $5.00 |
| 1 - 2 | x 7 - 0 | 4.90 | 5.45 | 9.55 | 6.00 |

All Side Lights 1⅜-inch thick.
**Above prices are for single side lights only.**

## SIDE LIGHT FRAME E 981

The side light frame illustrated above is made of clear white pine. Outside casing is 1¼-inch thick, furnished either with plain cap or moulded cap. Jambs are 1⅝x5½ inches, rabbeted for 1⅜-inch doors and 1⅛-inch side lights. When a three foot door is used in the center, the total opening required for this frame between studdings is six feet three inches. This frame is cut to actual size listed below and is shipped knocked down and bundled, ready to set up. No inside casing or trim is included in the price of the frame, as this should be selected to match the rest of the trim in the house.

## PRICES ON SIDE LIGHT FRAMES

Not including Doors or Side Lights.

| Catalog No. | Frame for door 3 ft. by 7 ft. and side lights 1 ft. 2 in. by 7 ft. | Frame for door 2 ft. 8 in. by 6 ft. 8 in., side lights 1 ft. 2 in. by 6 ft. 8 in. |

## PRICES ON ABOVE SIDE LIGHTS

| Size Width Ft. In. | Size Height Ft. In. | E 845, Oak Glazed Art Glass Coppered Bars | E 845, White Pine Glazed Art Glass Coppered Bars |
|---|---|---|---|
| 1 - 2 | x 6 - 8 | $5.60 | $3.65 |
| 1 - 2 | x 7 - 0 | 5.65 | 3.75 |

**Above prices are for single side lights only.**

Our side lights are all manufactured from strictly clear lumber. Oak side lights should be used when you wish to varnish or stain in the natural grain. White Pine side lights should be used where you expect to paint them to match the outside frames and trim of your house.

Our side lights are all designed to match up with certain designs of doors. To get the most harmonious and beautiful entrances, the side lights illustrated above should be used as follows:

**Side Light No. E 846.** (This side light is glazed plain plate glass divided with wood bars.) Use with Bungalow door on page 12 or Pasadena door on page 14. **Side Lights No. E 847 and No. E 848.** Use Paris doors illustrated on page 13, or Toronto on page 15, or Winnipeg on page 17. No. E 847 is glazed bevel plate, and can also be furnished in plain double strength. No. E 848 is glazed "Art Nouveau" glass, set in coppered bars. The body of this glass is clear. The vertical strips are white moss and the diamonds and small squares show touches of rich color.

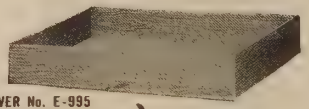
# Makes Your Home a Home of Convenience

## Here Are a Few Suggestions. See Pages 20 and 21 for Prices and Specifications

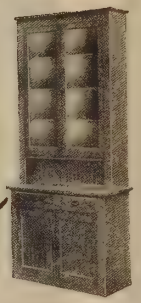
### All Items Are in Stock at Davenport

This handy, good looking towel case No. E-1607 only $3.50 Keep your towels in a sanitary case—and keep them where you need them, yet entirely out of the way.



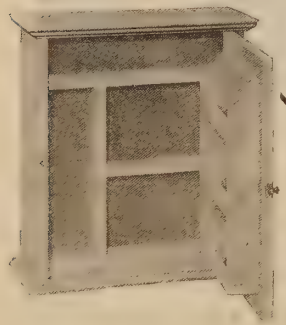
**DRAWER No. E-995**
50c Shipped all ready to put together. The cost of a set of 6 drawers is only $3.00 Think of it—and don't be without a convenient kitchen any longer.

Cupboard doors—55c and up, all ready to hang. You can have enclosed cupboard for everything for $10.00.

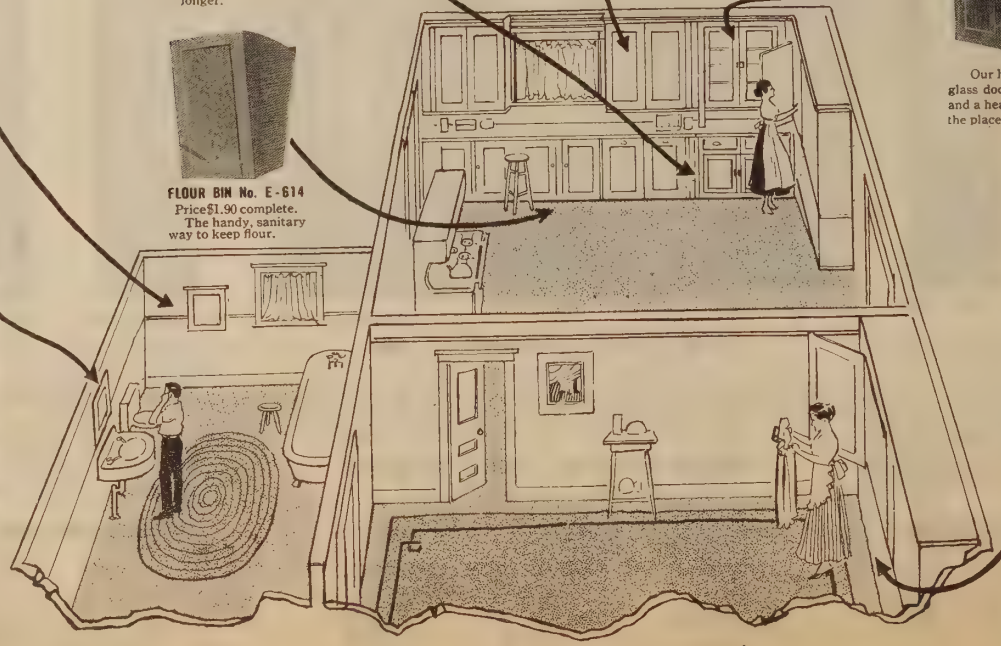


Our handy cupboard case—complete with glass doors, drawers, shelves and cupboards, and a heavy countershelf, only $11.75 Takes the place of a $10.00 kitchen cabinet.

**FLOUR BIN No. E-614**
Price $1.90 complete.
The handy, sanitary way to keep flour.



A combination medicine cabinet and mirror No. E-611½. Only $5.75 complete. Room for shaving equipment, toilette accessories, and a small drug store. Don't keep these things on an open shelf any longer, it's insanitary, unhealthy, unhandy and it looks bad.



This linen case all built from stock materials. Doors No. E-981. Drawers Nos. E-995 and E-996. Everything ready to ship. Measure your own home, find out how much space you can allow and write us. We'll plan a linen case all from stock material. The price will be so low you won't believe it.

# Built in Buffets at Half Furniture Store Prices

The whole trend of modern home furnishing is toward built-in furniture. In all high-class bungalows and larger homes, architects are specifying built-in buffets, china closets, etc., because "building-in" allows them to get a harmony of design and a richness of effect impossible under the old hit-and-miss system, besides using much less space.

Not only do built-in buffets recommend themselves for their beauty—they are also vastly more economical to buy than the regulation furniture store "side-boards" when you buy of Gordon-Van Tine. Our vast production and factory-to-consumer methods of selling enable us to simply cut the prices in half.

## Here is the Most Important Point

A side-board or a china closet bought of a furniture dealer **not only** costs you **more** in the **first place**—the very day it is delivered to you it becomes a **second-hand piece of furniture**—you couldn't **sell** it again for more than a **half** or a **third** of what it **cost you.**

On the other hand, a **built-in buffet increases** in value the minute you put it in—for it **increases the value of your home.** A home with built-in furniture commands a much **readier sale** and a **much higher price** than the same home without the built-in features. In a nutshell, built-in furniture is an investment that increases the value of your whole property—besides giving you **better, more satisfactory** service. Ordinary furniture is **second-hand stuff as soon as you buy it,** and it costs you twice as much in the first place.

Be sure you consider these things when you buy furniture—and buy **permanent, built-in furniture.**

The buffets illustrated on this page are made of Clear Douglas Fir, "the Wood with the Beautiful Grain." Of all the plentiful woods on the North American continent, Douglas Fir has the most exquisite grain. Not only this, but no other wood anywhere will take stain more beautifully and no other wood will take the variety of finish which you can obtain with fir. You can achieve any sort of effect with fir—match oak, yellow pine, birch equally well, in all shades of stain, or use paint or enamel. Fir is unique in this respect—it looks well with any wood you may use it.

Gordon-Van Tine buffets are made from specially selected lumber, which is milled and machined with the utmost care. The cabinet work is as carefully and accurately done as the finest piece of furniture in your home.

The china closet doors are all glazed with beautiful French Art Glass set in metal bars. The hardware is all dull brass finish of a chaste and dignified design, heavy and strong, but harmonizing with the general design.

They are "thoroughbreds," fit to grace any home and to hold their own in any company.

**Buffet No. 619**

This buffet is built to be set flush with the wall, in permanent position. The buffet itself is 3 feet 6 inches high and the mirror back 10¾ inches high. The buffet is 5 feet 6 inches wide. The buffet is exactly the same in design and dimensions as the other two buffets on the page. It is shipped all ready to set up, with the doors glazed and the mirror back all ready to set on. All the hardware is included.

No. E-619. Buffet with mirror back in Clear Slash Grain Douglas Fir, complete with all hardware and glazed as illustrated. **$32.00**

No. E-619½. Plain Red Oak ..... **36.00**

**Buffet No. 618**

This very beautiful Fir buffet and china closet is carried in stock in size 5 feet 7 inches wide and 7 feet high. The depth is 20 inches over all, requiring a wall depth of 13 inches. It is built in two sections, so that it can be readily installed in position in the room. The doors and drawers are all fitted in place and the hardware is all included in the price and shipped with the buffet.

No outside casing or trim around the opening is included, as it must match the trim in the room in which the buffet is installed.

No. E-618. China buffet in Clear Slash Grain Douglas Fir, complete with hardware and glazed as shown in cut, including mirror ..... **$54.00**

No. E-618½. Plain Red Oak..... **60.00**

**Buffet No 620**

This buffet is intended to set flush with the wall. It is 4 feet 1 inch in height and 5 feet 6 inches wide. The drawers are all 18 inches deep—the large drawers 2 feet 4 inches wide and the small drawers are 1 foot 1½ inches wide. The two china closets are 12 inches wide and 2 feet 8¾ inches high. This is a very commodious and beautiful buffet, with the graceful wood back. For those who do not desire the added china closet room, nor the mirror back, it is the best buffet that can be bought.

No. E-620. Buffet with Mission Board Back in Clear Slash Grain Douglas Fir, complete with all hardware and glazed as illustrated ..... **$26.50**

No. E-620½. Plain Red Oak..... **30.00**

# Put These Conveniences in Your Home This Year

## Towel Cabinet

A handy chest for towels or linens. Hung or nailed on the wall in your bathroom, it makes an attractive piece of furniture and is up out of the way. Can also be used in the kitchen for dishes or linen.

Made of clear slash grained Fir—not painted. Can be white enameled, painted or varnished to suit your woodwork. Contains three shelves.

Size 1 ft. 8 in. wide, 2 ft. 7 in. high and 11 in. deep. Shipped knocked down—all cut and fitted ready to set together. High grade nickel-plated hinges and cupboard turn.

## A Kitchen or Pantry Case

## $11.75

A handy piece of furniture which can be nailed solid against the wall like a built-in fixture, or can be moved to different parts of the room.

Made of clear Yellow Pine, not painted or varnished, but smoothed ready for any finish to match your woodwork.

Dimensions 3 ft. 6 in. wide by 8 ft. high. Lower section is 18 in. deep, with two shelves and two drawers, upper section 12 in. deep, with four shelves. Shipped knocked down, in compact bundles, all cut and fitted, tenoned, grooved, etc., so that it fits together easily and quickly without further labor of any kind.

No. EH-1606. Complete as illustrated, with clear glass doors (no hardware) ..... **$11.75**

If panel doors are wanted in upper section, same price.

For complete hardware as illustrated, including elbow catches to hold doors in place, add ..... **95c**

(State whether hardware is wanted in antique copper or dull brass finish.)

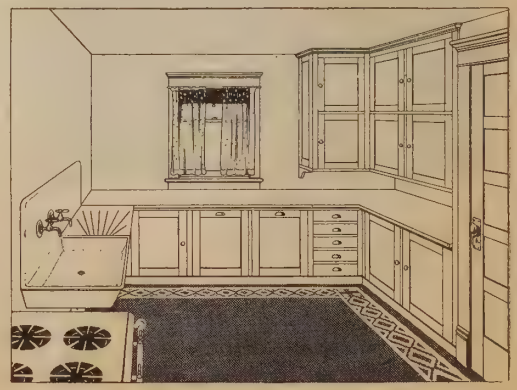
## Cupboard Doors

Our Cupboard Doors are neat, strong and made with the same careful attention to detail as our most expensive doors. They have 3-ply laminated panels and are made of the finest grade of air-seasoned lumber. In most modern homes the Cupboards are built in, as this is the most economical, convenient and satisfactory method. Every woman appreciates a nice, roomy, "built-in" cupboard or "butler's pantry." Each of the accompanying pictures shows two doors or one pair to each cupboard. Should you want a wider cupboard, use three doors. These doors are not rabbeted.

These doors are furnished in Yellow Pine, Fir and Oak, which are very similar.

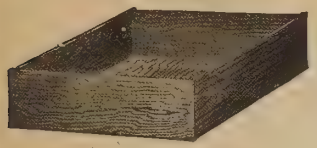
| Catalog No. | Width | Height | Thickness | Price Each Door Yellow Pine | Price Each Door Fir | Price Each Door Oak |
|---|---|---|---|---|---|---|
| E191 | 1 ft. 6 in. | 4 ft. | 1⅛ in. | **$0.95** | **$1.00** | **$1.20** |
| E192 | 1 ft. 6 in. | 2 ft. 0 in. | 1⅛ in. | .55 | .60 | .75 |
| E192½ | 1 ft. 6 in. | 2 ft. 6 in. | 1⅛ in. | .65 | .70 | .85 |

**Cupboard Doors, No. 191, like these, can be shipped 500 miles for only 7 cents each, freight. Greater distances less in proportion.**



A Model Kitchen—Using Stock Designs

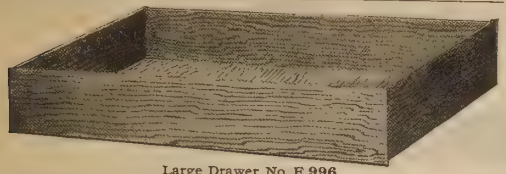
# Drawers for Pantry, Etc.



Small Drawers No. E 995

The drawer shown is adaptable for pantry or china closet work. It has lip front ⅜ inch thick; sides ⅝ inch; back and bottom ¼ inch thick. Exposed portion either Yellow Pine, Fir or plain Red Oak, balance soft wood. Shipped in knocked down.

| Wood | Width Ft. In. | Depth Inches | Height Inches | Price per Drawer K. D. |
|---|---|---|---|---|
| Yellow Pine... | 1 - 5½ | 18 | 4¾ | 50c |
| Fir ..... | 1 - 5½ | 18 | 4¾ | 55c |
| Plain Red Oak | 1 - 5½ | 18 | 4¾ | 60c |



Large Drawer No. E 996

The drawer shown is adaptable for pantry, china closet, or linen closet work. It is made same as above drawer in all respects, except difference in width and height. Two of the narrow drawers will finish the same width as the wider drawer, and allow for a division strip between the narrow drawers.

| Wood | Width Ft. In. | Depth Inches | Height Inches | Price per Drawer K. D. |
|---|---|---|---|---|
| Yellow Pine... | 3 - 0 | 18 | 6¾ | 60c |
| Fir ..... | 3 - 0 | 18 | 6¾ | 65c |
| Plain Red Oak | 3 - 0 | 18 | 6¾ | 70c |

The freight is almost nothing on these drawers. No. 995 can be shipped clear to Atlantic Coast points for only 6 cents each, or to the Rocky Mountains for 8 cents each. Drawer No. 996 can go to any town in Iowa or Illinois for only 5 cents each. On all our goods the freight is only a trifle compared to what you save.

# Guaranteed Strictly "A" Quality White Pine Doors

4-PANEL DOORS

## BEST QUALITY DOORS AT BARGAIN PRICES

These Doors are among our greatest Sellers. Never were you offered more remarkable bargains. They are guaranteed "A" quality. They are made from clear air-seasoned White Pine, free from sap and pitch.

### IN REGARD TO OUR DOORS

All lumber used in our doors and mouldings is Western White or Soft Pine—is clear, free from knots, easily worked and stays in place.

We carry a large stock, well assorted in 1⅜, 1¾ and 1¾ inches thick in sizes given below. Sizes not listed and priced are not carried in stock. We can ship promptly regardless of the size of the order.

In "B" quality we carry in stock only Fir Doors (see page 24) which we sell at lower prices than White Pine. They are equally good. All "A" quality doors on this page are White Pine.

## GUARANTEED STRICTLY "A" QUALITY

### LARGEST STOCK IN AMERICA

When doors are not priced they are not carried in stock. Always state size and kind of door wanted.

The styles of Doors shown on this page are universally specified by architects. The Four Panel Door is the standard of the world for ordinary uses. The Five Cross Panel giving a very artistic appearance.

Freight is cheap A door 2-8x6-8x1⅜ can be shipped 100 miles for 5c, 200 miles for 8c, 300 miles for 11c, 500 miles for 15c, 1000 miles for 24c, or the average cost of freight per door from our factory to various states is as follows. We name a few: Iowa, 7c; Illinois, 8c; Missouri, 12c; Nebraska, 15c; Kansas, 15c; Minnesota, 11c; Michigan, 12c; So. Dakota, 15c; Indiana, 15c; Maine, 30c.

Compare these small charges with the robber profits of the Lumber Trust.

We pack our doors with paper and crate very carefully so they will reach you as bright and clean as when they leave the factory

### HOW TO SAVE MONEY ON DOORS

Keep your sizes within the list below and save both time and money. Odd sized doors cause delay and cost more than regular stock sizes. Remember, this when planning your house. Oak Doors and Mouldings (see pages 25 to 28.)

## Single Sliding Doors

Made of Clear White Pine, in 5-cross panel design, to match standard 5-cross Panel Doors.

# BEAUTIFUL FIR DOORS—Strictly "A" No. 1 Quality

**5-Cross Panel Door**
Fir

## FIR DOORS

Western Fir is a justly popular wood for doors, has a most beautiful grain, is easy to work, will take paint, stains or oil finish equally well.

The grain of the wood is without question one of the most beautiful grains of any of our woods. Let us assure you that you will be fully satisfied with Fir, and the probability is that you will much prefer it to any other wood.

Architects are specifying Fir in many of the best residences throughout this country. Fir Doors match up with Yellow Pine Trim. You need have no hesitancy in ordering Fir Doors and Yellow Pine Trim.

### ONE PANEL AND TWO PANEL

This Door is shown in photograph at the right, and is without question the most beautiful door that can be made. We use what is known as old Growth Yellow Fir. The stiles and rails are edge grain, and the one panel has a rotary cut veneered, flat panel Bead and Cove sticking. The panels are plump ⅜-inch thick.

### FIVE CROSS PANEL

Five-cross panel doors are made with edge grain stiles and rails and slash grain panels.

**One Panel Fir Door**

## 5-Cross Panel Fir Doors "B" Quality

You will be more than satisfieed in every way with the B quality fir doors. Western fir is a very popular wood for all kinds of interior finish, has a most beautiful grain, is easy to work, will take paint, stain or oil finish equally well.

You will find the B quality doors very high as to quality and low in price. - In fact, you will be surprised and delighted with the doors, as you can hardly tell them from A quality doors. You take our word for it that these B quality fir doors will suit you in every way.

## READ!!

Pittsburg, Pa., April 17, 1914.
Gordon-Van Tine Co.,
Davenport, Iowa.

Gentlemen: I received the 1 panel Fir doors I ordered from you some time ago in good shape and am very much pleased with them. I had a very unusual experience with them, which I will relate to you. The carpenters went away from the building in which I used them and left the gas fire burning on a very cold night and when I went to the building the next day the water was running down the doors and all the damage it did to the fir doors was to make the grain raise a little, but I had two 2 panel doors in another room and I had to put in four new panels.

Yours truly,
SAMUEL F. WINTERS,
(Contr. & Builder.)

**SPECIAL OR ODD SIZES**

If you need a 1 Panel Door of size not listed add one fifth (20 per cent) to price of next larger stock size. For sizes wider than 3 feet or higher than 7 feet, write for prices.

A door made from a solid piece of hardwood is unyielding and will warp, twist open at the joints, and cause endless trouble. Hardwood Veneered Doors solve the problem.

Narrow pieces of lumber are glued together and squeezed under the most powerful hydraulic pressure, obtaining perfect joints. This forms the core or center of the door. Veneers are then applied. Veneers, together with the core, are again subjected to a most powerful hydraulic pressure, making a solid piece.

### Suitable Hardware For These Doors

**Crescent Inside Door Lock Set**

Lock 3½x3¼ in. Escutcheon 2⅜x7 inches.

No. EH11. Antique Copper finish Steel. Price per set..... 65c

**SPECIAL OR ODD SIZES**

If you need a door of size not listed add one-tenth (10 per cent) to price of next larger stock size. For sizes wider than 3 ft. or higher than 7 ft. write for prices.

# BEAUTIFUL FULL-LENGTH MIRROR DOORS AT LESS THAN THE MIRROR PRICES ALONE

There are few things which you can add to your home which will prove more of a satisfaction and a convenience to you than a mirror door. Ever since the time when Louis XIV. ruled in France, and milady's toilette was developed into a fine art, the full length mirror has been one of the highest-prized of feminine possessions.

In those days each boudoir had at least one—a huge affair in a heavy, ornate, gilt frame. The glass was "hand made" and imperfect in surface, not like the beautiful, clear, polished plate we sell today, but they were the dearest possession of the ladies of that day.

The modern home, small, skillfully planned, with every bit of wall space taken up, caused the full length mirror to lose its vogue—not because people didn't want it, but because they didn't have any room for it. The mirror door has solved the problem. This space, unused for decorations, with the space in front of it clear of necessity, provided the logical place for the full length mirror in the modern home.

The satisfaction that you get, you housewives, from having a mirror in which you can see yourself "all at once"—get the whole effect of the costume you are planning—is more than many times the cost of the door. You won't need to scramble upon a chair to see how your skirt hangs.

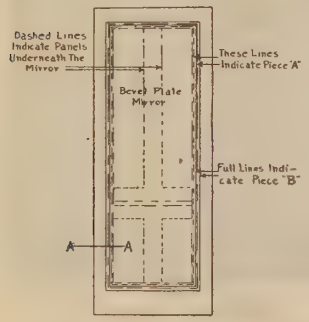
The sleeping chamber or sewing room is a fine place to put a mirror door. Use some closet door. For instance, the downstairs coat closet, where you can see to put your hat on, and find out if you are "all right" just before you leave the house.

These Gordon-Van Tine mirror doors are beautiful pieces of millwork, handsome in design and exquisitely made. The glass is the very best polished French plate. They give a tone of distinction to any room where they may be added.

The doors are furnished in plain red oak veneer, 1¾ inches thick, with mirror on one side and five cross panel design on the other side, to match stock oak door No. E-221. They also come in fir, in five cross panel design. We can make them up from other woods to match other designs should you want them. Prices on mirror doors kept in stock:

| SIZE Width Ft. In. | SIZE Height Ft. In. | Thickness | No. E997 Oak Price Glazed Mirror Plate | No. E941 Fir Price Glazed Mirror Plate |
|---|---|---|---|---|
| 2 - 6 | x 6 - 8 | 1¾ in. | $19.65 | $19.10 |
| 2 - 6 | x 7 - 0 | 1¾ in. | 20.50 | 20.35 |

Above prices are for Door Glazed Mirror Plate without Bevel. If you want Mirror Beveled add $1.50 extra. We recommend the Mirror without Bevel as the Bevel narrows the usuable portion of Mirror by 3 inches.



## Make Your Own Mirror Door—Use the Door You Have

We furnish you a complete outfit, enabling you to take any ordinary door that you now have in your home, and make a beautiful mirror door. We furnish 1½-inch bevel plate; thin strips and frame to fit both the face of the door and glass; mouldings designed to frame the mirror and hold it firmly in place; also a sufficient number of round headed brass screws.

Any door of the ordinary kind can be made into a mirror door in a few moments and you can do the work yourself. First take the door off the hinges and lay it flat on the floor or on horses. Second, place the thin strips evenly on the face of the door and lay the mirror on top. Third, screw the mouldings into place. You then have a real mirror door at a very small cost.

### Price Mirror Door Outfit No. E-238

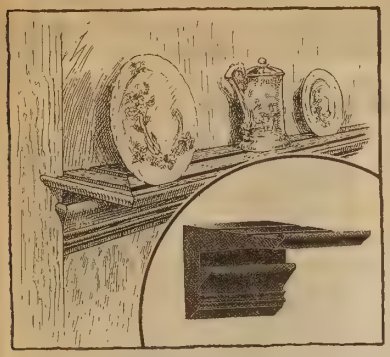
Full Size Section AA

### HOW TO ORDER

Take the measurements of the door just outside of the panel part (see cuts opposite). Allow at least ½ inch all around for the mirror to rest upon, then select your size from the price table below. In ordering be sure to specify whether the door is yellow pine, cypress, white pine or oak. The mirror, moulding strips and screws will come carefully wrapped and packed.



# PLATE RAIL

makes a most attractive addition to a dining room, and every housewife appreciates the beauty it brings to a house. Please notice that the moulding below the shelf can be used for a picture moulding, which the ladies find convenient. This Plate Rail is made up of two members, as illustrated, projects 3½ in. from the wall. Modern architects are specifying it in all homes.

No. E 232. Prices quoted are for one lineal foot, made up of the two pieces. Specified lengths, one-half cent per foot extra.

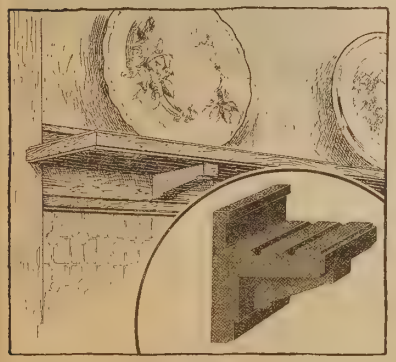
Yellow Pine, per foot..... 4c
Plain Red Oak, per foot..... 7c

## END BRACKET FOR ABOVE PLATE RAIL

The illustration to the left shows the manner in which these Brackets are used, requiring two to every door or window opening, and are set on the outside edge of the casing. The Brackets come in either Yellow Pine or Plain Red Oak. Size 3¾ in. by 8½ in.; thickness, ⅞ in.

Yellow Pine, price, each..... 8c
No. E 905 Red Oak, price, each..... 9c

## MISSION PLATE RAIL AND BRACKET



To those finishing their homes in Mission or Craftsman finish, we present our Mission Plate Rail in Red Oak and Fir. This design is thoroughly Mission in every way, and will tone off the dining room and add much to the beauty and culture of a home.

The **Mission Plate Rail** comes in three members: Projection 3⅛ inches.

No. E 839. Mission Plate Rail.

| | Price |
|---|---|
| Lineal foot, Red Oak | 10c |
| Lineal foot, Fir | 8c |

PLATE RAIL BRACKETS. These Brackets are necessary with the above Plate Rail, and should be used 32 inches apart.

No. E 840. Plate Rail Brackets. Size, ⅛x¾x2½ in.

Red Oak, price, each..... 6c
Fir, price, each..... 4c

## 90c OAK INSIDE JAMBS OR FRAMES

Inside Door Jambs or Frames are ready to set up, but shipped knocked down, carefully bundled for shipment. We furnish these in Oak. Jambs are ⅛x5½ in. with side jambs dadoed for head. Prices do not include stops. For stops see page 66.

For Doors 2-8 x 6-8, or smaller..... $1.00
For Doors 3-0 x 7-0, or smaller..... $1.10
For Cased Openings 6-0 x 7-0, or smaller..... 1.38
For Single Sliding Door 6-0 x 7-0, or smaller..... 3.09
For Double Sliding Door 6-0 x 7-0, or smaller..... 2.76

(State whether for Single or Double Sliding Doors.)

## MISSION OAK CORNER BEADS

No. E 275. Oak Flat Corner Beads.

1½ x 1½ in., 4 ft. long. Price each..... 18c

## OAK BASE CORNERS

This design of Base Corners has turned top which saves mitering corners of Base.

No. EO 278

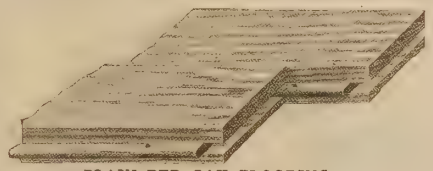
Oak Base Corners, 1⅜x14 in., each.... 4c

# OAK FLOORING

Oak stands at the head of all woods for Interior Finish and Floors. Its beauty of grain and texture, its rich shadings, its enduring strength and its moderate cost, afford a combination of desirable features found in no other wood. For dark, rich effects it has no equal. It may be finished in its natural tone or in Mission, Flemish, Brown, Green, "Weathered Oak," etc.

Home builders who hesitate to specify Oak for floors and inside finish because of the high prices demanded by retail dealers will be astonished to learn that we are selling the finest grade of Oak Flooring, Mouldings, Doors, and all other items of Interior Finish at such low prices that you can now floor your home at about half the former cost.

See how a Hardwood Floor adds to the Beauty of a Room



PLAIN RED OAK FLOORING

No. E 900. Quartered Red Oak Flooring, ⅜ x 1½ in. Per 100 lin. ft.. 95c
Per 1000 ft., Board Measure..... $57
No. E 901. Quartered White Oak Flooring, ⅜ x 1½ in. Per 100 lin. ft.. $1.05
Per 1000 ft., Board Measure..... $63

## 100 Lineal Ft. ⅜x1½ in. Oak Flooring 50c

We sell this flooring by the 100 lineal feet. Eight lineal feet will lay one square foot, as for instance, a room 12 x 15 contains 180 square feet, which multiplied by eight gives you 1,440 lineal feet. The price is per 100 lineal feet, random lengths. All our thin flooring is side and end matched.

No. E 294½. Select Oak, ⅜x1½ in. Per 100 lineal feet..... 50c
Per 1000 ft., Board Measure..... $30
No. E 295. Clear, Plain Red Oak, ⅜ x 1½ in. Per 100 lineal feet..... 80c
Per 1000 ft., Board Measure..... $48

## THICK OAK FLOORING

This beautiful flooring is machine polished, tongue-and-grooved, end matched, and bundled. In ordering you must allow one-third for waste in cutting, and the difference in width, as this flooring is figured as 3 in. wide. The price we quote below is per thousand feet. Oak flooring comes in lengths from 2 to 16 feet. We cannot furnish any specified lengths.

No. E 292. Plain Red Oak, ⅜ x 2¼ in. Per 1,000 feet..... $55.00
No. E 293. Select Red Oak, ⅜ x 2¼ in. Per 1,000 feet..... 48.00

Complete Information on Oak Flooring on pages 70-71. Prices on Floor Wax, Varnish and Filler on page 101

# Artistic Beam Ceiling

Note Beauty of Beamed Ceiling and Paneled Wainscoting.

## Why Pay $75

It is an acknowledged fact that Beamed Ceiling adds that degree of beauty and refinement to the modern Reception Hall, Dining Room, Library or Den, which no other branch of the art of architecture can produce. To such an extent have these added effects and beauties been recognized that a determined effort has been made in the past to give them a degree of exclusiveness by putting on prohibitive prices.

On this page we show how easily, and at how small a cost, any room or rooms can be fitted out with same.

For a room of average dimensions, say 12x12, Beam Ceiling Style No. 750 is to be preferred, unless the room has a low ceiling, say 8 feet, in which case Style No. 751 Beam Ceiling should be used.

For larger rooms we would recommend Beam Ceiling Style No. 751, or a combination of both. The wide side of Beam Ceiling gives a heavy, massive effect, which can be used to great advantage in Reception Halls, Dining Rooms, etc.

The material is all shipped in the knock-down, is thoroughly kiln-dried and perfectly machined. The construction is so simple that only a square and saw are required to put same in place, and does not require the service of expert mechanics. It is equally adaptable to old and new residences.

### HOW TO ORDER BEAM CEILING

1st. If possible, give rough sketch showing outline of room, indicating extreme length and width. 2d. State which style is desired, and be sure to give kind of wood. 3d. If any particular arrangement of Beam is desired, also indicate same on rough sketch, otherwise we will ship what we think is best adapted for the room.

## Beam Ceiling—Oak, Fir and Yellow Pine

No. E 750. Consists of 3 square members $\frac{13}{16}$ x 4½ and 2 members of ceiling cove as shown in cut. Finishes when set up 6 inches wide and 4½ inch drop. Price is complete.

In Yellow Pine, lin. ft..... 9c
In Fir, lin. ft..... 10c
In Plain Red Oak, lin. ft..... 15c

No. E 751. Consists of 2 square members $\frac{13}{16}$ x 4½ inches, one square member $\frac{13}{16}$ x 11½ and 2 members ceiling cove as shown in cut. Finishes 13 inches wide and 4½ inch drop. Price is complete.

In Yellow Pine, lin. ft..... 14c
In Fir, lin. ft..... 16c
In Plain Red Oak, lin. ft..... 25c

## Wall, Cornice and Picture Moulding

For Beamed Ceiling

**Also makes handsome wall finish where no beamed ceiling is used.**

No. E 752. Consists of 1 square member $\frac{13}{16}$ x 4½ inches, 1 member ceiling cove and 1 member picture moulding. Price is complete.

As shown in Yellow Pine, per lin. ft..... 5c
As shown in Fir, per lin. ft..... 6c
As shown in Plain Red Oak, per lin. ft..... 10c

# Paneled Wainscoting

## Slash Grain Douglas Fir

**50%** SAVED through the use of our new Artistic Paneled Wainscoting. Made from thoroughly kiln-dried stock and constructed on the unit system, which makes it possible to supply in exactly the right number of sections to suit any size room for any wall space in the room.

The panels are "built up" of 3-ply stock cross-banded—a protection against shrinkage, checking or warping, and insures great strength and unlimited durability. The wainscoting is adaptable not only to new homes, but to an even greater degree in remodeling of old houses, adding an increased value for less money than any other known method. The paneling is shipped "knock down" and the work of putting it together and in place is very simple.

The base part of the wainscoting is furnished in two parts. The wider member is fastened to the wall with the top edge perfectly level and the bottom about ½ inch from the floor. The extra floor strip that comes just outside conforms to the irregularities in the floor and does away with the necessity of fitting the wider member to the floor. The wainscoting is built up by fitting together the sections as shown in cut. The stiles or upright pieces are grooved lengthwise at the edges to receive the panels, and are also tenoned across the top and bottom to fit into the grooves of the base board and top rail. Panels come in just the right thickness to fit into the grooves.

All orders should be accompanied with a rough floor plan of the rooms to be paneled, giving exact measurements. Our Architectural Department then makes up a scale floor plan, and our factory furnishes the wainscoting to these measurements, marking the required items for each particular section, so that no mistake can be made in erecting at building. All flat surfaces are machine smoothed, and all material is carefully crated and packed so that it reaches you in clean, bright, sound condition.

Showing the Wainscoting. Note the Beautiful Grain.

### SLASH GRAIN DOUGLAS FIR

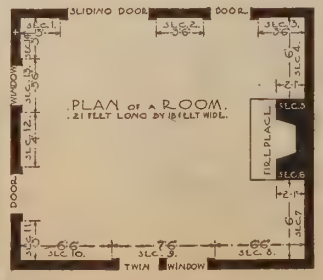
**For Your Hall, Living Room, Dining Room or Den**

Slash Grain Fir panels are famed for their beauty, and are being extensively used in hotels, public buildings, and in all the finest homes of the Northwest. Therefore, in offering our panel wainscot made of this wood, we are giving you something that has no superior for beauty, and yet it is sold at a price far cheaper than any other hardwood.

Fir will take any kind of stain, varnish, or paint finish. No matter what the rest of your woodwork may be, you can use our fir panel wainscot and get a beautiful job. You can stain fir to imitate oak, mahogany, walnut, or any of the most expensive woods.

### WITH PLATE-RAIL OR PLAIN CAP

The illustration shows the wainscot, capped with our Mission Plate Rail No. 839, with brackets. We also furnish a plain cap in case no plate rail is wanted (see price list).



### SAVE MONEY ON YOUR PLASTERING

FOR NEW HOUSES.—Nail a furring strip to studding at the height of the plate rail. Apply lath and plaster above this strip, and save the cost of plaster below it. Then apply panel wainscot direct to studding, nailing supporting strips in between the studding where necessary.

FOR OLD HOUSES.—Apply panel wainscot over old plaster, first removing the old baseboard.

### HOW TO ORDER

Make a rough sketch of your room, and mark the width of all wall spaces, as shown by the sketch below. For spaces between windows and doors, be sure and measure from outside edge of casing.

### PRICES PER RUNNING FOOT

| Height | With plate rail and Brackets as illustrated | With plain cap no Brackets |
|---|---|---|
| 3 feet | $0.60 | $0.57 |
| 4 feet | .70 | .67 |
| 5 feet | .80 | .77 |

**On all Ceiling Material shown on this page Odd Lengths will be charged at Next Higher Even Feet, for instance: 9-0 lengths will be charged as 10 feet.**

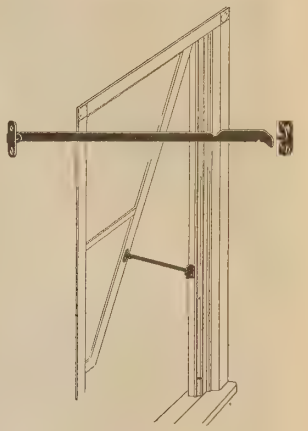
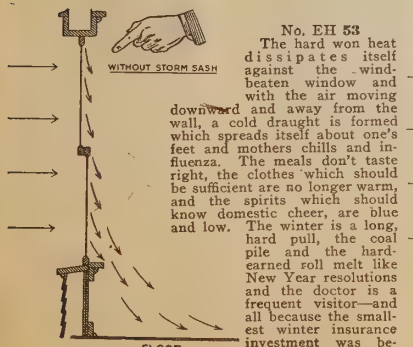
Packages 1 to 25, price per package of 25 pairs ..... **49c**

Packages of 26 to 50, price per package of 25 pairs ..... **49c**



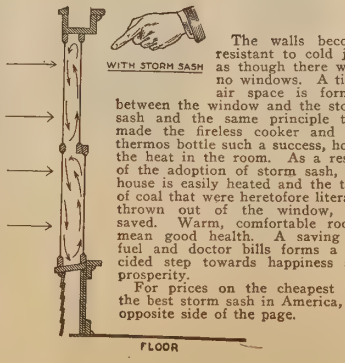
Storm Window attached with Sash Fastener. Open.

## Why Storm Sash Are Necessary



No. EH 53

The hard won heat dissipates itself against the wind-beaten window and with the air moving downward and away from the wall, a cold draught is formed which spreads itself about one's feet and mothers chills and influenza. The meals don't taste right, the clothes which should be sufficient are no longer warm, and the spirits which should know domestic cheer, are blue and low. The winter is a long, hard pull, the coal pile and the hard-earned roll melt like New Year resolutions and the doctor is a frequent visitor—and all because the smallest winter insurance investment was begrudged — STORM SASH.



The walls become resistant to cold just as though there were no windows. A tight air space is formed between the window and the storm sash and the same principle that made the fireless cooker and the thermos bottle such a success, holds the heat in the room. As a result of the adoption of storm sash, the house is easily heated and the tons of coal that were heretofore literally thrown out of the window, are saved. Warm, comfortable rooms mean good health. A saving on fuel and doctor bills forms a decided step towards happiness and prosperity.

For prices on the cheapest and the best storm sash in America, see opposite side of the page.

# HUGE SAVINGS TO HOME OWNERS ON GLASS!

## AMERICAN WINDOW GLASS AT STARTLING REDUCTIONS FROM RETAILERS' PRICES

**READ!** WE SELL 7X9 WINDOW GLASS AT . . . **4½c Per Light** ANY SIZE, LARGE OR SMALL, AT EQUALLY LOW PRICES. SAFE DELIVERY GUARANTEED. DEALERS' PRICE ABOUT **15c Per Light**

### Quality and Safe Delivery Absolutely Guaranteed

We are one of the largest dealers in American Window Glass in the United States and the tremendous volume of our business enables us to buy at almost the actual cost of production. Our prices to the consumer are only a fraction of what retail dealers charge. We buy only from the best equipped glass factories and our goods are up to the highest standard of quality.

**Local Dealers often ask three times our prices.**

Why pay extortionate prices for Window Glass? Note the low prices quoted on this page, and send your next order for glass to Gordon- Van Tine Company.

**SAFE DELIVERY GUARANTEED**

When we deliver our glass to the transportation companies we get a good order receipt. If any glass is broken you can tell by shaking the box and it will rattle, in which case it should be opened in the presence of the railroad agent, the number of broken lights counted and marked down on the freight bill. This should be done before the glass is removed from the freight depot. Send this noted freight bill to us and we will, without cost to you, replace the glass or refund the amount of the breakage. Under no circumstances can we be responsible for breakage unless it is noted on the railway expense bill. Odd size lights take price of next larger size. No charge for boxing or packing. No order accepted for less than $1.00. For Freight Rates see pages 5 to 7.

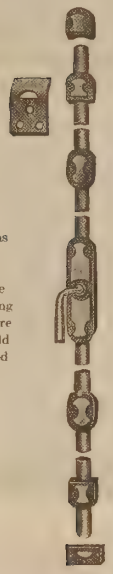
# French Window and Casement Hardware at Half Dealer's Prices

## CREMORNE BOLTS FOR FRENCH DOORS



See Illustrations of French Doors on opposite page showing how Cremore Bolts should be attached

No. EH 225

Cremorne Bolts are used for French doors only and we show above EH 225. This design is furnished in dull brass and antique copper finish.

No. 225 is forged steel; designs are furnished in dull brass and antique copper finish.

Wt. per set 2¾ lbs.

Forged steel lever. Rod ⅝ inch half round, center plate 5¼x1⅜ in., two middle guides, two end guides, one bottom plate; two top plates, one a rim strike for flush doors and flat strike for recess doors.

No. EH **225**. Dull brass finish. Price complete with screws..... **$3.30**

No. EH **225½**. Antique copper finish. Price complete with screws.... **$3.30**

## French Window Locks

These French Window Sets are used on single or double French or Casement Windows. The flat front for single or double windows and where double doors are rabbetted front Lock Sets are used. Flat Front Lock 3⅜x1¾x⅝, 1¼ in. back set. Rabbeted Front Lock 3⅜x2⅛x⅝, 1⅝ in. back set; comes complete with 1x4½ in. escutcheon for each side of door with each set and operated with knob from one side and lever handle from the opposite side. Window can be locked with key when so desired. It is always necessary when ordering these sets for rabbetted windows to specify the hand required. The hand of a door is determined by the butt side and from a position outside of the entrance, viz., the street side of an outside door, the hall or corridor side of a room door, the room side of a closet door, and in a communicating door between two rooms the side from which the butts are not visible. If a door swings in from the outside, to the right, it is right handed; if to the left, it is left handed. (See cut on following page under picture of French Doors.) Wt. per set 30 oz.

EH **407**. Dull brass left hand rabbet face.
EH **407½**. Dull brass right hand rabbet face.
EH **408**. Antique finish, left hand rabbet face.
EH **408½**. Antique finish, right hand rabbet face.

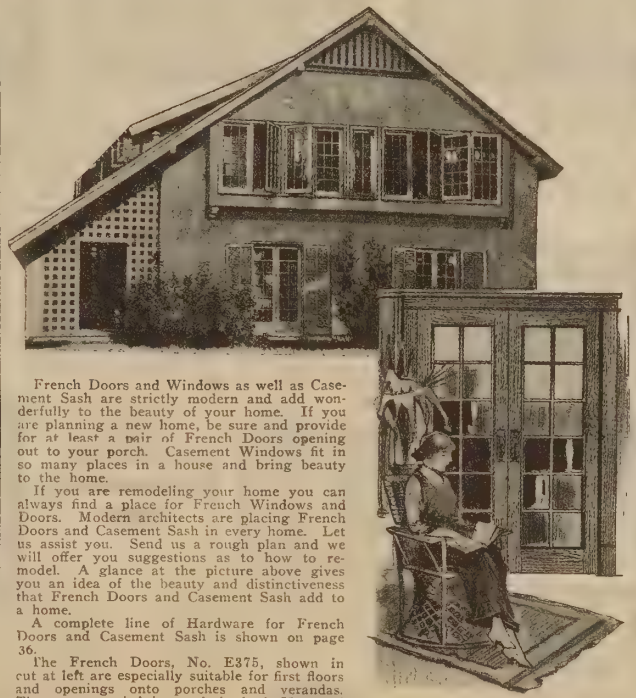
## French Doors and Casement Sash will Improve Your Home



French Doors and Windows as well as Casement Sash are strictly modern and add wonderfully to the beauty of your home. If you are planning a new home, be sure and provide for at least a pair of French Doors opening out to your porch. Casement Windows fit in so many places in a house and bring beauty to the home.

If you are remodeling your home you can always find a place for French Windows and Doors. Modern architects are placing French Doors and Casement Sash in every home. Let us assist you. Send us a rough plan and we will offer you suggestions as to how to remodel. A glance at the picture above gives you an idea of the beauty and distinctiveness that French Doors and Casement Sash add to a home.

A complete line of Hardware for French Doors and Casement Sash is shown on page 36.

The French Doors, No. E375, shown in cut at left are especially suitable for first floors and openings onto porches and verandas. These are carried in stock in both Veneered Plain Red Oak and Clear White Pine in 1¾ inches thick. Two sizes are shown, namely, 5 feet wide by 7 feet high, and 4 feet wide by 7 feet high, glazed both clear glass and best polished plate.

The French Windows shown here are particularly suitable for second floors and small bungalows and residences.

Furnished in Clear White Pine only, in two sizes, and are priced per pair. Are glazed with either clear double strength glass or polished plate. Thickness of window, 1⅜ inches.

The use of these Windows in Colonial and Queen Anne designs will beautify the plainest home. Even a gable sash will add a touch of refinement. There is no way in which a small amount of money can be used to better advantage than in the purchase of pleasing windows. Perfect taste is displayed in each design. Attractive glazing adds greatly to the beauty of your house.

We are actually selling these special windows at lower prices than the local dealer asks for the ordinary plain windows. This gives you a wide variety to select from and while they are not carried in stock, yet we usually ship these windows in from four to eight days, and if you are in a special hurry you can rest assured that your orders will have personal and prompt attention.

☛IMPORTANT.—In making up these lights the number of lights or divisions depend entirely upon the size of the window ordered.

**Sizes marked thus * are carried in stock, all glazed, ready for immediate shipment. On all other sizes our service is from 8 to 10 days.**

## Prices on Special Size Windows

Windows shown on this page can be furnished in special sizes if necessary. For price add one seventh (14%) to price of next larger stock size. For windows larger than any listed size, write for special prices Always order stock sizes when possible, and get immediate shipment. Special sizes cost more money, and require about ten days for shipment.

# Vast Stock of Windows at Cut Prices

**Quality Strictly Up to Highest Standard. All Styles. All Sizes. Made of Finest White Pine**

Our stock of windows is the largest and most complete in America. We sell in tremendous quantities direct from mill to consumers all over the United States at mill prices. We guarantee quality, safe delivery and absolute satisfaction. Our prices save you about 50 to 75%, freight included. We invite comparison and defy competition. We sell everything in windows and sash, including House and Store Windows, Attic Sash, Pantry Windows, Cellar Sash, Transoms, Barn Sash, Stall Sash, Hot Bed and Cold Frame Sash, Brooder Sash, Storm Windows, etc.

## Why Gordon-Van Tine Windows Are Best

### FINEST WHITE PINE

In all our windows and sash we use selected WESTERN WHITE PINE scientifically kiln dried and we wish to emphasize this fact to you.

Fifteen or twenty years ago the majority of all windows were manufactured from Wisconsin and Michigan White Pine, but as the output of the Northern White Pine decreased, manufacturers began to substitute other woods such as Spruce, Yellow Pine, Larch, etc.

There is no other wood that so closely resembles and so nearly takes the place of the Northern Pine as the Western Soft Pine. It resembles it in texture and withstands the ravages of the weather and takes paint just as well. Keep this fact in mind in ordering windows and comparing our price with prices of other manufacturers.

We use a very good quality of glass in all our windows. Our glaziers are experts and do their work with utmost care and skill.

All our windows and transoms are primed with linseed oil so they can be used for oil finish work or painted.

All sizes listed are carried in stock and we can ship PROMPTLY.

No. E 426. Two Lights, 1⅜ inch Thick.

**Prices on Special Sized Windows**

Windows shown on this page can be furnished in special sizes if necessary. For price add one-seventh (14%) to price of next larger stock size. For windows larger than any listed size, write for special prices.

Always order stock sizes when possible, and get immediate shipment. Special sizes cost more money, and require about ten days for shipment.

**QUALITY, SAFE DELIVERY AND SATISFACTION GUARANTEED**

You save money and insure prompt shipment by ordering stock sizes. Orders for special sizes require from one to two weeks. Write for free estimate on odd sized windows for special use.

## WINDOW AND SASH HARDWARE

### HOOK SASH LIFTS

Antique Copper Finish.
No. EH 32

Peavey, Idaho, Oct. 4th, 1916.

Gordon-Van Tine Co., Davenport, Ia.

Dear Sirs:—I wish to tell you that the order of windows, roofing, etc., which I ordered from you came in good shape and are perfectly satisfactory in every way. On my $39 order I saved about $31 or $32 which was about twice what freight cost. I was telling the man at our lumber yard about it the other day and he said the lumber trust or association, or some sort of combination had put you out of business. I do hope not. Please let me know as I want some more stuff right soon. Lumber dealers have a great graft in this new country. The window you sold me for 70c they sell for $1.75 here. A roofing inferior to yours at $4.50. All who build should know of and patronize you.

Yours truly, B. F. McPHERSON.

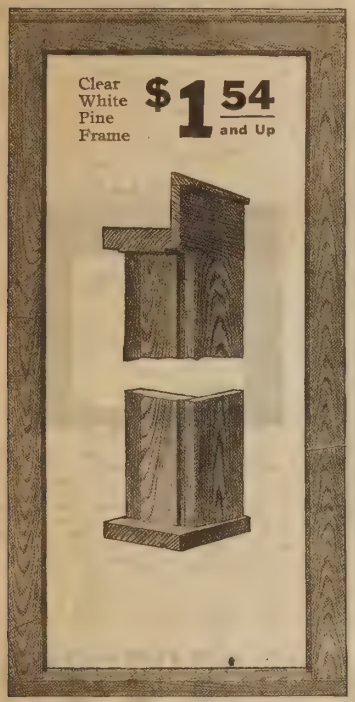
### BLINDS AND SHUTTERS FOR 8 AND 12 LIGHT WINDOWS

Take the same price as a two light or four light window having the same glass area. INTERMEDIATE SIZES take price of next larger size. If PANEL SHUTTERS are wanted Bead and Butt one side and O. G. Raised Panels one side add 20c net to No. E 508 which are O. G. Raised Panels two sides.

**Windows and Sash are manufactured of Soft White Pine, the very best wood for window use. White Pine is soft, takes paint or oil finish, and outlasts other woods. Keep this fact in mind when ordering.**

# Outside and Inside White Pine Door Frames



## PLAIN CAP DOOR FRAMES

Door Frames are carried in stock in sizes listed below. For smaller or intermediate sizes we ship next largest size, and jambs can be cut down and dadoed. All frames are shipped knocked down, one complete frame to a bundle consisting of side and head jambs, sill, outside casing, and drip cap.

SPECIFICATIONS

**⅛ inch Outside Casing.** Jambs 1⅜x5⅜ in. Rabbeted ½x1⅜ in. Sill 1⅜x7¼ in. Outside Casing ⅛x4½ in. Drip Cap ⅛x1¼ in.

**1⅛ inch Outside Casing.** Jambs 1⅜x5⅜ in. Rabbeted ½x1⅜ in. Sill 1⅜x7¼ in. Outside Casing 1⅛x4½ in. Drip Cap 1⅛x1⅜ in.

These frames made to receive 1⅛ in. Storm or Screen Doors. These Frames made for 2x4 sized studding.

### BOX WINDOW FRAMES

For Brick, Concrete or Stone Buildings, see net prices on opposite page.

SPECIFICATIONS

**E 926.** Brick Mould 1⅛x2 in. with beaded edge. Blind Stop 4⅝x4½ in. Pulley Stile 4⅝x4 in., fitted with pulleys and pockets. (This Pulley Stile is 5½ in. wide, including blind stop and inside lining.) Parting Stop ½x4⅝ in. Inside Box Lining 4⅝x4 inches, rabbeted for extension jamb. Back Box Lining 4⅝x4⅛ inches. Head Jamb 1⅜x4⅞ in., with 4⅝x1⅛ in. blind stop. Sill 1⅝x5⅜ in. Frames are for standard 9 in. brick wall with furring and lath, but can be used in a 13 in. wall, as inside lining is plowed to receive 4⅝ in. extension jamb. No arch boards or spring pieces are included, but can be furnished for 11c apiece extra per frame. The arch boards can readily be nailed right on top of the head brick moulding.

### ALL WHITE PINE FRAMES

Our Window and Door Frames are made of practically clear white pine, a few small sound knots being permitted. Builders everywhere say our frames are the finest they have ever used.

Window frames are carried in stock in Exact sizes, as shown and priced on opposite page. All Frames are shipped knocked down and are actual sizes as listed on opposite page. No further cutting or fitting is necessary.

When ordering frames give size of glass, and number of lights in window, also give opening size of window if possible.

All frames shown on this page are priced on next page.

### SASH FRAMES

**Sash Frame E 919**

Sash frames are carried in stock in following sizes only, bundled one complete frame to a bundle. For intermediate sizes these frames can easily be cut down by the carpenter on the job. They are made of Western white pine. Jambs are 1⅜x5⅜ rabbeted on outer edge, so as to leave room for hinge when sash are swung out. By nailing a stop on the jamb, these frames can also be used for sash which set solid or swing in.

Frames for cottage windows of sizes shown on Pages 34 and 35 take same list as two light sizes of same opening shown on this page.

Pockets and pulleys 20c extra per frame, excepting box window frames, which include pulleys. Double or twin frames, double the price of single frames plus 25c.

Prices on 4, 8 and 12 light frames not shown on this page, take price of next larger two light opening, plus 10c for cutting down. This also applies to two light windows not listed.

# Screen Doors, Screen Wire and Hardware

GET READY FOR FLY TIME

**Solid and Substantial—Made from the Best Lumber and Highest Grade Screen Wire**

## Screen Doors

In submitting to you our Screen Doors for this year, we offer three styles that are the result of years of experience. The styles are artistic and we know will meet with your approval. They have not that great amount of "gingerbread" work which is found on cheap screens sold by department stores.

These Screen Doors are manufactured with very wide side rails and heavy supporting rails. Our lumber is kiln-dried and yard-seasoned, insuring a first-class door which will not come loose at the joints and will last you for many years. When the wire wears out you can re-cover it yourself, as the moulding along the sides of the doors hold the wire in place, and by removing this moulding you ran replace the wire with the use of only a hammer

We use only the best "SCREEN" wire. The doors are put together with secret blind tenons, thus giving you a door that will hold in place and will not rattle and fall to pieces after a year or two of use. Do not compare doors 303 and 306 with the "cheap John" screen doors manufactured and sold by the average concern. We want to impress this upon you in every way possible. Confine your orders for Screen Doors as much as possible to sizes listed below, and we can make you prompt shipments, as we carry all these sizes in stock and can ship the same day that they are ordered.

No. E 501—Black Wire Cloth, Less than Roll Lots, price per square foot..... **2½c**

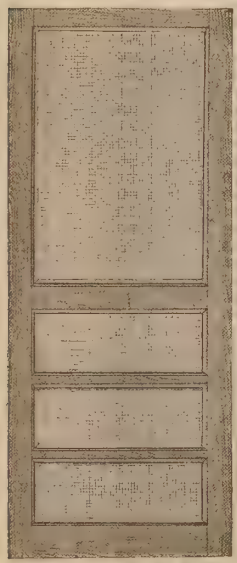
No. E 506—Galvanized Wire Cloth, Less than Roll Lots, price per sq. ft... **3c**

No. E 504—Copper Bronze Cloth, Less than Roll Lots, price per square foot..... **13c**

We carry only the very best screen wire cloth made and priced above in Black Wire Cloth, painted black standard twelve mesh to the inch and also "Copper Bronze" Screen Wire Cloth fourteen mesh to the inch and galvanized twelve mesh to the inch. There are all kinds of screen wire cloth sold, cheap and shoddy screen wire, and good substantial cloth. Keep in mind that we handle absolutely the best.

"Copper Bronze" Wire Cloth is a new product and we can recommend in no uncertain terms this cloth as the highest grade, longest wearing and best satisfaction of any cloth ever sold. Copper Bronze is an alloy of Copper, Aluminum and other metals combining the durability with the toughness and elasticity of Steel. Requires no painting or lacquer, making a wire cloth indestructible. In color it is a gold Bronze so delicately shaded as to render the cloth almost invisible.

The rolls contain 100 running feet. Order just what you want but note reduction in roll lots.



No. E 303. WHITE PINE

Price per square foot, outside measure:

Black wire—10c per square foot.
Galvanized wire—11c per square foot.
Copper Bronze wire—18c per square foot.

**No Half Screen is made up for less than 60c.**

## Our Screens are Built with MORTISE and TENON at every Joint. GUARANTEED not to Sag or Loosen Up.

No one item in building material has been so frightfully abused as Screen Windows and Doors. The cheap, shoddy screens that are offered to the public can hardly last one year. Such screens are manufactured from any kind of lumber just so they will hold together, and the poorest screen wire is used.

NOT SO with GORDON-VAN TINE'S screens. Special care is taken to select only the very best grade of WESTERN WHITE PINE specially kiln-dried and the lasting quality of White Pine is too well known to require argument.

We price below Window Screens in three kinds of wire, namely—Black Wire, Standard Twelve Mesh to the inch, Galvanized Wire, and Copper Bronze Screen Cloth which is absolutely the highest grade screen wire cloth ever manufactured. Copper Bronze Screen Cloth Fourteen Mesh to the inch. The wire is an alloy of copper, aluminum, and other metals combining durability with the toughness and elasticity of steel and requires no painting or lacquer, making a screen cloth practically indestructible. In color, it is a golden bronze so delicately shaded as to render the screens almost invisible. Our screens are 1⅛ inches thick, rails 2 inches wide, and are priced in Black Wire, Galvanized and Copper Bronze. Shipments can be made from four to six days after receipt of order. Screen manufacturers usually paint their screen windows in order to cover up poor material used.

Full Sized Cottage Window Screen.

### Screen Window to Fit Cottage Window

All modern houses are equipped with window screens and these can be interchanged with storm sash by the use of our patent hangers No. 53, shown on page 36.

Gordon-Van Tine's Matchless window screens are made from clear White Pine, 1⅛ inch thick.

Screens listed on this page can be furnished in 4 to 6 days.

All screens are made 1½ inch longer than window size given.

| Bottom Glass | Top Glass | No. Lts. | Size of Opening ft. | in. | ft. | in. | Price with Blk Wire | Price with Gal Wire | Price with Cop Bronze |
|---|---|---|---|---|---|---|---|---|---|
| 40x40 | 40x14 | 2 | 3 | 8x5 | 0 | | $1.44 | $1.54 | $3.14 |

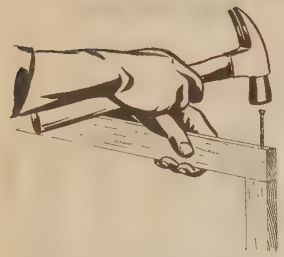
### Prices on Odd Size Screen Windows

If you need a screen of special size, add one-seventh (14%) to the price of next larger stock size. For screens larger than any listed size, write for special prices.

Always order stock sizes when possible. Special sizes cost more and require about ten days for shipment.

# Make Your Own Window Screens FROM READY-TO-USE STOCK

## A Money Making "Side Line" for Carpenters and Handy Men--All Ready to Put Together



Showing How Corner of Screen is Nailed Together

When "fly time" comes everybody wants Window Screens, and wants them QUICK! Here's a new and novel idea that has made a big hit with wide-awake carpenters and builders. We conceived the scheme of furnishing all the materials for making **Window Screen Frames in strips,** ready to cut to any desired size. This saves all the **trouble** and much of the **expense** incidental to making Screens. A carpenter or handy man can easily make up about six to ten Window Screens in an hour by using our **Ready-To-Use Window Screen Stock.** Many of our customers did a rushing Window Screen business last season at a nice profit.

In making Window Screens we recommend **entire Screens** to cover the whole window, putting them in the same as storm Windows. If frames are made in this way, the slides and grooved stiles are not needed. The **Top Rail** can be used for sides, top and middle rail, if desired. Price is per 100 lineal feet, random lengths. Specified lengths 10 per cent extra.

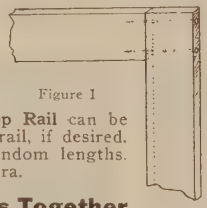


Figure 1

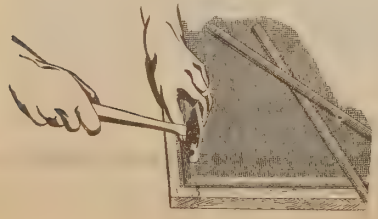
### How to Put the Screens Together

Having decided on the opening which you wish to fill with a screen, cut the three cross rails the width of the opening minus the two side rails; then take one side rail and place it at right angles to your three cross rails and nail with No. 10 wire nails through the side rails into the cross rails. Now reverse the part of the screen nailed together and nail on the other side rail. (See Figure 1.)



Showing How Screen is Applied After Wiring

After having put together all of your screens in this manner (see Figure 2) you are now ready for your wire.

Figure 2.

Figure on leaving a margin 3/8 inch to 1/2 inch all around the opening, as shown by Figure 3. Begin by nailing your wire at the top with an 8-ounce flat-head tack. Then roll your wire the length of the opening and stretch it down the center, tacking it there immediately, then nailing from the center of the bottom rail to the side rails, and finish by nailing the wire up and down the side rails.

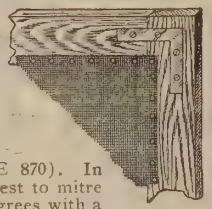


Fig. 3—Showing How to Apply Corner Iron.

After having wired all of your screens in this manner, you are ready to apply the Screen Moulding (E 870). In order to make a neat job it is best to mitre the corners at an angle of 45 degrees with a pocket knife. Apply the two pieces on the side rails first, and then fill in the three pieces on the cross rails. If a little care is used in doing this work you will have a job superior to 98 per cent of the screens sold by department stores.

### Special to Carpenters and Contractors

This is a great chance for carpenters to compete with planing mills, and not only make their screens much cheaper, but get them out in practically a moment's notice. You can put in stock a few hundred feet of each of the items shown and it is then no trick for you to turn out window screens quickly and at a price that you could not buy the material for in the rough. We will give you an idea of how cheap you can put in such stock. Take for instance, the material needed to manufacture 25 screens an average size of 2-light, 20x28, the material to make these would take the following:

| | |
|---|---|
| 400 ft. Top Rail, for top and side rails (E 297) at 99c per 100 lin. ft. | $3.96 |
| 50 ft. Bottom Rail (E 296) at $1.49 per 100 lin. feet | .75 |
| 500 ft. Screen Moulding (E 870) at 35c per 100 lin. ft. | 1.75 |
| TOTAL | $6.46 |

Making the Average Cost for Material per Screen **26c.**

### Inside Corner Braces

No. EH 373

These Corner Braces are to apply to inside corners in order to strengthen and brace the screen. Are made of plain wrought steel.

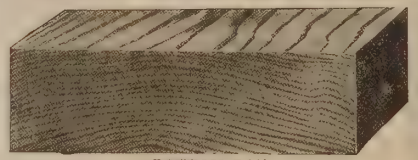
| Each Side | Width | Price Each | Price per Doz. |
|---|---|---|---|
| 2 inches | 5/8 inch | 3c | 20c |
| 3 inches | 3/4 inch | 3c | 30c |
| 4 inches | 7/8 inch | 5c | 50c |

## Window Screen Stock White Pine

This Screen Stock is made of thoroughly kiln-dried stock, smoothly run. The sizes are standard widths for screen use and the dimensions are shown below the sections. In making screens, we recommend full window screens to cover the whole window, and you will not need the grooved stiles and slides. All the material you will need for full sized screens is Top and Side Rail (E 297), Botton Rail (E 296), and Screen Moulding (E 870). In case you want half screens you will need both grooved Stile (E 298) and Slide (E 300). The prices are per 100 running feet, in random lengths. Specified lengths, 10 per cent extra.

TOP RAIL AND SIDE RAIL

GROOVED STILE



BOTTOM RAIL

### For Screen Windows 7/8 Inch Thick

| | |
|---|---|
| Top and Side Rail E 297 Size 3/4 x 1 3/4 inches, per 100 lineal feet | $0.99 |
| Bottom Rail E 296 Size 3/4 x 2 3/4 inches, per 100 lineal feet | 1.49 |
| Grooved Stile E 298 Size 3/4 x 1 3/4 inches, per 100 lineal feet | .99 |

(Grooved Stile is used only on half screens.)

## Wrought Steel Corner Irons

| Weight about | Length of Sides | Width of Sides | Price Each | Price Per Doz |
|---|---|---|---|---|
| 2 1/2 ounces | 2 inch | 3/8 inch | 1 1/2c | 15c |
| | 2 1/2 inch | 1/2 inch | 2c | 18c |
| | 3 inch | 5/8 inch | 2c | 25c |
| | 3 1/2 inch | 3/4 inch | 3c | 27c |

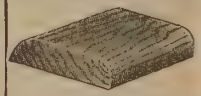
No. EH 137

WROUGHT STEEL

### Screen Moulding



No. E 870. Size, 1/4 x 5/8 in. Price **35c**

Screen Moulding is necessary on both full and half window screen. It is put on around the screen wire and holds the wire in place and covers the edges.

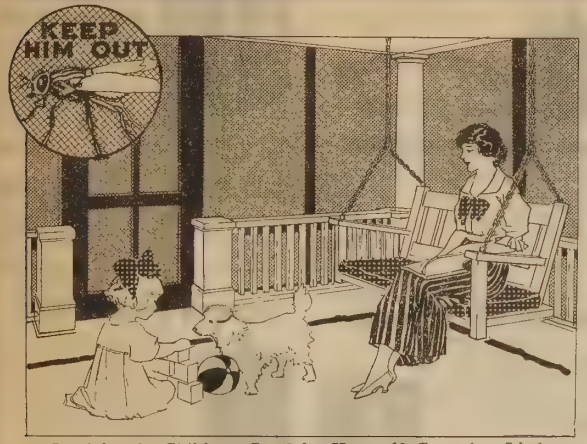
### SLIDE

No. E 300. Size, 1/2 x 1 1/8 in. Price **50c**

This slide is used only on half window screens and fits into the groove shown in Grooved Stile.

# SCREEN IN YOUR PORCH—ADD ANOTHER ROOM

## YOU'LL NEVER REGRET IT. IT'S WORTH ITS COST EVERY YEAR



Good for the Children, Good for Yourself, Costs but Little

Another room and unlimited comfort added to your home through the use of screens on your porch.

The cost question is entirely within your hands, as we manufacture the screens to your special requirements and you can screen in all or part of your porch as you see fit.

A modern comfort you cannot afford to be without when you realize that it serves a twofold purpose—**summer living room** during the day—**sleeping room** at night.

Screens are made of 1¼-inch thick **Western White Pine Lumber,** dressed and sanded two sides in sections suitable for handling and storage in winter season. The sections are carefully mortised, tenoned and pinned together with steel pins, and wired with our best wire cloth—standard 12 mesh to the inch—painted black two sides, or our high grade **Galvanized or Copper Bronze** wires.

We recommend that screens be fitted on outside of porch columns for the reason that this permits all square corners, obviating any fitting around the mouldings of columns and rails as is necessary when screens are placed on the inside of the columns.

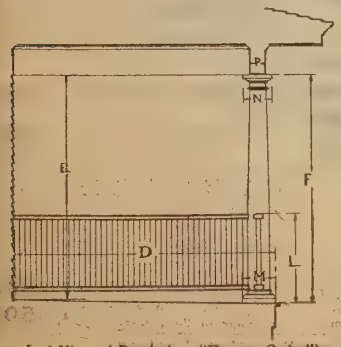
Your Whole Family Will Enjoy the Screened-In Porch

### HOW TO ORDER

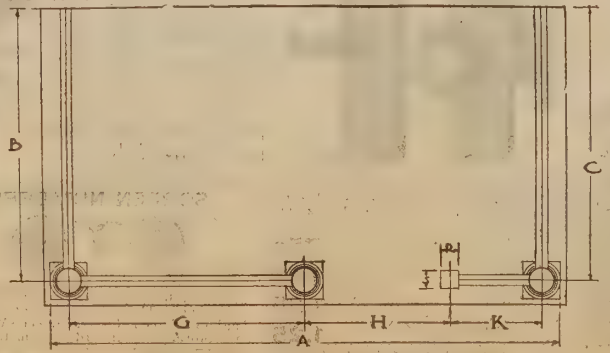
Make a rough sketch similar to floor plan shown on this page indicating house lines and number of columns and posts as well as entrance to porch. Give width of porch from face of house line to center of column. Give length of porch from center to center of end columns, also indicate the size of the square members of the base and cap of columns. Give height from floor to top of porch rail so that cross rail can be placed at proper height. The slant or pitch of porches varies in different sections and for this reason it is advisable to give the height from floor to boxing at both house line and outside of porch as indicated by lines E and F in cross section.

As further check on measurements it is advisable to give distances from center to center of each column or post as indicated by lines G, H and K on floor plan.

If the different porch sections are desired rabbeted at joints order must so state, as extra allowance must be made for the rabbets.

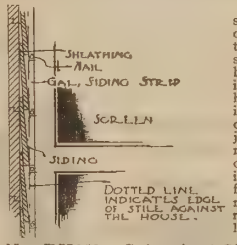


End View of Porch (see "How to Order").

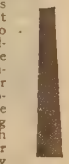


Floor Plan of Porch (see "How to Order")

## GALVANIZED SIDING STRIPS



Where wall sections fit against beveled siding of house we recommend the use of our Galvanized Siding Strips, as it makes tight joints with very little labor and at small cost. These siding strips are cut to bevels suitable for both 4 and 6 inch siding. When section of screen against house has been fitted to porch, apply the galvanized siding strips, beginning at the floor of porch and fitting one strip to each projecting bevel of siding. The strips are made of such a length that each succeeding one laps over the one immediately beneath it. They can be readily nailed to stile or frame of screen, and, once applied, they need not be removed, as they form a permanent part of the screen. Size 5 inches long, ⅜ inch at top, ½ inch at bottom.



No. EH 350

No. EH350. Galvanized Siding Strips. Price ea..1¼c Per doz. **15c**

## PRICES ON PORCH SCREENS

Prices are made per running or lineal foot and are based on sections averaging from three to four feet in width. All porch screens up to and including 8 feet high are figured at the 8 foot height. Intermediate heights are figured at the next highest height.

| PRICE PER LINEAL OR RUNNING FOOT | Black Wire No. E 365 | Galvanized Wire No. E 366 | Copper Bronze Wire No. E 367 |
|---|---|---|---|
| 8-0 high | **$0.75** | **$0.84** | **$1.16** |
| 9-0 high | **.84** | **.95** | **1.32** |
| 10-0 high | **1.03** | **1.16** | **1.62** |

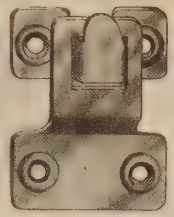
Rabbeting per section 20 cents each extra.

Special prices are made where a large number of narrow sections or extra wide sections are required.

# Screen Hardware of Every Description

## SCREEN WINDOW HANGER

Screen Window Hangers are indispensable. Can be easily hung or removed from either inside or outside; all you have to do is hook or unhook. No wind can rattle or blow them off. Can be interchanged with storm windows. Price includes two pair hangers and necessary screws. Price per pair... **10c**



No. EH 53.

If only the hanger part that is screwed to the screen is desired, order ½ hanger. Price, 6c.

If sent by mail add 4 cents for postage.

## EXTRA HEAVY SCREEN HANGER

Extra heavy, japanned, wrought steel, easily applied and cannot be blown off. Screens can be removed and storm sash put in their place without changing hangers. Sash or screens can be put on or taken off from within the house.

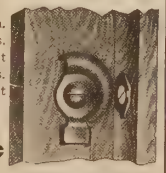
No. EH **3187**. Price per pair complete with screws..... **14c**

If only the hanger part that is screwed to screen is desired, order ½ hanger. Price, 8c.

If sent parcel post add 4c for postage.

## SCREEN WINDOW FASTENER

Locks screen. Swings from hinges. Japanned wrought steel, 1⅝x1⅜ inches. With screws. Weight about 2 oz.



No. EH **136**. Price each... **6c**

## SCREEN WINDOW LIFT

Cast Iron, Amber Bronze. Size 1¾x9/16 inches. With screws, weight each 2 oz.

No. EH **2368**. Price each **2c**

Price per dozen..... **20c**

## SCREEN DOOR RIM CATCH

For screen doors opening out, from ⅞ to 1⅛ in. thick. Made in steel. Wt. per set 20 oz.

No. EH **301**. Antique copper finish, complete with screws. Price each..... **60c**

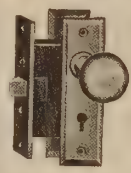
No. EH **302**. Dull brass finish, complete with screws. Price each..... **60c**

## SCREEN DOOR CATCH

Works automatically, suited for any door up to 1½ in. thick; holds door tightly closed. With screws, wt. about 5 oz.

No. EH **2465**. Japanned. Price per set..... **19c**

## SCREEN DOOR LOCK AND LATCH SET



For doors up to 1⅜ in. thick. With latch key to open from outside when locked. Wrought bronze trim. Latch 3⅜ x2¼ in., two keys, one set in a box with screws. Wt. per set 2 lbs.

No. EH **2461**. Antique copper. Price per set..... **$1.75**

No. EH **2462** Dull brass Price per set..... **$1.75**

## SCREEN DOOR CATCH

For doors 1⅛ in. thick, opening out. Size 2¼x1⅞ in. Reverse bevel, angle switch, escutcheon 2⅛x1 with screws. Wt. per set 12 oz.

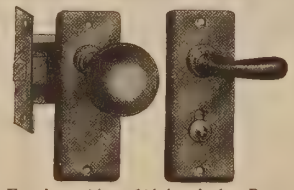
No. EH **2463**. Price per set..... **20c**

## SCREEN DOOR CATCH

Case comes flush on door jamb. Strike adjustable. Easy to set. Size 3½x1¼ in. With screws. Wt. each 4 oz.

No. EH **2464**. Wrought steel Japanned. Price per set..... **19c**

## SCREEN DOOR LATCH



For doors ⅞ to 1¼ in. thick. Reversible for door opening in or out. Latch 1⅜ x1¾ in. Wrought face, back set 1¼ in. Screws furnished. Wt. about 19 oz. per set.

No. EH **134** Antique copper finish on steel..... **75c**

No. EH **135** Dull brass finish on steel..... **75c**

No. EH **325** Antique copper finish bronze..... **1.25**

No. EH **326** Dull brass finish bronze..... **1.25**

## SCREEN DOOR SET

Complete screen door set, including two 3-inch hinges; pull spring, hook and eye. Complete with screws. Wt. 16 oz.

No. EH **49**. Japanned finish. Price per set complete..... **20c**

No. EH **49½**. Dull Brass. Price per set..... **22c**

No. EH **49¾**. Old Copper. Price per set..... **22c**

## SCREEN DOOR HINGE

HALF SURFACE

Bommer adjustable tension, enclosed spiral spring, size 3 in. Excellent hinge for screen door. Spring best oil tempered steel, with screws, wt. per pair 28 oz.

No. EH **2651**. Antique copper. Price per set ..... **$1.10**

No. EH **2652**. Dull brass Price per set ..... **$1.10**

## SCREEN DOOR HINGE

This is the best screen door hinge possible to buy. Has adjustable tension and entirely closed spiral hinge. Size 3x3 in. Complete with screws, wt. per pair 28 oz.

EH 116-117

No. EH **116**. Antique copper. Price per pair..... **$1.10**

No. EH **117**. Dull brass. Price per pair..... **1.10**

No. EH **346**. Antique copper on bronze. Price per pair..... **2.25**

No. EH **347**. Dull brass on bronze. Price per pair..... **2.25**

## SCREEN NUMBERS

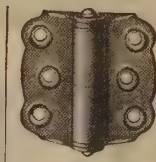
These numbers are made of copper with depressed black numbers, points about ½ inch long. These numbers are used for marking Screen Doors, Screen Windows and Storm Sash in order to match them up and keep track of where each belongs. The numbers come in pairs, one for the sash, the other to be put on casing or frame.

They are sold in packages of 25 pairs. Buy these numbers and save yourself hours of trouble.

No. EH **292**

Packages 1 to 25, price per package of 25 pairs..... **50c**

Packages 26 to 50, price per package of 25 pairs..... **50c**



## SCREEN DOOR HINGE

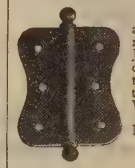
Single acting Bommer hold back, 2¾x 2¾ in. Wrought steel, with screws, wt. per pair 20 oz.

No. EH **2648**. Japanned. Price per pair..... **15c**

No. EH **2649**. Antique copper. Price per pair..... **30c**

No. EH **2650**. Dull brass. Price per pair..... **30c**

## SCREEN DOOR HINGE



This butt is ball tipped and reversible for either right or left hand doors. Japan polished. This butt does not have to be mortised into the doors, and the price includes screws. Wt. per pair 12 oz.

No. EH **59**. Size 3x3 in. Price per pair, with screws..... **13c**

## SCREEN DOOR CHAIN BOLT

Reversible bolt. Can be changed from regular bevel to reverse bevel by turning rod. Size 2x1¾ in. Length of chain 12 in. With screws, wt. 5 oz.

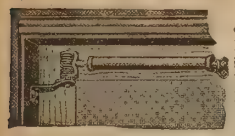
No. EH **2520**. Antique copper. Price per set..... **28c**

No. EH **2521**. Dull brass. Price per set..... **28c**

**A full line of screen wire shown on page 46, including black wire, galvanized wire and copper bronze wire, all at greatly reduced prices.**

# Screen Hardware at Half Dealer's Prices

## SCREEN DOOR SPRING AND CHECK



Designed especially for screen doors. Has adjustable spring. Easily regulated. Size 10x1¼ in. Polished and lacquered. Wt. about 3 lbs.

No. EH **2624**. Price per set, complete with screws ..... **$1.35**

## SCREEN DOOR CHECK

Door is checked 3 in. from closing point and then allowed to shut noiselessly. 2⅜ in. black rubber bumper. Weight about 4 oz.

No. EH **2627**. Price each..... **11c**

## SCREEN DOOR CHECK

No slam. Attach to panel of door. Prevents slamming of screen door; 1¼ in. solid rubber ball. Nickel plated trimmings; length 5 in. Wt. 6 oz.

No. EH **2626**. Price each..... **28c**

MISSION Design Head Casing.

GORDON-VAN TINE & CO.,
Davenport, Iowa.

Dear Sirs—I received today the Mouldings, etc., which I ordered from you about a month ago. The goods are as you claim and above my expectations. I find that after paying freight and duty I make a big saving to what I would have to pay for the same material here in Niagara Falls, Ont. Thanking you for being so punctual and, as the custom official remarked, "the business way in which you transact and fill out custom reports." Respectfully, SAMUEL STUCKEY, Niagara Falls, Ont., Canada (Box 340).

This is mission design or square edge door and window casing. It is the most modern design and withal simple and plain.

This head casing can be used in connection with any of the casings shown on page 61 as side casings or the square edge Head Casing No. E-8394, ¾x4⅝, can be used as side casings.

Illustration just above gives you an idea of how this square edge Head Casing should be used.

We carry this Head Casing in Yellow Pine and Plain Red Oak. Price is per 100 lineal feet in random lengths from 8 to 16 feet. Specified lengths 10 per cent extra. Can also be used for square edge Base Blocks.

No. E-8400½. Head Casing; size, 1⅛x5½ inches.

| | |
|---|---|
| Yellow Pine | **$4.16** |
| Fir | **4.24** |
| Plain Red Oak | **8.91** |

## SLIDING AND FOLDING DOOR ASTRAGALS

No. E 8446

### Sliding Door Astragal

This astragal is two-member and is for inside sliding door, and is necessary to make a tight joint when doors are closed. An astragal adds greatly to the general appearance. We furnish these astragals in 8 feet lengths only, and they can be cut down to fit size of door. In ordering give thickness of doors.

YELLOW PINE
For 1¾ in. and 1⅜ in. doors, 8 ft. lengths. Per pair.. **55c**

RED OAK
For 1¾ in. and 1⅜ in. doors, 8 ft. lengths. Price per pair ..... **90c**

No. E 8449.

### Folding Door Astragal

This Astragal is called a single "T" Astragal, and is used for double folding doors. The astragal is nailed to the face of one of the doors and forms a rabbet or shoulder against which the other door can swing. We furnish this astragal in 8 ft. lengths only, as they can be cut down to fit size of door.

Yellow Pine, for 1¾ in. doors, 8 ft. lengths. Price each, **45c**

Red Oak, for 1¾ in. doors, 8 feet lengths. Price each, **80c**

## WINDOW STOOLS and APRON

Yellow Pine...$1.76
Fir..... 1.93
Red Oak..... 3.44

**Guantanamo, Cuba, Feb. 3, 1916.**

**Gordon-Van Tine Co., Davenport, Iowa.**

**Gentlemen:—Yours of the 3rd ult. merited an immediate reply. I had to be out of town most of January, therefore could not get to my desk earlier. As to my dealings with you am glad to say that we have found material and workmanship up to your professions and the treatment as to shipment all we could ask. I am manifesting my satisfaction by recommending your firm to the largest buyer in our town—The Guantanamo Sugar Co., who have sent you already a trial order for some sash. Yours truly,**

**H. B. BARDWELL.**

## MOULDINGS

MOULDINGS shown on this page are especially for Interior Finish and are selected from woods that take Natural Oil Finish, Stain, Paint and Enamel. Please remember that the prices are on random lengths, from 8 to 16 feet. Special lengths, 10 per cent extra. Charges are for even feet—for instance, a piece 6 ft. 10 in. would be charged as an 8 ft. piece.

## SIDES OF DOOR AND WINDOW TRIM

See pages 56 and 57 for prices on Complete Door and Window Trim. These prices will save you much time and considerable money.

# Window Trim—Complete—No Waste—44c and up

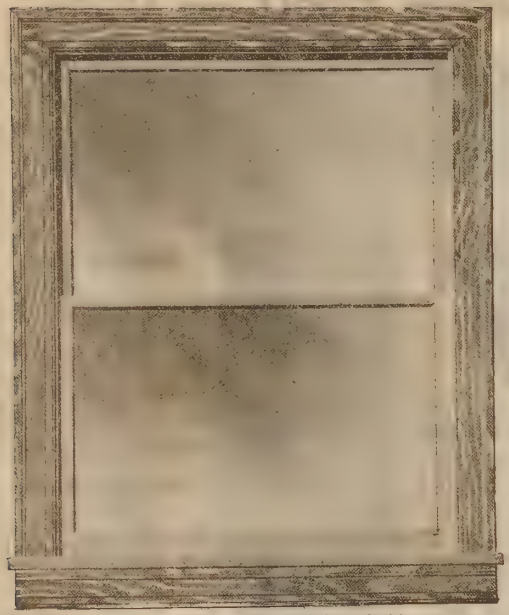

Photo showing complete window trimmed with our California design in Douglas Fir. This shows exactly how the window will look, all finished.

## TRIM ALL READY TO USE

Window Trim is carried in Oak, Yellow Pine, White Pine and Fir as shown. There is no waste nor chance of mistake in ordering. It saves you time and trouble. We cut all parts to proper lengths, allowing for trimming and fitting.

Window Trim consists of Side Casing, Head Casing, Cap Mouldings, Stool, Apron and Blocks (where shown in photo) as illustrated. Window Stops are also furnished. In comparing prices remember that we furnish Window Stops and that Casing is full width; many others furnish you with Casing only 3⅝ inches wide and include no Window Stops.

In ordering Inside Window Trim state number of sides wanted, giving style of trim, kind of wood and size of window. Remember you need only one side of inside trim for each window.

All trim here quoted is **complete with stops.**

**Each window requires only one side of Inside Trim.**

# Door Trim—Six Designs—No Waste—38c and up

There is no waste, when you order your Trim as shown below, neither is there any chance of mistake. It saves time and bother. We cut all parts to the proper lengths allowing liberally for trimming and fitting.

We carry Door and Window Trim in Oak, Yellow Pine and Washington Fir in designs as shown on this page.

Door Trim consists of side casing, head casing, cap mouldings and corner and head blocks (where shown on photographs.)

Don't confuse our Trim with many other manufacturers who furnish narrow casing and skimp on all measurements.

All Trim is carefully bundled; if you wish we will wrap all Trim in paper for 5 cents per side of Trim extra.

This photo illustrates our 3-panel fir door with "Colonial" trim. This shows exactly how door will look all finished.

In ordering Trim state number of sides wanted, giving style of trim, kind of wood and size of door.

Order your sides of Door Stop extra, prices given at bottom of page.

Messrs. Gordon-Van Tine Co.,
Davenport, Iowa.
Gentlemen: Material ordered from you came today, and is the best and cheapest bill of goods I have ever bought. I am sure I saved 50 per cent on the bill.
I do not write this as a testimonial, only to express my appreciation.
Hoping to do business with you in the future, I beg to remain,
Very truly yours,
THOS. W. HORNEY.

# Ready-Cut Green Houses and Conservatories at Half Usual Price

## $109.50

## Build Them Yourself---No Tool But a Hammer

Know the pleasures of winter gardening—have fresh, crisp vegetables, luscious fruits and beautiful flowers all the year around. Not only that, but you actually **save money.** Your saving in groceries alone will pay for a Gordon-Van Tine Greenhouse or Conservatory in a little while.

The price is so low **any man** can buy it, and the first cost is the **only** cost, for you can erect it **yourself.** Everything comes all cut and fitted. You won't need any tool but a hammer. Our complete plans show where every piece goes and our directions tell you just how it should be set. It's unbelievably simple.

Note the photographs carefully. See the beautiful paneled sides—not the usual cheap siding. This is a rich effect heretofore only obtainable in the highest priced greenhouses. All the panels are fitted and ready to nail up. All sash are **Clear Red Cypress,** the Wood Eternal. It will never rot nor decay. All glazed with clear glass.

Everything is furnished—sash glazed, doors, lumber, hardware, nails, paint—everything. And **every item is guaranteed.** Gordon-Van Tine means **satisfaction or money back.**

Gordon-Van Tine Ready-Cut Greenhouse

A **real** greenhouse, which in details of construction, workmanship and materials is not excelled by far more expensive houses. It is distinguished in appearance, and will harmonize with the most elaborate surroundings.

Absolutely no sawing nor glazing to be done. Everything is cut and fitted at our factory. Below the sash the sides are **paneled.** This rich effect has heretofore been obtainable only in the highest priced greenhouses—it gives the house a most beautiful trim appearance—makes it worthy to grace any estate.

The price is 30 to 50 per cent **lower** than that quoted by any other manufacturer on the uncut material. And in addition to this, is the saving you make in construction costs. **You can put up a Gordon-Van Tine Ready-Cut Greenhouse yourself.** It all goes together without a stick to be sawed, or a pane to be glazed. Not a tool on the job but a hammer.

Everything is included to construct the building, sash glazed, doors, lumber, hardware, nails, paint, etc., and it's all **guaranteed** in quantity and quality.

The **Ready-Cut Greenhouse** is manufactured in four sizes, all 10 feet 8¾ inches wide, and ranging in length from 12 feet 4½ inches to 24 feet 6¾ inches, in units of about 4 feet each. It can also be furnished in any additional lengths in multiples of 4 feet ¾ inch.

Our greenhouses are so constructed that the roof sash may be adjusted to allow just the right amount of overhead ventilation. The transom in front is equipped with a convenient attachment for adjusting, and there is no danger of direct draft.

### Prices on Ready-Cut Greenhouse

Complete, including everything required for the construction of this building, sash glazed, doors, hardware, lumber, nails, paint, etc.

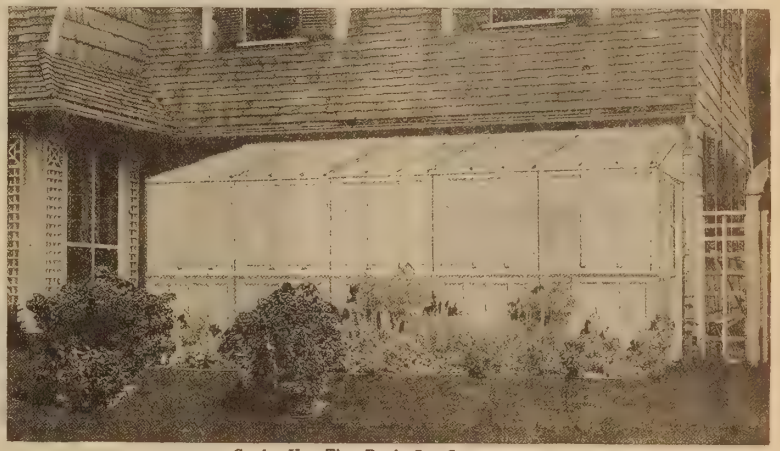
| For each additional 4 feet or part add | **1.50** |

Prices on Standard Greenhouse Material, such as sash bars, ridge bars, gable rafters, sills, glass, etc., are listed in our Greenhouse Catalog.

Prices on Heating Equipment for Greenhouses and Conservatories furnished on application.



Gordon-Van Tine Ready-Cut Conservatory

The materials, construction and workmanship of this lean-to are exactly the same as on our famous Ready-Cut Greenhouse shown above. It is furnished in four sizes, all 5 feet 11⅜ inches wide, and ranging in lengths from 8 feet to 20 feet, in units of four feet each. It can be furnished in any additional lengths in multiples of 4 feet.

## $40.50

This Conservatory is intended to be constructed against another building, and thereby save the cost of a separate heating plant by piping the warm air from the furnace or the hot water from the boiler, either at a minimum expense.

Its beautiful appearance, distinguished by the paneled sides, will harmonize with any building against which it may be placed. Any man can put it up in a day. It's **guaranteed** in every way—quality, quantity and construction.

### Write for Our Greenhouse Catalog.

We also have larger sectional houses with ventilating apparatus, etc. Also heating plants for greenhouses. Write for our greenhouse catalog. It tells you more about the houses shown on this page, and includes many other greenhouse items and larger houses. Standard Greenhouse material, sash bars, ridge bars, gable rafters, sills, glass, etc. Get this Free Catalog.

Full Line of Window Glass Shown on Page 38.

## Hot Bed Frame with Glass Front

**Here is an absolutely new and practical Hot Bed Sash Frame.** The front or south wall is made of glass, as shown in illustration, and allows more light and consequently more growing space in the frame. The sash can be let down, giving ventilation. The shade from south wall causes a loss of growing space of from 5 to 7 inches. By using glass you add just that much more to your frame.

The frames are built of 1¼-inch thoroughly seasoned cypress. Depth of front is 8 inches, depth of back 16 inches. For full description see reading top of first column. Frames are furnished for 2 and 4 hot bed sash in both 3 feet by 6 feet and 3 feet by 4 feet sizes.

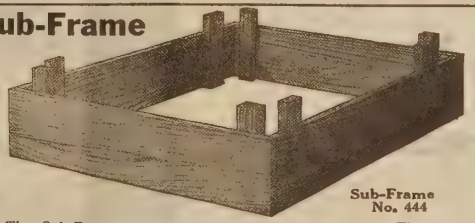
| No. E 548. | Frame for 2 sash, 3 feet by 6 feet with sash front | $6.60 |
| No. E 549. | Frame for 4 sash, 3 feet by 6 feet with sash front | 9.90 |
| No. E 542. | Frame for 2 sash, 3 feet by 4 feet with sash front | 5.15 |
| No. E 543. | Frame for 4 sash, 3 feet by 4 feet with sash front | 8.25 |

*Above price is for Hot Bed Frame and lower 3 light Front Sash ONLY and does not include Hot Bed Sash —See opposite page for prices on Hot Bed Sash.*

## Sub-Frame



Sub-Frame No. 444

The Sub-Frames are made for two 3x6 foot sash. The frames are made of durable two-inch lumber, with very strong corner posts. The depth of the frame is 18 inches. As every hot bed requires a sub-frame, you will probably find it more convenient to order them with your sash and other frame and have them come to your place at the same time and be all ready to set up.

**PRICE**—Sub-Frame (below ground) for two 3x6 foot sash (without sash), as described above, complete, each..... $3.95

No. E 8436 Gable Rafter

The Gable Rafter is manufactured from thoroughly kiln dried clear Cypress, smoothly machined. Carried in stock in the following lengths: 6, 7, 8, 10, 12, 14 and 16 ft. Size of Rafter, 1¾x2¼ inches. 3¾c

Price per running foot.

## IMPORTANT!! READ!!

It may interest you to know that Gordon-Van Tine numbers among its customers many of the best known people in America. Here is an order from William Rockefeller for his country estate at Bay Pond, New York. Certainly Mr. Rockefeller, a man worth many millions, knows quality and can afford to pay for it.

26 Broadway, New York,
March 20, 1914.
Order No. 3-12.

Gordon-Van Tine Company,
Davenport, Iowa.

Ship to
Mr. William Rockefeller,
Franklin County, Bay Pond, N. Y.

36 Hot Bed Sash No. E-441, size 3-0x6-0, 1¾ thick, glazed double strength.

Via freight, NYC&HR R. R.

Charge to Wm. Rockefeller,
No. 26 Broadway, New York.

New Haven, Conn., Jan. 4, 1913.

Gordon-Van Tine Co.

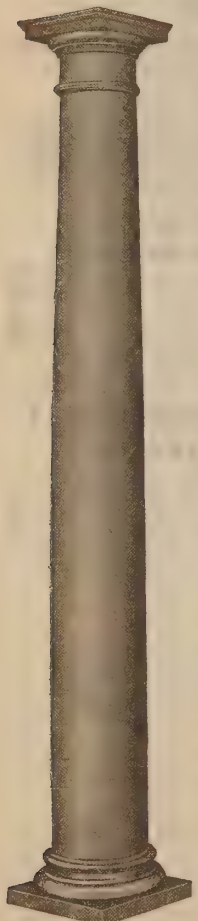
Gentlemen:—What little gardening I do is for pleasure only, and the four hot bed sash which I bought from you last season I use on my cold frames for pansies, etc., and for hot bed; also one on a small patch of strawberries, to have a few early berries.

The sash arrived in good condition. I painted them two coats of white on the under side and two coats of dark green on the upper side, same as the frames, and I now have a neat looking outfit for early flowers, fruit and vegetables.

Yours respectfully,
M. C. DINGWALL.

# BEST GRADE COLONIAL BUILT-UP PORCH COLUMNS $1.44

## Made of Specially Selected Cypress. With Our Own Special Lock Joint



No. E 322
Colonial Built-up Column
Cypress, Plain Cap

## Colonial Lock Joint Built-Up Porch Columns

The above illustration shows an end view of our Lock Jointed Built up Column; note how the staves interlock. This process prevents columns coming apart. Experience has proven to Master Builders that Solid or Bored Columns are not practical on account of checking. Gordon-Van Tine Columns are built to last. Cypress is the only wood we use in contructing our Lock Jointed Built-up Columns.

### PRICES COLONIAL COLUMNS

| Diameter of Shaft at Base | Height Over All | No. E. 322 with Plain Cap | No. E. 323 with Comp's'n Cap | Weight of Column |
|---|---|---|---|---|
| 6 x 6 | 8 feet | $1.44 | $2.19 | 33 lbs. |
| 8 x 8 | 8 feet | 1.85 | 2.65 | 46 lbs. |
| 8 x 8 | 9 feet | 2.08 | 2.88 | 50 lbs. |
| 10 x 10 | 8 feet | 2.49 | 3.59 | 62 lbs. |
| 10 x 10 | 9 feet | 2.83 | 3.93 | 66 lbs. |
| 12 x 12 | 10 feet | 5.10 | 6.50 | 75 lbs. |

## WHY CYPRESS IS BEST

Your Carpenter or Architect will tell you that Cypress is the only wood that will not rot when exposed to the weather. It is the ideal wood for built-up columns. Our columns are manufactured of special yard dried Cypress and though Cypress is more expensive than any other woods used, it makes a column that will stand all kinds of weather conditions. Insist on Cypress Built-up Columns.

**FOR DIVIDING OR SPLITTING THESE COLUMNS ADD 10 CTS.**

Three distinct styles of Porches can be built with the above columns:

COLONIAL (Columns Nos. E. 322 and E. 323)
MISSION (Nos. E 334 and E 335)
CRAFTSMAN (No. E 320)

The latter are especially adapted for Bungalow type homes. Any one of the styles is modern and beautiful as well as lasting.

Our Colonial Built-up Columns shown on this page are all made of Cypress—the best wood that grows for making columns. They are constructed to withstand all weather conditions.

Our columns are protected by strips in shipping, in order to prevent damage. We guarantee safe delivery.

You should apply a good priming coat as soon as you receive columns so as to keep out moisture.

# Modernize Your Home With an Up-to-date Porch

**Every Dollar Spent on a Porch Multiplies Itself Ten Fold—Beautify Your Home**

## Turned Column 50c

For dividing this Column, add 5 cents.

While the Colonial Columns and Newels are made of Cypress, which, as we before stated, is the most durable wood in staved work, yet on solid turned porch Columns and Newels the only wood that gives satisfaction is Washington Fir. Please keep in mind that Fir will take paint as well as White Pine and will last indefinitely longer. It is not affected by climatic conditions and is the most perfect wood for turned work.

Turned Column No. E **324**

# Compare These Low Prices on Guaranteed Stair Work

## Our Stock Designs

View of Mr. Behymer's Stairs

**Read What This Customer Says:**

Shelbyville, Ill., Feb. 1st, 1913.

GORDON-VAN TINE CO.,
Davenport, Ia.

Dear Sirs—Sent you today under another cover, photograph of the very unique stairway that your firm made by my order for K. A. Hite of this city.

Mechanics and architects have inspected this work and expressed sentiments of praise as to its construction and beauty.

And above all the design is a creation in remodeling an old house, and stairway starts from near the center of reception room and does away with expense of halls and also economizes in furniture, for its beauty is a high grade of room furniture.

Respectfully,
F. BEHYMER.

### Our Stock Designs Admit of Numerous Variations

We have made the question of stair business a careful study, and illustrate on these pages a line which is at once adaptable to the small and modest cottage as well as to more elaborate home. When we say study we refer particularly to the style of construction, for instance of our posts, the correct size of all mouldings, in order that the assembled effect may be harmonious and complete. Likewise, the turning of the balusters and shape of rails are especially adaptable for these specific purposes.

With the styles illustrated, an infinite variety of arrangements of stairs are permissible, and it is a very rare exception when special work will be required for any particular purpose.

### Secrets of Stair Building Exposed

It is an "open secret" that the question of being able to get stairwork at modern figures and with any degree of promptness, has been a serious drawback to prospective builders.

Through our ceaseless efforts of selling reliable stairwork at cost, plus one small profit to the consuming public, we have been able to produce and sell stairwork at prices within range of all.

If you have ever had occasion to build before, and have required a new flight of stairs, you no doubt will recollect the mysterious air which has enshrouded your desire to get information as to the probable expense of a flight of stairs from the manufacturer or your local lumber dealer.

We itemize on these stair pages, individually, each and every article required for the stairs, and explain fully just how this material comes to you and attach net prices. With this information at your command, and infinite variety of arrangements of stairs can be figured within a few moments, and you know the exact cost without entrusting your interest to any outsider.

The fact that part of this material is already machined ready to go right into the stairs, reduces the erecting cost very materially.

We use only thoroughly kiln-dried material in making up the different parts of this stair stock, and only the most skilled and expert mechanics are employed in the production of the finished article. By using kiln-dried lumber you avoid any of the annoying effects of shrinking or coming apart of the stairs after they are put in the building.

The fact that you had no previous experience in the stair building line should not deter you one moment from learning its simplicity now.

If there are any points which are not practically clear to you regarding the proposed stair for which you are in the market, write us, and we will give you the advice of an expert stair-builder.

## STAIR NEWELS

No. E 336

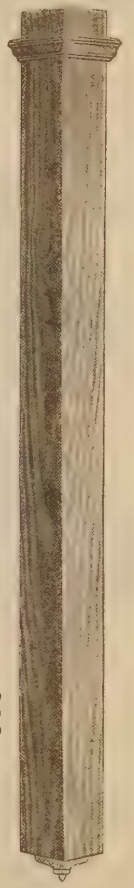
Yellow Pine.... **$2.90**
Plain Red Oak. **3.25**
Fir..... **3.00**

No. E 337

Yellow Pine.... **$3.10**
Plain Red Oak. **3.50**

These designs in Starting Newels are modern and up-to-date. All Newels are hand smoothed and made from thoroughly kiln-dried stock. All carvings are well made and not composition ornaments. Every Newel from one-inch lumber, with glued lock joint. Height of all Starting Newels 4 feet, with 8 x 8 base and 6 x 6 shaft, suitable for open or closed stringboard. Base of post, 20 inches long, allowing one or two risers. Every Newel wrapped in paper and carefully packed.

## ANGLE NEWELS



No. E 341

Yellow Pine. **$1.90**
Red Oak ... **2.10**
Fir..... **2.00**

These Angle Newels are handsome and modern; made with a 5-inch shaft, and 5 feet 6 inches long. These Newels may be used as cheap Starting Newels by sawing off 1 foot 6 inches. They match the Starting Newels and are suitable for fine residences. All Newels are hand smoothed and made from thoroughly kiln-dried stock. We furnish loose drop at bottom for all Angle Newels.

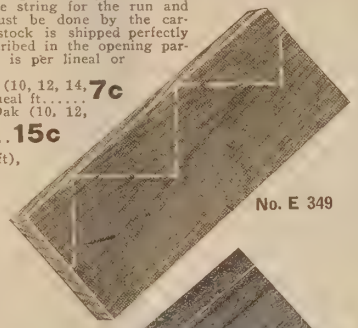
## Stair Rails, Balusters, Steps, Risers, Face and Wall Stringers, in Oak and Yellow Pine

### FACE STAIR STRINGER

No. E 349. Is carried in stock in Yellow Pine, Fir and Plain Red Oak. Size ¾x11¼ inches, surfaced two sides, machine sanded one side and jointed edges. The accompanying cut illustrates the relative position in which this string is ordinarily used, and the dotted horizontal and perpendicular lines indicate the tread and riser lines, or the "run and rise," as called in stairwork terms. From the fact that the space allotted for stairs and the height of story differ in almost every building, we do not cut the string for the run and rise. This must be done by the carpenter. Our stock is shipped perfectly square as described in the opening paragraph. Price is per lineal or running foot.

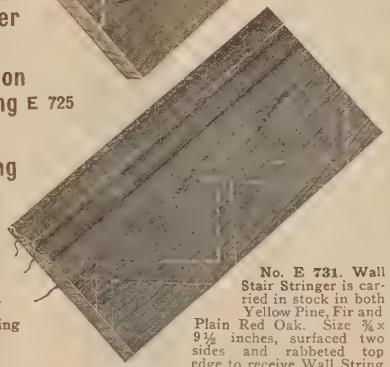
Yellow Pine (10, 12, 14, 16 ft.), per lineal ft..... **7c**
Plain Red Oak (10, 12, 14 ft.), per lineal ft..... **15c**
Fir (10 to 16 ft), per lineal ft **8c**



**Wall Stair Stringer** E 731

**Extension Moulding** E 725

**Base Moulding** E 8420



No. E 731. Wall Stair Stringer is carried in stock in both Yellow Pine, Fir and Plain Red Oak. Size ¾ x 9½ inches, surfaced two sides and rabbeted top edge to receive Wall String Extension. The accompanying cut illustrates the relative position in which this string is ordinarily used, and the dotted horizontal and perpendicular lines indicate the housing for the treads and risers, made to suit the exact run and rise of stairs. From the fact that the space allotted for stairs and the height of story differ in almost every building, we do not "house the string" for the run and rise. This must be done by the carpenter. Our stock is shipped as described in the opening paragraph. Price is per lineal or running foot.

(10, 12, 14, 16 ft.) Yellow Pine, per lin. ft. **7c** (10, 12, 14, 16 ft. lengths.) Fir, per lineal ft. **8c** (10, 12, 14 ft.) Plain Red Oak, per lin ft..... **12c**

No. E 725. Wall String Extension Moulding is carried in stock in Yellow Pine, Fir and Plain Red Oak and is used in connection with the rabbeted top Wall String, which gives the same outline to the Wall String as the top of the cove base shown by No. E 8421, page 53. Size of mould is ⅞x1¾ inches. Price is per lineal or running foot.

Yellow Pine, per lin. ft. **2c** Fir, per lineal ft. **3c** Plain Red Oak, per lin. ft. **4c**

No. E 8420. See page 53 for full explanation and price in Yellow Pine, Fir and Plain Red Oak.

### STAIR STEPS OR TREADS

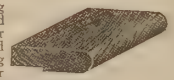
**We Manufacture Stairs TO Special Needs**

E 347. Steps and Treads are carried in stock in Yellow Pine, Fir and Plain Red Oak. Size of each step, 1⅛x11½ inches, 3 feet 5 inches long. They have one edge one-half round, are dressed two sides, and machine smoothed one side.

Yellow Pine, each..... **45c** Quarter-Sawed Fir, each..... **50c** Plain Red Oak, each..... **67c**

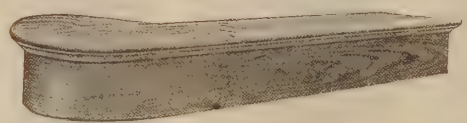
### STAIR LANDING STEPS

No. E 961. The top or landing steps used on platforms and second floor levels are customarily not as wide as the regular stair step or tread. These steps are made 1⅛x3¼ inches wide, 3 feet 5 inches long, and are rabbeted on the inner edge to ⅞ in. thick, so as to finish level with flooring on platforms and second floor halls. Are carried in stock in Yellow Pine, Fir and Plain Red Oak. Yellow Pine, each... **15c** Fir, each.... **20c** Plain Red Oak, each..... **25c**



### STAIR RISERS

No. E 348. Stair Risers are carried in stock in Yellow Pine, Fir and Plain Red Oak. Size of each riser, ¾x7¾ in. wide, 3 ft. 5 in. long. They are surfaced 2 sides and smoothed 1 side. Yellow Pine, each..... **20c** Fir, each..... **25c** Plain Red Oak, each..... **30c**



### Starting Step and Riser

HALF CIRCLE END

The use of this Half Circle End Step and Riser means Stairway Style

No modern stairway is complete without our Starting Step and Riser, Half Circle End. Same conform to our stock steps and risers and are made both right and left hand ends. When ordering be sure to state whether the circle end is at right hand or left hand side going up the stairs.

E726. Yellow Pine **$3.25** Fir ..... **3.50** | No. E 730... Plain Red Oak **$4.00**

### WALL ROSETTE

No. E 728. On second floor landing it is not always convenient to use a newel for rail to strike against and in such cases a Wall Rosette is required. Carried in stock in Yellow Pine and Plain Red Oak at the following prices:

Yellow Pine, each. **10c**
Fir..... **15c**
Plain Red Oak, ea. **20c**

### Cove Moulding

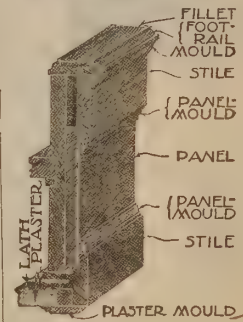
No. E 8060

Cove or Scotia Mould is required under each Step. We carry same in Yellow Pine, Fir and Plain Red Oak. Size ⅞x⅞ inch.

Yellow Pine, per 100 lineal feet..... **38c**
Fir, per 100 lineal feet..... **40c**
Plain Red Oak, per 100 lineal feet..... **82c**

### CURB OR CLOSED STRING

Our regular pattern No. E 349 is adapted for the purpose of making what is called an "Open String Stairway," but where something more massive is desired, also giving a richer effect, we furnish what is known as the Curb or Closed string, No. E 950. The accompanying cuts give elevations and detailed sections of this string. The inside member which supports the treads and risers is similar to style No. E 349 and is figured at the same rates. The balance of the members, viz.: Fillet, Foot Rail, Mould under Foot Rail, Top and Bottom Stiles, Panel, and Plaster Mould are priced in detail per sizes below. The stock is all thoroughly machined, well kiln-dried, and can be shipped promptly. This particular string is equally adapted to our turned or Colonial Square Balusters shown on p. 69.



Section of Curb String

| | | Per 100 Lineal Feet Yellow Pine | Plain Red Oak |
|---|---|---|---|
| E 962 | Stair Rail Fillet, ⅞x1⅛ | $1.25 | $2.00 |
| E 963 | Foot Rail, 2¾ x ¾ | 2.00 | 3.00 |
| E 964 | Mould under Foot Rail, ½x⅜ | .75 | 1.00 |
| E 965 | Top Stile, ¾ x 4½ | 3.00 | 5.00 |
| E 964 | Panel Mould, ½x⅜ | .75 | 1.00 |
| E 967 | Panel, ¾ x 7¾ | 6.00 | 8.00 |
| E 966 | Bottom Stile, ¾ x 3½ | 3.00 | 5.00 |
| E 968 | Plaster Moulding, 2⅜x⅜ | 3.00 | 3.00 |

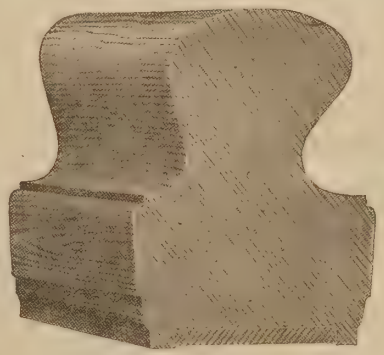
Plain Red Oak, per foot..... 10c

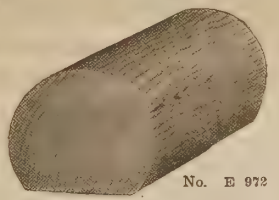
### Stair Rail



No. E-343. This design of Stair Rail is the most up-to-date pattern ever shown to the trade. We furnish this in Yellow Pine, Fir and Plain Red Oak. Size 2½x3½ inches. Specified lengths 2 cents a foot extra.

Yellow Pine, per foot..... 13c
Fir, per foot..... 14c
Plain Red Oak, per foot..... 15c

If fillet is wanted for 1¾-inch balusters, add 1c per foot. If fillet is wanted for 1⅛-inch balusters, use Nos. 974 and 975 shown on this page.



No. E 972

### WALL STAIR RAIL

No. E 972. Wall Stair Rail is carried in Yellow Pine and Plain Red Oak. Size, 2x1¾ inches. Specified lengths 1 cent per foot extra.

This rail is generally used on stairways going between plastered partitions, such as public stairways or basement or attic stairs.

Yellow Pine, per lineal foot..... 4c
Plain Red Oak, per lineal foot... 6c

### Hand Rail Brackets

Support for wall stair rail shown above. Furnished without screws. Use wall rosette where wall rail and brackets are put along plastered wall. Weight about 12 ozs.

No. EH 56. Bronzed Hand Rail Brackets, 2½ inches Price, each..... 10c
Price per dozen..... 98c

3½ inch Projection, distance to center rail 2¾ inches. Back Plate 3 x 1½ inches. With screws. Weight about 13 ozs.

No. EH 2590. Antique Copper, price each..... 17c
No. EH 2591. Dull Brass, price each..... 17c

### Acorn Tips

Ornamental piece for ends of Wall Stair Rail (see cut to the left) to give a finished appearance. Size 1¾ inches diameter. Wt. 1½ ozs.

No. EH 930. Yellow Pine, price each..... 15c
No. EH 930. Oak, price each..... 20c

### Quarter Level Turn

These turns are used on landings around well hole openings, and are suitable for either right or left hand turns.

No. EH 942. Yellow Pine, each..... $1.90
No. EH 942. Oak, each... 2.00

### Sub-Fillet and Fillet

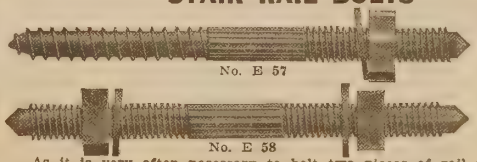
No. E 974. Sub-fillet is 1$\frac{11}{16}$x⅝ in., plowed 1⅛x⅛ in. This sub-fillet is used in connection with our regular stair rail where 1⅛ in. Colonial Balusters are desired as explained under Balusters No. E 969.

Yellow Pine, per lineal foot..... 2c
Fir..... 2½c
Plain Red Oak, per lineal foot..... 3c

No. E 975. Fillet for Sub-Fillet No. E 974 is used in connection with 1⅛ in. Colonial Balusters. Carried in stock in both Yellow Pine, Fir and Plain Red Oak. Size 1$\frac{1}{16}$x¼ in.

Yellow Pine, per lineal ft... 1½c
Fir, per lineal foot..... 2c
Pl. Red Oak, per lineal ft.. 2½c

### STAIR RAIL BOLTS



No. E 57

No. E 57 ⅜x4½, 1 nut, each 8c
Per dozen 60c

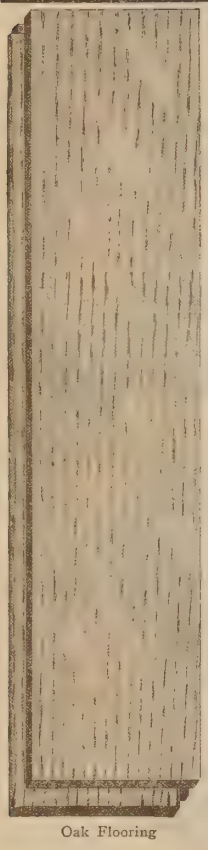
No. E 58

No. E 58 ⅜x4½, 2 nuts, each 8c
Per dozen 60c

As it is very often necessary to bolt two pieces of rail together, or a straight piece of rail and an easing or crook, or to bolt a piece of rail to a newel, it requires adaptable bolts for said purposes. No. E 58 which has a nut on each end is used for joining two pieces of rail together. No. E 57 has a nut on one end and a wood screw on the other, and is used for bolting a piece of rail to a newel post. Weight, 3 oz.

# Hardwood Flooring—Oak, Maple AND Yellow Pine

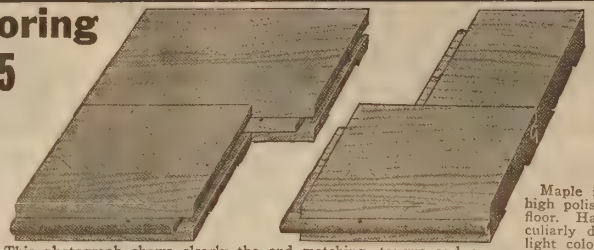
## PUT DOWN A HARDWOOD FLOOR AT LESS THAN CARPET COST



Oak Flooring

## Thick Oak Flooring

**Clear, Plain Red Oak, 13/16x2¼ inch Face, Polished End Matched, price, 1000 ft..... $55**



This photograph shows clearly the end matching, tongue and groove on our Thick Oak and Maple Flooring.

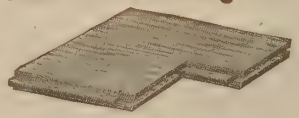
Our 13/16x2¼ in. Oak Flooring is the standard of the world. It possesses all the characteristics that go to make up a perfect flooring. From tree to shipping room it passes under the closest inspection at all stages in the process of manufacture. The face sides must be free from imperfections. The machine work must be done with extreme care. The matching must be accurate. The grading must be in strict conformity with the established rules. Every detail receives close attention. Our immense trade enables us to keep our stock bright, clean and fresh.

This beautiful flooring is machine polished, tongue-and-grooved end-matched and bundled. In ordering, you must allow one-third for waste in cutting, and the difference in width, as this flooring is figured as 3 in. wide. The price we quote below is per thousand feet. Oak flooring comes in lengths from 2 feet up. We can not furnish any special lengths. Weighs 2,200 lbs. per 1,000 ft.

| Catalog No. | Grade | Thickness | Size of Face | Price Per 1000 Feet |
|---|---|---|---|---|
| E 292 | Clear | 13/16 | 2¼ inches | $55 |
| E 293 | Select | 13/16 | 2¼ inches | 48 |

The supply of this grade of flooring is limited. In case we are unable to furnish it we will notify promptly, but we only commit ourselves to furnish this grade as long as the stock lasts. This applies only to Select Oak Flooring. See Table on other page showing cost of Flooring for various size rooms.

## Thin Oak Flooring 50c



Seasoned, polished, matched and ready to lay.

Here is an innovation in Hardwood Flooring that has met with the most remarkable success. It is a special thin Oak Flooring, 3/8x1½ in., to be laid over old floors or cheap pine boards. Makes the most handsome, economical and satisfactory floor that money can buy. Can be put down over old pine floors without changing base boards. Saves the labor and expense of tearing out old floors. Easy to lay and will last for generations. Cheaper and better than a good carpet.

Any carpenter or handy man can lay it perfectly, using a 1¼ in. finishing brad. For new homes it is especially good, from the fact that a cheap ⅞ in. thick floor of wood can first be laid, then a layer of building paper and our 3/8 in. Oak Flooring laid over all. Makes a noise proof and warm hardwood floor at trifling cost. Made from selected Red Oak that has been air-seasoned and scientifically dried. Every foot guaranteed. We sell this flooring by the 100 lineal feet. Eight lineal feet will lay one square foot, as, for instance: A room 12x15 contains 180 square feet, which, multiplied by 8, gives you 1,440 lineal feet. The price is per 100 lineal feet, random lengths. This flooring comes in lengths from 2 feet up, and we can not furnish specified lengths. Seasoned, Polished, Matched and ready to lay. Weighs 15 pounds per 100 lineal feet. The term, polished, refers to the hard smooth surface resulting from fine machine work.

| Catalog No. | Kind of Oak | Grade | Thickness | Size of Face | Price per 100 Lineal Feet |
|---|---|---|---|---|---|
| E 294½ | Select Red Oak | Select | 3/8 inch | 1½ inch | $0.50 |
| E 294 | Plain Red Oak | Clear | 3/8 inch | 1½ inch | .80 |
| E 900 | Quartered Red Oak | Clear | 3/8 inch | 1½ inch | .95 |
| E 901 | Quart'd White Oak | Clear | 3/8 inch | 1½ inch | 1.05 |

See Table on following page, showing cost of Flooring for various size rooms.

## Maple Flooring

**Clear Maple Flooring, Polished, End Matched, per 1000 ft..... $53**

**Select Maple Flooring, Polished, End Matched, per 1000 ft..... $48**

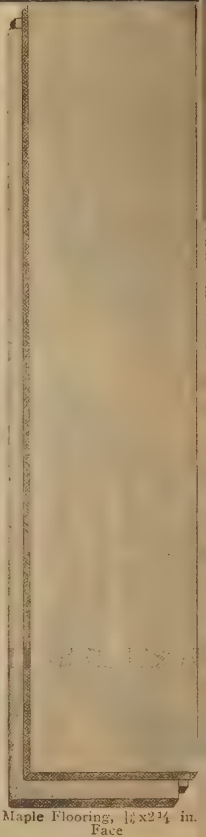
Maple is very dense and hard and takes a very high polish. It makes a very beautiful and durable floor. Has a fine color and straight grain. It is peculiarly desirable for bedroom floors because of its light coloring, but is adapted for use in any room. It is largely used for kitchen and bathroom floors. We sell the highest grade Maple Flooring at a great reduction from prevailing retail prices. Costs less than Oak Flooring of the same size face and lasts just as long. Our Clear Maple Flooring is air-seasoned and scientifically dried. It is polished, end-matched, tongue-and-grooved, and bored for blind nailing. It is run through the machines on very slow feed to insure smoothness and absolute accuracy.

Maple Flooring is carried in two grades—namely, Clear Maple, 13/16x2¼, which is the very best grade and clear in every respect. Also carried in Select, which is one grade below the Clear. Is suitable for store buildings, kitchen floors and answers the purpose in nearly every respect that the Clear Maple Flooring does.

This flooring is 13/16 in. thick and 2¼ in. face, and comes in 1½ to 16 feet lengths. In ordering, be sure to allow one-third for waste in cutting and the difference in width, as this flooring is figured as 3 inches wide. Carefully bundled. We guarantee safe delivery and satisfaction.

The price we quote below is per 1,000 feet. Weighs 2,200 lbs. per 1,000 feet. The term, polished, refers to the hard smooth surface resulting from fine machine work.

| Catalog No. | Grade | Thickness | Size of Face | Price per 1,000 Feet |
|---|---|---|---|---|
| E 949 | Clear | 13/16 inch | 2¼ inches | $53 |
| E 973 | Select | 13/16 inch | 2¼ inches | 48 |



Maple Flooring, 13/16x2¼ in. Face

## Yellow Pine and Fir Flooring

**YELLOW PINE FLOORING**—Is carried in two kinds, namely, "B and Better Edge Grain" and "B and Better Flat Grain." Both kinds are clear and practically free from defects and will lay without waste. Edge Grain is sawed with the grain and is sometimes called Straight Grain. Flat Grains or flat sawed is not sawed with the grain. Yellow Pine Flooring is 13/16 inch face and comes in random lengths from 10 to 16 feet.

**FIR FLOORING**—Is carried in both 13/16 and 1¼ inch thickness in 1st Clear Best Grade only. Fir Flooring is the ideal covering for porch floors, kitchens and rooms where hardwood flooring is not desired. Fir Flooring is 3¼ inch face and comes in random lengths from 6 to 16 feet.

**IMPORTANT, NOTE**—In ordering be sure to allow ¼ for waste in cutting and laying and the difference in width, as this flooring is figured as 4 inches wide.

Yellow Pine Flooring weighs 2,000 pounds per 1,000 feet.

Fir Flooring 13/16 inch thick weighs 2,000 lbs. per 1,000 feet

Fir Flooring 1¼ inch thick weighs 2,200 lbs. per 1,000 feet.

# $8.96 Floors a 10x14 Foot Room with Oak!

## BEAUTIFUL—SANITARY—EASY TO CARE FOR

It's Easy to Lay Your Own Floor.

### Hardwood Flooring at Wholesale Prices

Gordon-Van Tine Oak flooring is made from genuine **upland Oak**, the best lumber obtainable, and manufactured on the finest woodworking machines. No better flooring can be bought for any money. The entire output of two big mills goes to supply the Gordon-Van Tine Company with Oak flooring. Every piece is carefully inspected; only the cream of the whole cut is taken. But because we sell to you direct from the forest-mill, you can buy Gordon-Van Tine flooring for less than your dealer can buy flooring.

### HOW TO MEASURE YOUR ROOMS IN ORDERING FLOORS

To arrive at the quantity of flooring required for any given space, figure the number of square feet, which means the width multiplied by the length. For instance a room 12 ft. wide by 15 ft. long would contain 12 times 15, or 180 sq. ft. To the number of sq. ft. add one-third for loss in cutting and waste in matching and dressing; 180 sq. ft. plus one-third or 60 ft. would equal 240 ft. board measure count. This flooring is made from boards 3 in. wide, but after having passed through the machines for matching and dressing, actually measures only 2¼ in. face, and this is the reason why the waste (equal to one-third of the square footage) must be added to the actual sq. ft. of space. Therefore, if Oak Flooring is desired the 240 foot board measure at $54 per thousand feet will cost **$12.96.**

**See what a Flooring Expert says of Gordon-Van Tine Oak Flooring:**

Clio, Arkansas,
June 2, 1915.
Gordon Van Tine Co.,
Davenport,
Iowa.

Gentlemen:

I have just finished laying the flooring in the F. O. Scott residence, Melrose Court Bldg. 510, and am pleased to state I cannot say enough about your oak flooring. The quality as well as the milling was the best I ever saw, and I have handled flooring all my life. Was foreman for the Clio Lumber Co., who makes a specialty of hard wood flooring, and I have laid thousands of feet. I never made or saw any nicer flooring in my life.

Yours very truly,
E. E. SWARM.

My future address—
Camanche, Iowa.

### Beautiful Oak Flooring—the Logical Floor for the Home

Beautiful, sanitary, everlasting oak floor, can be bought now for less than a fairly **good carpet costs.** Everyone recognizes the many and complete advantages which hardwood floors possess over any other kind of floor or any floor covering—now the last bar that checked their **universal use** has been removed. Gordon Van Tine's prices have made **genuine oak flooring cheaper than carpets**—and they wear forever, while a carpet is only good for a few years.

All the fine homes in the country, without exception, have hardwood floors, and at least ninety per cent have oak floors. Oak is recognized as the most beautiful and durable flooring wood obtainable in this country.

### FLOORING NAILS

Buy Nails that will put your material in place to stay. The best Flooring on earth can be spoiled by laying with wrong kind of nails. For prices and sizes, see page 125.

| Kind of Flooring | Kind of Nails |
|---|---|
| ¾ x 1¼ Face | 1¼ Finishing |
| ¾ x 2¼ Face | 8d Flooring |
| ¾ x 3¼ Face | 8d Flooring |

### POLISHING AND WAXING BRUSH

No. E **976.** Iron weighted with protected corners. Best quality Russian bristles. Used for polishing hardwood floors after waxing.

Price, 15 lbs. **$1.43**

Price, 25 lbs. **$1.92**

No. E **358.**

### DEADENING FELT

In laying your hardwood floors be sure to use our deadening felt, it deadens sounds and makes a cold-proof floor.

To cover a room 12x14 feet with deadening felt would cost but **$1.05.**

Price per roll containing 50 sq. yds. Width 36 in. Wright about 50 lbs to the roll, **$3.00**

### FLOOR WAX

Our Floor Wax will give you long, good service. Floors finished with this wax will not need to be entirely rewaxed more than once or twice a year. One pound will cover about 250 to 300 square feet.

No. P **1042**

1 Pound Can, per can..... **$0.35**
4 Pound Can, per can..... **.68**
2 Pound Can, per can..... **1.25**

See page 101 for directions and description.

### FLOOR PASTE FILLER

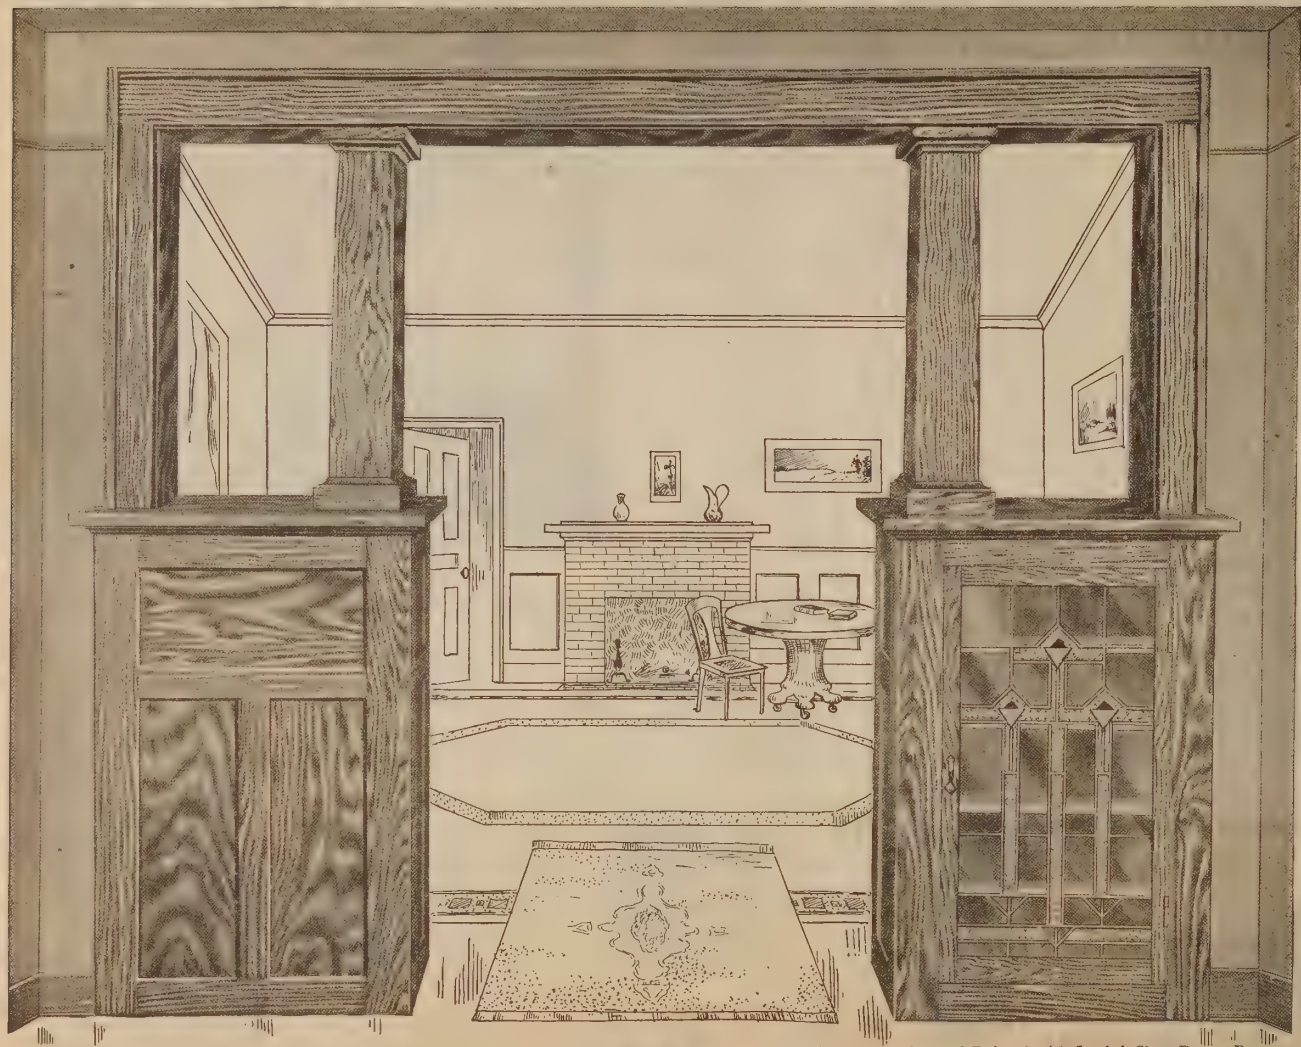
For description, prices and directions see page **101.**

### FLOOR VARNISH

No. P-**1154**

One gallon will cover between 500 and 600 square feet one coat. Never put Liquid Filler or Shellac under Floor Varnish, or it will mar easily and scale off. For prices and descriptions see page **101.**

# LOOK AT THIS BEAUTIFUL MODERN COLONNADE FOR $25



This half shows the back or panel side of Pedestal. Reverse side of Pedestal has shelves and door with Leaded Glass as shown in opposite cut.

This half shows the front of Pedestal with Leaded Glass Door. Reverse side of Pedestal is paneled.

**Front side of both Pedestals has Leaded Glass doors and shelves as shown in cut on right hand side. Reverse or back side of both pedestals is paneled.**

We have attempted to make it perfectly clear that the side facing into one room has the paneled sides, while the sides facing into the other room has leaded glass shelves.

## MASTERPIECE COLONNADE

The Masterpiece Colonnade is the very highest achievement of modern cabinet making, and you must really see this Colonnade to appreciate it. It has the unusual feature of one side panelled; the opposite or reverse side fitted with double shelves and leaded glass doors.

The side which is fitted with the doors can be faced into the living room and used for books, or into the dining room and used for glass or chinaware.

By using this Colonnade it enables you to make two rooms practically into one at a very small expense.

This Colonnade is furnished in Yellow Pine, Fir and Oak, and the usual retail prices for this would be from $60.00 to $75.00.

## DESCRIPTION OF COLONNADE

The Pedestals are 2 feet 6 inches wide and 4 feet high. About 5 inches of the pedestal sets over the wall so that each pedestal extends into the opening about 25 inches.

The columns are 6 inches square and 4 feet high. This Colonnade is suitable for any opening 7 feet wide and wider and not higher than 8 feet. The columns are so constructed that they can be cut down any length and used for openings as low as 6 feet 8 inches.

The inside of each pedestal is nicely sealed up and fitted with adjustable shelves which can be placed at any height. The side which is fitted with doors can be faced into the living room and used for books, or can be faced into the dining room and used for cut glass or chinaware. The doors are supplied with Craftsman hardware in either dull brass or antique copper. The doors are glazed with leaded crystal glass as shown in the cut.

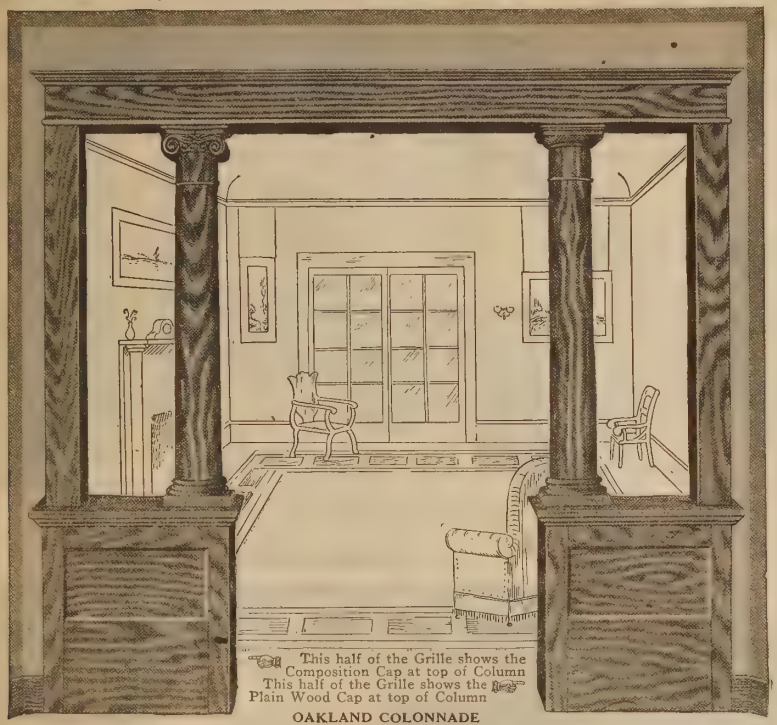
# RICH, BEAUTIFUL COLONNADES FOR ONLY $11.50 UP



This half of the Grille shows the Composition Cap at top of Column
This half of the Grille shows the Plain Wood Cap at top of Column

## OAKLAND COLONNADE

Our Oakland Colonnade represents the highest achievement both in material and price that has ever been offered to the home owner in the way of an interior Colonnade. It enables you to put in a Colonnade for $11.50 that heretofore would cost you from $25.00 to $50.00.

This Colonnade consists of 2 Pedestals and 2 staved Turned Columns. The Pedestals are 24 in. high, 22 in. wide and 11 in. face. The panels in the pedestals are so arranged in height that ordinary standard width base used in the same room can be run around the Pedestals and have the Base throughout the house uniform.

## MISSION COLONNADE

This Colonnade consists of two pedestals and two staved columns square in design. The pedestals are 24 in. high, 22 in. wide and 11 in. face. The panels in the pedestals are so arranged in height that ordinary standard width base used in the same rooms can be run around the pedestal and have the work uniform throughout.

The columns are 5¾ in. at the base, 5 in. at the neck, and are built up in such a manner that they can be used for openings from 7 to 8 feet in height by cutting off the base, which is made of the same diameter, for a distance of 22 inches from the bottom up. With the extension of 22 inches on the pedestals can be used for openings from 6 feet in width up to 9 feet in width, giving a distance between the pedestals of from 3 to 6 feet.

### PRICES

## NON-CONDUCTOR OF HEAT, COLD AND SOUND

Comparative tests made by one of the largest laboratories in this country show that Roman Wall Plaster Board is far superior as a non-conductor of heat and cold.

It will effect a great saving in fuel bills. It will make a cool house in summer.

Owing to its construction, Roman Wall Plaster Board, with a layer of heavy paper on either side, is remarkable as a sound deadener.

## WHERE TO USE ROMAN WALL BOARD

**NEW BUILDINGS:**—For the interior walls and ceilings.

**RE-PARTITIONING IN OFFICE BUILDINGS:**—Where frequent changes are necessary, the best results at a minimum expense can be obtained by using Roman Wall Board.

**STORES:**—At the least expenditure of time and money, floor spaces can be divided with new partitions. Private offices, extra rooms, closets, etc., can be made with no inconvenience.

**COUNTRY CLUBS:**—Pleasing interiors can be effected without the use of Plaster, and especially in panel effects.

**BUNGALOWS and SUMMER COTTAGES:**—Will make your summer home comfortable and you can do the work yourself.

**ATTICS:**—Can be transformed into livable rooms at a surprisingly low cost and the work done in spare time.

## ROMAN CRACK FILLER

Roman Crack Filler is a special preparation for filling the cracks between the sheets of our wall board. Its purpose is to face up cracks, crevices, etc. It dries hard in a few hours, depending upon the thickness applied. When dry it may be sand-papered to a smooth surface and will not tear or break at the edges; neither will it crack, shrink or swell. Contains no oils that may affect finish applied. Roman Crack Filler will take oil or water the same as wood, and a very smooth surface may be obtained by sanding. Full description given on package. Comes put up in cartons of 1, 4 and 25 pounds. Will require about one-half pound of Crack Filler to 100 square feet of surface.

E 918. Roman Crack Filler Prices:

|---|---|
| 1 lb. cartons, per carton | $0.20 |
| 4 lb. cartons, per carton | .75 |
| 25 lb. cartons, per carton | 2.75 |

# Roman Wall Plaster Board

**It's Warmer, Cleaner and Stronger than Lath and Plaster**

**$25.00** Per 1000 ft. and Up.

## Why Roman Wallboard is Better Than Lath and Plaster

We have told you what Roman Wallboard does in comparison with the old-fashioned method of lining a house, and from the description given of its makeup you can see why it will give better results nine times out of ten, than will wood lath and plaster.

The uncertain weather conditions the hot winds of August, or a sudden freeze will often spoil an otherwise good job of plaster.

Roman Wallboard is kiln dried before leaving the factory, and is absolutely unaffected by extreme heat or cold. It can be safely erected at any time.

Government tests show, that the quality of plaster, its age, the cleanness of sand used, and the proportion of water, sand and plaster, must be "just so" in order to get anywhere near the best results. Can this be done "on the job" where the water is measured with a hose and the sand with a shovel?

**Roman Wallboard** contains as much pure plaster per square foot as a good job of plaster. All materials are weighed and carefully tested to insure the uniformity of the product. The result is—the best wall possible for the price.

The above are a few of the reasons that Roman Wallboard does what we claim, but why not get a sample and test it for yourself? It will cost you nothing.

A fine Panel Effect, using Roman Wall Board.

## EASY TO APPLY

Any man who is ordinarily handy with tools can make a finished wall. It is nailed directly to the studding which is regularly spaced on 16 inch centers.

To fit the corner spaces around doors and windows, it can be readily cut with a saw, or by scoring the paper on opposite sides of the board with a knife it can be broken with a clean edge. On the side walls, small flat head nails should be used about 6 in. apart. On ceilings it is well to space the nails 4 in. apart. Use three penny fine nails and see that they are set slightly below the surface of the board.

## NO PANEL STRIPS ARE NECESSARY

**Roman Wallboard** is guaranteed not to warp, shrink or buckle. The joints are readily and permanently concealed by using the crack filler as directed.

However, if your scheme of decoration requires panel strips, apply them over the joints when they fit in with the scheme; otherwise conceal the joints in the usual way with the filler, and put the strip where it fits the design.

See pages 31 and 32 for prices on wallboard panels, plate rail, etc.

## NAILS FOR ROMAN WALLBOARD

About 5 pounds of nails are required for every 100 square feet of wall board. You should use a 3d fine nail with small flat head. See price below:

No. EH **46**. 3d fine, per pound in less than 100 lb. lots..... **5c**
In 100 lb. kegs, per 100 lbs..... **$4.10**

## Prices on Roman Wall Board

Below we give you the sizes and prices of Roman Wall Plaster Board. Always order in crates whenever possible, as you save $2.50 per thousand sq. ft. by buying in crate lots.

We guarantee safe delivery of this Wall Board to your station.

ROMAN WALL BOARD is shipped from factories in Central Michigan, Chicago and Central Iowa in the following sizes and at the following prices:

| Size In. In. | Number of sq. ft. per Board | Boards per Crate | Number of sq. ft. per Crate | Price per Crate | Price per sheet in less than Crate lots |
|---|---|---|---|---|---|
| 32 x 36 | 8 | 20 | 160 | $4.00 | $0.24 |
| 32 x 72 | 16 | 10 | 160 | 4.00 | .48 |
| 48 x 36 | 12 | 13 | 156 | 3.90 | .36 |
| 48 x 72 | 24 | 7 | 168 | 4.20 | .72 |
| 48 x 84 | 28 | 7 | 196 | 4.90 | .84 |
| 48 x 96 | 32 | 6 | 192 | 4.80 | .96 |
| 48 x 108 | 36 | 5 | 180 | 4.50 | 1.18 |

Weight about 1½ pounds per square foot crated.

NOTE:—Important. Order your Crack Filler and Plaster Board Nails with your Wall Board.

# "Quality" Wall Board

A SUBSTITUTE FOR LATH and PLASTER

NO LATHING NO PLASTERING NO TROUBLE NO WORRY

**$24.00** Per 1,000 Feet For Plain Surface Board

Putting "Quality" Wall Board Direct on the Studding

**Wall board has come to stay; it is being used all over America for most every kind and class of buildings. You save money. You save time and you save all the dirt—all the muss and fuss.**

It is so easy to apply "Quality" Wall Board; you need no tools except a saw and hammer.

"Quality" Wall Board is being used in buildings of nearly every description; homes, cottages, stores, office buildings, garages, barns, outbuildings.

For repair work it is unexcelled. You can change your garret, make extra rooms of otherwise waste space; add valuable rooms. You can divide large rooms into smaller ones. All these at a small expense without any annoyance of lathers and plasterers—without any muss or fuss or dirt.

• **"Quality" Wall Board isn't any better than lath and plaster** for all kinds of buildings, but we do claim it has many advantages, besides time and cost, over lath and plaster, and in most every instance will do the work just as well.

You pay for what you get there is no waste to "Quality" Wall Board. Sheets are easily cut with saw and knife to fit all spaces—therefore every foot can be utilized.

"Quality" Wall Board is light, weighing about 650 pounds to the 1,000 square feet. It is therefore easily handled and can be shipped long distances at small expense for freight.

**FREE SAMPLE SENT UPON REQUEST.**

Bath Room Made of "Quality" Wall Board

## Does Away With Muss and Fuss—You'll Like It

Easily Applied—Absolutely No Experience Necessary

**You can secure very pleasing results by using "Quality" Wall Board** with panel effects. On opposite page we price Wall Board Panel Mouldings.

By making into panels, all cracks and joints are concealed by the panel strips or mouldings, and can be paneled or kalsomined with good results.

If you desire to wall paper, you can fill joints with Roman Crack-Filler. See next page for description and price.

You save 50% on labor. Think of this—an ordinary man can finish a wall with "Quality" Wall Board in less time than he can put on lath and plastering. Then your walls are finished—you do not have to wait for them to dry. You can occupy your house one month earlier than if you used lath and plaster.

### WALL BOARD BETTER THAN LATH AND PLASTER

White Pigeon, Mich., October 23, 1915.

Gordon-Van Tine Company, Davenport, Iowa.

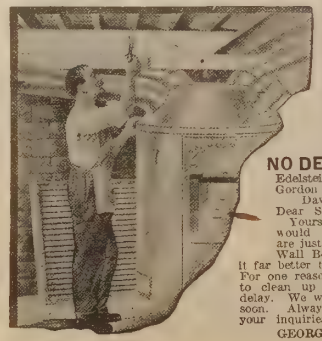
Dear Sirs:—I used Wall Board in putting in partitions upstairs in my house. It makes a good, smooth, solid wall, better than the lath and plaster, as the job was done for me. If I ever build again I intend to use it altogether. Will send you picture of the house soon.

Very truly yours,

E. R. CARTER.

### Ceil Your Cellar or Finish Your Attic

Don't ceil your cellar with lath and plaster. The constant jarring above will develop cracks and loosen it. Accidental spilling of water or break in water pipe will cause the cellar ceiling to fall. "Quality" Wall Board can be put on in half the time and at half the expense. Furthermore, it keeps the floor above warm in winter; will save your wife and children from many a cold and perhaps prevent serious illness. Besides it keeps the cellar dust down.



### NO DELAY, NO DIRT

Edelstein, Ill., Oct. 26, '11

Gordon Van-Tine Co., Davenport, Iowa.

Dear Sirs:

Yours received and would say the carpenters are just now putting on the Wall Board, and we think it far better than lath or plaster. For one reason, there is no lime to clean up afterwards and no delay. We will have photo taken soon. Always glad to answer your inquiries. Yours truly,

GEORGE J. PRESTISS.

### Sample of "Quality" Wall Board will be Sent Free Upon Request

The above illustration shows how 3-Ply Quality Wall Board is made. It shows 3 plies of heavy fibre board.

Three layers of fibre board are now used because they give greater strength and stiffness. It gives a more thoroughly moisture-proof Wall Board because of the additional cementing of asphalt. In 3-Ply Quality Wall Board you get a more rigid and sturdier wall board than ever before.

# See What You Can Save on Your House

BARN, STORE OR OUTBUILDING BY USING "QUALITY" WALL BOARD

**$24.00** Per 1,000 Sq. Feet
For Plain Surface Board

How a Bare Attic can be Converted into Enjoyable Living Rooms

## Can Be Applied Winter or Summer

YOU DON'T HAVE TO WAIT for "good building weather" when you use Quality Wall Board as a substitute for lath and plaster. It is delivered to you DRY, is applied DRY and keeps DRY for all time. It can be put on in less than half the time it takes to apply lath and plaster. You can apply it equally well in cold or hot, wet or dry weather; therefore, it does away with all bad weather delays in building. Use Wall Board in your Poultry House, keep your chickens warm—it will make you money.

Use Quality Wall Board to refinish your attic, cellar, etc.

For Resort Cottage it is unequalled in point of service, economy and time of construction. Keep your garage and stable dry in summer and warm in winter.

### "QUALITY" WALL BOARD IS A GREAT BIG MONEY SAVER

Bricelyn, Minnesota.

Gordon-Van Tine Company.

Dear Sirs:—In reply to your letter of the 24th, will say I think your Wall Board very good and better and cheaper than plaster. I used mine for the inside of a chicken house and it makes a fine finish. If I want to so far from a photographer would be glad to send a picture.

Yours truly, E. A. ANDERSON.

Atlantic, Iowa.

Gordon-Van Tine Company, Davenport, Ia.

Gentlemen:—In regard to the Wall Board, will say it proved as good as recommended. It admits no air; mice will not work in it; in driving a nail it does not go to dust like our so-called hard plaster. I intend to build another house in early Spring and I will use Wall Board by all means. I had a picture taken. In case this one does not suit we will try again, for the day was cloudy. Yours, etc.,

CON ENWRIGHT.

Milwaukee, Wis.

Gordon-Van Tine Company.

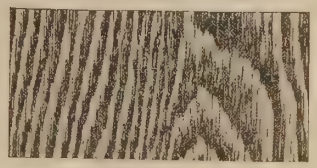
Gentlemen:—In reply to your letter of October 24th regarding a shipment of Wall Board which you made to me at Louise, Texas, will say that it gave excellent satisfaction. I used this Wall Board in a six-room cottage that I built at Provident City, Texas, a small-sized picture of which I enclose. It was easy to put on, the squares fitting snugly together and making a very smooth surface to paper on and a wall through which no draft or wind could work its way. I am thinking of building two more cottages in Texas this winter and if I do will favor you with another order. If you have a book with plans of cottages I would be pleased to receive one. Yours truly, M. R. SHACKLEY.
34 Thirty-Second St.

The illustration below shows a sheet of "QUALITY" Wall Board ready to lay.

"Quality" Wall Board is made of five heavy pieces or plies of heavy, compressed fibre board cemented together with four layers of high grade asphalt under heavy hydraulic pressure. The asphalt layers make it vermin proof and add to its strength.

# Quality Wall Board

## IN PLAIN SAWED OAK



Reproduction of Wall Board in Plain Sawed Red Oak Finish

Quality Wall Board is furnished in Plain Sawed Red Oak finish as well as the regular plain finish. The cost is but a few cents more per square, and you save the extra expense of painting or papering over the board. The Red Oak Panels give a very beautiful effect, especially for wainscot work, etc., and when used with our fir paneled moulding, stained golden oak, the result is an exact reproduction of genuine oak paneling that will deceive anyone but an expert, even on the closest examination. In all respects save the finish, this is precisely the same as the plain Quality Wall Board, being five-ply and of absolutely the very finest manufacture.

## PRICES
### ON "QUALITY" WALL BOARD IN PLAIN OAK

| Length | Width | No. Sq. Ft. to Sheet | No. 860 Finished like Plain Oak |

If so desired, fixtures may be furnished in antique brass, flemished brass, rich gilt and matt, or plain oxidized copper, at additional charge of 10%.

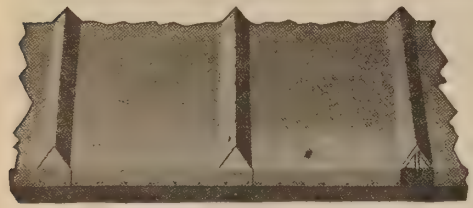
***Any fixture can be replaced by anyone from another set at the separate prices quoted.***

# The Old Honest Two-V Crimped Steel Roofing



Above illustration shows the manner or method of nailing either Two or Three-V Crimp Roofing along the eaves of the roof. With a pair of snips and a hammer a good tight joint can be made that will look well and prevent rain or snow from getting under the roof.

**Two-V Crimp Roofing** is more extensively used today than any other kind of steel roofing. It is so easily laid and has so many advantages over the other kinds of steel roofing that it is popular. It is especially adapted for barns, sheds and factories. It requires no soldering, folding or hammering. It has the neatest appearance and combines beauty, economy and cheapness.

**If you want to save money on your building** you can lay the V Crimp direct on the rafters without sheathing. Set the rafters 24 inches from center to center and nail the V wood strips on the top surface of the rafters. Place cross pieces between the rafters to support and nail the end of the top sheet, beginning in the lower left hand corner of the roof. Use 1¾-inch roofing nails, which should be driven at the top of the crimp and through the V strip about every eight or ten inches. At the end laps use nails every four or five inches.

## NET PRICES AT STEEL MILL IN OHIO

**No. E 704. 2-V CRIMP ROOFING. PAINTED BOTH SIDES.**
Length and price per Sheet, 6 ft. **59c** 8 ft. **78c** 10 ft. **98c**

**No. E 705. 2-V CRIMPED STEEL ROOFING. GALVANIZED.**
Length and price per Sheet, 6 ft. **81c** 8 ft. **1.08** 10 ft. **1.35**

For prices on V Wood Strips for above—30c per 100 lin. ft., or 15c per square of roofing.

**PRICE PER SQUARE**
Painted..... **$4.50**
Galvanized..... **6.25**

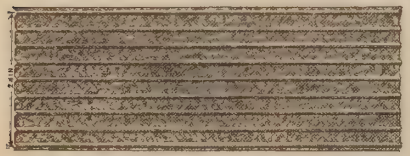
**WEIGHT** PAINTED STEEL ROOFING weighs about 68 pounds per 100 square feet. Galvanized weighs about 82 lbs. per 100 sq. ft. 1 lb. nails required per square.

No. E-703. The CRIMP ROOFING requires a TRIANGULAR WOOD STRIP, to be used under the crimps. These wood strips are necessary for a good job, and in ordering be sure to make note that you want these shipped with roofing. The Two V-Crimp Roofing requires fifty lineal feet for each square (100 square feet or a space ten feet square). This makes the wood sticks cost you 15 cents extra per square for sticks. These wooden V strips should be nailed on to rafters or siding for each crimp.

**Lead Washers and No. 10 Wire Nails**

To make a lasting job we recommend the use of lead washers as the roofing will not rust out around the nails if lead washers are used.

No. E 291. Lead Washers. Quantity sufficient to lay one square, ½ lb.
Price per lb.... 20c

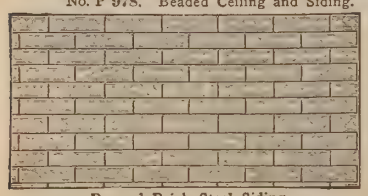


No. P 978. Beaded Ceiling and Siding.

## BEADED CEILING AND SIDING

Easy to apply, can be used for either ceiling, wainscoting or siding, Beads are 3 inches from center to center, covering widths 24 inches, comes in sheets 5, 6, 7, 8, 9, 10 and 12 feet long. Covering width 24 in.

No. P 978.
Painted, price per 100 square ft.... **$5.40**



Pressed Brick Steel Siding.

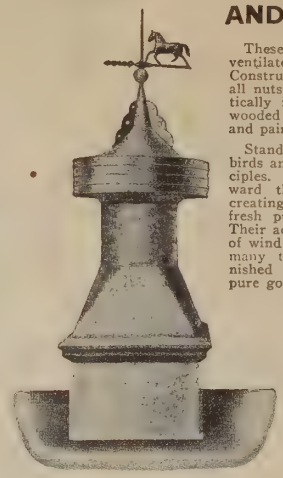
## PRESSED BRICK STEEL SIDING

It so closely resembles the finest pressed brick that it can hardly be distinguished from the real article. The sheets should be painted a brick color red and striped for the mortar lines, which you will do after it is put on the building, and in painting it covers up the nail holes. This material costs hardly as much as the best wood siding, and it costs you very much less to put on. A square consists of 8½ sheets, and is priced both per square and per sheet.

No. P 929. Painted, per sheet, 28x60 in.. **$0.62**
Painted, per 100 square feet..... **5.25**
No. G 929. Galvanized, per sheet, 28x60 in.. **1.00**
Galvanized, per 100 square feet..... **8.50**

**ALL STEEL SIDING SHIPPED FROM FACTORY IN OHIO**

# STANDARD VENTILATORS FOR BARNS AND OUT BUILDINGS



These handsome highly ornamental Cupolas ventilate the building on which they are placed. Constructed of heavy galvanized steel sheets, all nuts and bolts galvanized. They are practically indestructible and much superior to wooded cupolas that require frequent repairs and painting.

Standard Cupolas are screened to keep out birds and are built on approved scientific principles. They create a movement of air upward that draws out all impure air without creating draughts. They insure a supply of fresh pure air in the building at all times. Their action is not interrupted by the vagaries of wind or weather. They will earn their cost many times over. Weather vanes are furnished of appropriate design and finished in pure gold leaf that will not tarnish.

**STANDARD CUPOLAS ARE FURNISHED IN THE FOLLOWING SIZES**

| | Base | | Height | Price |
|---|---|---|---|---|
| No. A | 24x24 in. | 16 in. ventilating flue, | 6 ft. | $ 8.50 |
| No. B | 27x27 in. | 18 in. " " | 7 ft. | 11.00 |
| No. D | 36x36 in. | 20 in. " " | 9 ft. | 20.50 |
| No. E | 46x46 in. | 24 in. " " | 11 ft. | 23.00 |

Larger sizes priced on application. In ordering sizes A or B be sure and mention pitch of roof.

## ROUND RIDGE ROLL **55c**

No. E-706. Galvanized Ridge Roll, 1½ in. diameter of roll, girt 8 inches. Comes in 10 feet lengths only. Price per 10 foot piece...

NOTE:—The price on zinc which is used in galvanizing has advanced in price from 4¾c per pound to 25c per pound, due to the extraordinary conditions created by the present war. The price may go down and if so, we will promptly refund the difference. If the price advances, we will notify you before shipping.

# Pressed Steel Sidings—Stone and Brick Face

Rock-Face Stone Steel Siding.

## ROCK-FACE STONE STEEL SIDING

Rock-Face Stone Steel Siding is a matchless imitation for rock face stone, and makes a most attractive and handsome sheet metal cover. It is especially adapted for store fronts. It is carried in both painted and galvanized.

A square consists of 8½ sheets.
No. P 931. Painted, per sheet, 28x60 in.. **$0.63**
Painted, per 100 square feet..... **5.40**

# PRESSED CORRUGATED STEEL ROOFING AND SIDING

## Both Painted and Galvanized, Shipped Direct From Davenport or Steel Mill in Ohio

No. E 700 Corrugated Steel Metal Sheets

The above illustration shows our corrugated sheets of steel with 2½ inch corrugations from center to center and ⅝ inch deep, made of standard gauge steel. We furnish these sheets either painted or galvanized at prices quoted below. Sheets before corrugated measure 26 inches wide and cover 24 inches from center to center of outside corrugation. In ordering please keep in mind that while these sheets are 26 inches before corrugated, only have a covering space of 24 inches wide. In ordering please give us length of rafter.

Note—In giving the price per 100 square feet on Steel Roofing we wish it understood that this does not include the lap. Our sheets are 26 inches wide, but after lapping have an actual covering space of 24 inches. All Steel Roofing should be lapped at least 3 inches at the ends, but this will vary according to the lengths of rafters and the lengths of sheets used. In general, we would advise adding 10 per cent for lapping when figuring Steel Roofing by the square.

The prices on Steel Roofing are those in effect at the time this catalog was issued. We reserve the right to change these prices on Steel Roofing.

**PRICE PER SQUARE**

Painted ..... **$4.50**
Galvanized..... **6.25**

### NET PRICES AT STEEL MILL IN OHIO

No. E 700. Corrugated Sheets—Standard Gauge—Painted Both Sides.

No. E 701. Corrugated Sheets—Standard Gauge—Galvanized.

Length and price per Sheet.....6 ft., **81c** 8 ft., **$1.08** 10 ft. **$1.35**

**WEIGHTS**— Painted weighs about 68 pounds to 100 square feet; Galvanized weighs about 82 pounds to 100 square feet.

## New Metal Batten

End view showing Batten closed.

End view showing Batten open with seasoning of timber.

A Perfect Batten for barns, garages and out buildings. No waste—no loss, easily applied. Batten expands and contracts with the swelling and shrinking of the siding. They are efficient, economical and practical. Battens are galvanized. Comes in 6, 8 and 10 ft. lengths, 2⅛ inches wide.

No. E 451. Metallic Battens. Price per 100 lineal ft. **$1.40**
6 ft. lengths..... **8½c**
8 ft. lengths..... **11½c**
10 ft. lengths..... **14c**

NOTE:—The price on zinc which is used in galvanizing has advanced in price from 4¾c per pound to 25c per pound, due to the extraordinary conditions created by the present war. The price may go down and if so, we will promptly refund the difference. If the price advances, we will notify you before shipping.

## Expanded Metal Lath PER SQ. YARD.... 21c

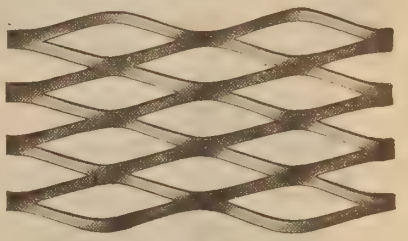
### Extra Heavy, 26 Gauge, Painted Both Sides

Our Expanded Metal Lath will absolutely clinch and hold mortar. This is the one great point of any metal lath. It is impossible to plaster our metal lath without securing a perfect key with sufficient mortar on the reverse side to make this a certainty.

Especially adapted for use under stucco. You can depend upon its entire satisfaction for outside or inside use on walls.

The closeness of the mesh and the abundance of key make it possible to attach other features of construction without injury to the wall or other portions furnished in Lath and Plaster. In other words, it is possible to nail base boards, door and window trim, mouldings, etc., to the expanded metal walls without harm to any portion of the work. Weight of lath is 2.3 lbs. per square yard.

Metal lath shipped from Davenport or Steel Mill at Pittsburg.



### PRICES EXPANDED METAL LATH

| Catalog No. | Size of Sheet | Number of Sheets in a Bundle. | Painted Gauge | Approx. Weight per square yard | Price per sq. yard in bundle lots | Price per square yard in less than bundle lots |

## READ WHAT USERS SAY AFTER 10 YEARS

NOTICE THE DATES ON THESE LETTERS

Cooperstown, North Dak., Oct. 1st, 1907.

Gordon-Van Tine Company,
Davenport, Iowa.

Gentlemen—Goods ordered from you this summer got here in good shape, and I am well satisfied. The two-ply roofing I had from you is just the thing to put on the roof. I will use nothing else after this, as I believe it will last longer than shingles, and cheaper too. I will have some more of it next summer.

Use this letter if you like.

Respectfully,
S. Olgard.

Cooperstown, North Dakota, July 1st, 1916.

Gordon-Van Tine Company,
Davenport, Iowa.

Dear Sirs—Roofing I ordered from you years ago is just as good today as when I put on. It was a three-ply roofing, and I would not advise anybody to use anything else. I put it on some outside buildings with a sixteen-inch pitch, but I have never seen a drop of water going through it yet, and the way it looks today it ought to last another fifteen years.

I, for my part, will use nothing else if I build again, as it saves a lot of work and money.

I intend to side up all of my granary with it this fall if I get a crop—the only stuff that will keep water out.

You may send me a few samples if you have any.

Yours truly,
S. Olgard,
R. R. Route No. 2.

Portland, Maine, Dec. 20th, 1907.

Gordon-Van Tine Company,
Davenport, Iowa.

Gentlemen—Yours of the 17th received. I thank you for the order blank and shall send you another order in the early spring. The last order shipped on roofing was O. K. and just as represented in your catalog. I call it the **most best** roofing for a small amount of money that I have ever heard of to lay on my roofs. I shall recommend it to my friends, **as I have already,** and you will receive an order from them when spring comes.

Wishing you the compliments of the season, I am,
Yours truly,
(Signed) T. M. Tolman,

Portland, Maine.

Gordon-Van Tine Company,
Davenport, Iowa.

Gentlemen—The roofing paper bought of you is still doing good business—not a leak as yet. I don't remember when I bought it, but it was a number of years ago.

Respectfully yours,
(Signed) T. M. Tolman.

Stratham, N. H., Aug. 5th, 1916.

Gordon-Van Tine Company,
Davenport, Iowa.

Dear Sirs—Your letter received and noted. Pardon me for delaying to reply sooner.

By your request, I gladly reply by saying I am surprised with the durability of the paper roofing I got of you.

Twelve years ago I put it on a hen house (what they call a flat roof), and it appears as good as the day it was put on. It being only one ply and no paint, it certainly goes beyond my expectations for durability.

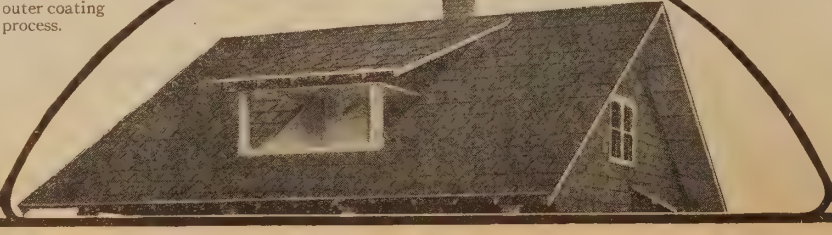
Please accept these few simple facts from
Yours truly,
(Signed) David Jewell.

## How Gordon-Van Tine Roofing is Made

GORDON-VAN TINE Roofing is made by a process different from that used to produce other roofings. As a whole the method of manufacture is similar; in detail it is different—sufficiently different to give it the extraordinary wearing and long service qualities that make it the permanent protection it is. Like other roofings it is made on an all-wool felt basis which is saturated with pure asphalt. But—and here is the point—Gordon-Van Tine Roofing is made in the only factories in the entire world where the asphalt is melted by direct heat at enormous temperatures and driven into every pore and interstice in the basic material. The moment the newly treated felt comes from its boiling asphalt bath the result is apparent. Where, before, it tore easily in the fingers, its tensile strength is now already such that one can scarce pull it apart. If you do get it apart, you will find that the saturation is complete—every part of the felt, through and through, is black and heavy with asphalt. You can actually see why Gordon-Van Tine Roofing defies rain, snow, ice, wind and weather.

After its asphalt impregnation the heavily saturated felt passes on through water-cooled rolls under great pressure; the heavy compression packs the felt and asphalt tight together until it has become one tough, compact body, hard and stiff, and virtually indestructible. But this is only the foundation; passing forward, this felt now so heavily loaded with purest asphalt, forced in at high temperature and rolled in under heavy pressure, goes on to its outer coating process.

Once more it is flooded with pure asphalt—this time of a harder quality for surface protection, and at the same time receives its coating of sand, mica, flint or crushed slate, which is once more rolled by heavy rollers into what is practically an imperishable roofing. To fully appreciate every detail of this process, you should



## Send for FREE Samples and Roofing Circular

Gordon-Van Tine Roofing is universally acknowledged to be the highest quality, lowest priced and longest wearing roofing sold for houses, barns, sheds and buildings of any kind. Its exceptional strength, staying qualities, durability and marked resistance to any and all weather conditions have combined to give us the most enormous "direct-to-user" roofing business in the entire world. Gordon-Van Tine Roofing being sold direct to *you* by mail, without any expense of retailers, travelers or agents, can be bought at savings immeasurably greater than you can possibly make buying on any other plan.

# Price Corrections in This Catalog

**Owing to war conditions existing to-day, we have found it necessary to change a few prices in this Catalog. In only a VERY FEW instances are the prices changed and then only because a sudden demand absorbed our stock on hand.**

**This Catalog was printed the latter part of January and these changes were made latter part of April. We are explaining frankly so you will understand fully. It is Gordon-Van Tine's policy to protect its customers against high prices.**

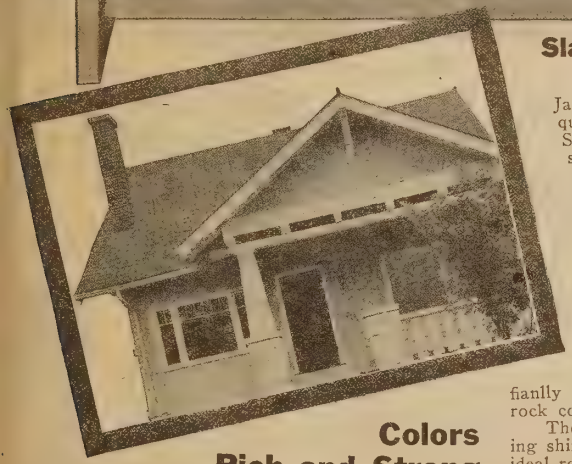
# Jap-a-Top SHINGLES
## Guaranteed for 15 Years



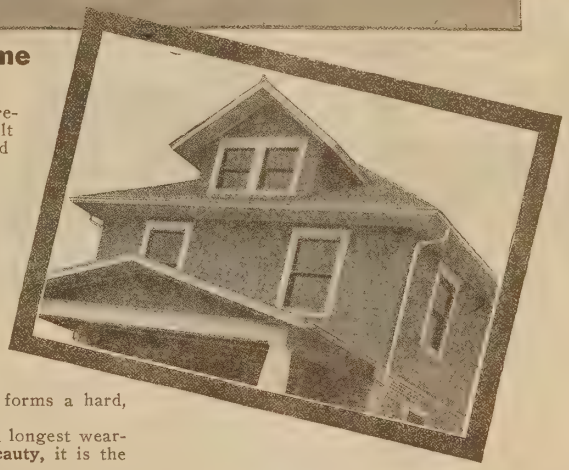
## Slate Surfaced--Asphalt Shingles--Come in Two Colors—Red and Green

Jap-a-Top Asphalt Shingles—Slate Surfaced—never require paint or stain. Absolutely the best asphalt Shingles money can buy. Cost no more than wood shingles and last longer.

Made on an all wood felt basis, which is saturated with pure asphalt. Jap-a-Top shingles are made in the only factory in the entire world where the asphalt is melted by direct heat at enormous temperature and driven into every pore of the felt.

After this asphalt impregnation it is cooled and rolled under heavy pressure until it is one compact body, hard and stiff and virtually indestructible. But this is only the **foundation.** It is now given successive coatings of **pure Trinidad asphalt** and finally the **chipped slate** is rolled by heavy rollers until it forms a hard, rock coat that is truly a part of the roofing.

The Jap-a-Top Shingle is not only the most durable and longest wearing shingle made, but from the standpoint of **permanent beauty,** it is the ideal roof covering for the home.



## Colors Rich and Strong

The colors are absolutely as permanent as you would expect natural crushed slate to be. These shingles come in two colors—a dull, rich red and a soft grayish green. The colors are not harsh, but richly soft and wonderfully attractive. The colored illustrations here are shown as nearly like actual roofing as it is possible to produce.

With the washings these shingles receive from rains, they retain their freshness and lustre. They will never change color; for they are the natural color of the slate and not dipped or painted. Once laid, they require no further attention.

## Easy To Lay

Jap-a-Top Shingles are 8x12¾ inches in size and reach you in boxes. They weigh about 220 lbs. to the square. They should be laid half an inch apart and 4 inches to the weather, using ordinary roofing nails. When thus laid they form a water-proof roof of three thicknesses. Being even and uniform in size, they can be laid quicker and cheaper than wood shingles. They do not turn black, nor crack with age, but retain their handsome appearance indefinitely.

Jap-a-Top Shingles may be applied to any slanting roof on which wood shingles can be used and will outwear wood shingles by many years. Furthermore their beauty and color is permanent, and they can't catch fire.

## A Roof That Can't Communicate Fire

Flying Sparks or cinders cannot set fire to a Jap-a-Top shingled roof. It's a non-conductor of heat and cold, which means a fuel saving in the warming of your house. Not affected by freezing and thawing—will never warp, check or chip.

# JAP-A-TOP Plain Edge

## Rolled Roofing—Slate Surfaced Permanent Colors—*The Roof for Farm Homes, Barns, Etc.*

JAP-A-TOP ROOFING
SLATE SURFACED
FIRE PROOF
GUARANTEED 15 YEARS

THE tendency of modern building is toward slate surfaced roofing because of its permanent *durability*, its *beauty* of appearance, its *fire-proofing* qualities, and its economy. Jap-a-Top slate surfaced Roofing is the *longest-wearing* and most durable of any roll roofing made. Its permanent colors and substantial wearing qualities adapt it to the finest residences. Its cost is sufficiently *low* to permit its use on all classes of houses, barns and other buildings where a permanent *fire resisting* roof is needed or desired. *Jap-a-Top* is *guaranteed for fifteen years*, under our famous legal binding guarantee of *satisfaction or money back*. It is non-fading, stands the *test of severest climatic conditions*, and is easy to lay.

*JAP-A-TOP* is the ideal roofing for the farm. It is made from *extra heavy felt*, saturated with *pure asphalt*. The weather side of this asphalted felt is thickly covered with chipped slate especially selected for rich, natural color. Tremendous pressure imbeds this chipped material deep in the asphalt covering. Rolled in under tremendous pressure, it becomes a part of the base itself and will not come off.

The colors are the natural shades of the slate itself and *will not fade nor wash out.*

Flying sparks or cinders *cannot* set fire to a Jap-a-Top covered roof. The importance of this point on the farm where fire protection is at a minimum is one which cannot be overestimated.

### "50% Better—More Than ⅓ Cheaper"

Council Bluffs, Iowa, Sept. 22, 1915.

Gordon-Van Tine Company, Davenport, Iowa.

Gentlemen: It may be of some interest to you to know that we consider the Diamond Point Roofing we received from you to be about 50% better than expected. It looked so good to some fellow without conscience that he stole one roll of it before we got a chance to use it, making it necessary for us to send for another roll. Inclosed find draft for the amount, $3. Please forward the roll at once, as the work cannot be completed until it arrives.

Lumber dealers here are selling an inferior quality of diamond point stuff at $5.50 a square. When contrasted with yours no other argument is needed—50% better and more than ⅓ cheaper—is unanswerable

Sincerely,

G. N. MARTIN.

Jap-a-Top is a *non-conductor of heat and cold* and means a *fuel saving* in the warming of your house.

You can lay Jap-a-Top roofing *yourself*. It comes in rolls and is easily put on. No experience is required. Our *wholesale prices* and our direct-to-you plan of selling make Jap-a-Top the cheapest roofing on the market as well as the longest wearing.

We furnish roofing nails *free*—large headed *galvanized* roofing nails. Also plenty of cement for seams. Each roll of roofing contains 108 square feet which allows an overlap or seam of two inches.

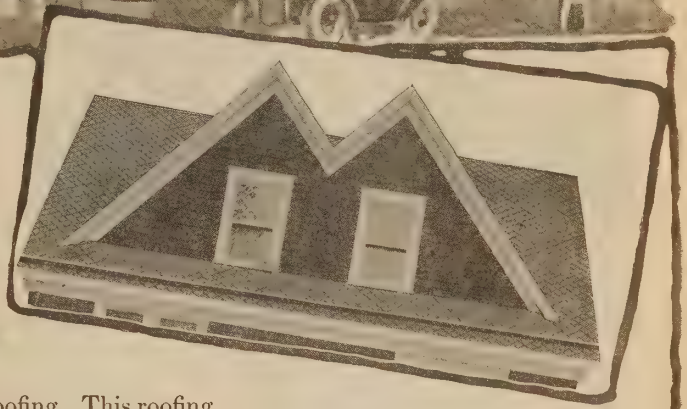
### Price Per Square in Rolls

Shipped from Davenport or Chicago Warehouse

| Catalog Number | Color | Price per Roll |
|---|---|---|
| E760 | Red Slate | $2.35 |
| E761 | Green Slate | 2.35 |

JAP-A-TOP
DIAMOND
POINT ROOFING
TWO COLORS
RED & GREEN

# JAP-A-TOP Diamond Point Roofing—Slate Surfaced Permanent Colors—*An Ideal Roof for City Houses.*



FOR city homes we particularly recommend our Jap-a-Top Diamond Point Roofing. This roofing comes in rolls. When laid it gives the shingled effect—as shown in the photograph in the right hand corner. This roofing is furnished in two colors, red and green. These colors are *permanent*, and are given by the *slate itself*, which is *imbedded in the asphalt*.

It costs much *less to lay* Diamond Point roofing than shingles, as it goes on from the roll. Inexperienced help can lay a *perfect straight-line job* that has no amateurish look about it when completed. Note the picture. Each strip has a *sawtooth edge* with notches about 3 inches deep. This is the part which is exposed to the weather. The rolls are 32 inches wide and 48 feet long and contain two strips, each 16 inches wide, of which 12½ inches is ordinarily exposed to the weather. By lessening the portion exposed to the weather, *highly artistic effects* can be worked out as well as making the roof *much more* substantial. It must not be forgotten, however, that even with a 12½ inch exposure to the weather, Jap-a-Top Diamond Point Roofing is *longer wearing and more economical than wooden shingles.*

Wherever Jap-a-Top Diamond Point Roofing once secures a foothold on a single home, its use spreads rapidly. This has been the case in Boston, Buffalo, Cleveland, Detroit, Chicago, Milwaukee, Waterloo and many other American cities. Covered with crushed slate, its *ECONOMY, DURABILITY, BEAUTY AND FIRE-RESISTING PROPERTIES* make it unquestionably the coming roofing of universal use.

## PRICE OF JAP-A-TOP POINT ROOFING DIAMOND

To cover 100 square feet laid 12½ inches to the weather

| Catalog Number | Color | Price per Roll |
|---|---|---|
| E786 | Red Slate | $3.00 |
| E787 | Green Slate | 3.00 |

Polk, Iowa, April 12, 1916.

Gordon-Van Tine Company, Davenport, Iowa.

Gentlemen:—Some time ago, I bought of you some two-ply roofing, which I have used to cover a corn crib and find it very satisfactory.

Yours truly,

(Signed) JOHN BOGANWRIGHT.

Polk, Iowa, July 16, 1916.

Gordon-Van Tine Company, Davenport, Iowa.

Dear Sirs:—I have used roofing bought of you on buildings for a great many years, and have found same entirely satisfactory.

Yours truly,

(Signed) JOHN BOGANWRIGHT.

Lisbon, Iowa, Aug. 3, 1907

Gordon-Van Tine Company, Davenport, Iowa.

Gentlemen:—Yours at hand. Am highly pleased with your roofing I think it is alright—I think it is well worth the money and more too, and will put some more on when needed.

Yours,

(Signed) J. E. MOORE.

Lisbon, Iowa, June 28, 1916.

Gordon-Van Tine Company, Davenport, Iowa.

Gentlemen:—Yours of the 26th. In reply, the roofing I bought from you is giving fine service and looks good yet. If I needed any more roofing, I would try and get the same roofing.

Yours,

(Signed) J. E. MOORE.

# Ambler Asbestos Shingles "Century" Brand

A Bungalow Roofed and Sided with Ambler Asbestos Shingles. This Shows Well the Beautiful Effects Obtainable.

## The Original GENUINE Asbestos Shingles

## Absolutely Fire-proof, Weather-proof, Wear-proof. The Roof Everlasting

Century Asbestos Shingles—The everlasting roof—fire-proof, weather-proof and wear-proof. In use on the finest public buildings and residences the world over. Over 200,000,000 used annually.

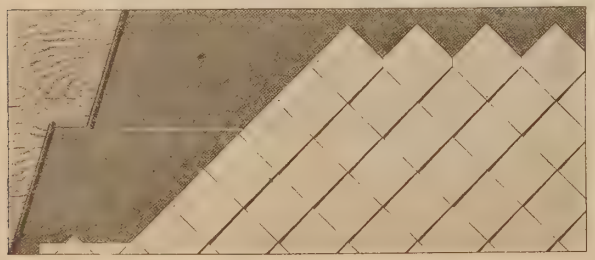
These multi-ply shingles are built-up, layer upon layer, of a composition of pure fibre asbestos and cement. This composition is first rolled out in sheets, which are cut and piled, each sheet with the grain at right angles to the one below. Then they are subjected to enormous pressure at a high temperature and fused into an absolutely non-warping shingle that will never crack or chip.

All other asbestos shingles are single-ply, and consequently brittle and warp easily. Insist on **the original Century Asbestos** shingles, which absolutely overcome these difficulties.

## You Can Build A Bon-Fire on Your Roof

Century Shingles are absolutely fire-proof. You can build a bon-fire on your roof without injuring the shingles in the least—they simply will not catch fire—there's nothing to burn about them.

Cold and snow, rain and heat does not affect them—they "Outlast the building"—roof your home once and for all—first cost is final—no "up-keep," no staining or painting, no leaks and **no fires.**



**"Guaranteed for the life of the Building."**

The cut above illustrates Century shingles laid according to the French method. These shingles are carried in stock in the popular Newport gray at Davenport and priced in column to the right.

Century shingles are also made in the honeycomb style, and square butt or American style, and in slate gray and brick red colors. These are shipped from factory in Pennsylvania, and are priced somewhat higher than the French style above. Write for prices.

Whichever shingles you choose, you must order **starting** shingles, and **ridge roll** sufficient for your roof. Be sure and include these items in your order.

Ambler Asbestos Shingles are so well made and so thick and heavy that they require a special roof construction. The roof sheathing must be solid, and a layer of one-ply slaters' felt applied. Over these the shingles are applied. Complete instructions are contained in each shipment.

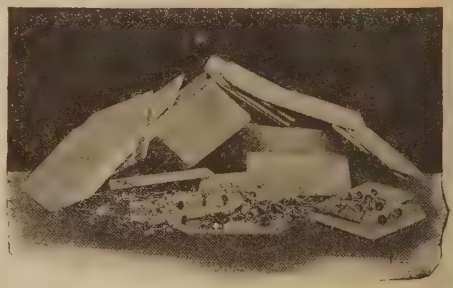
**How Ambler Shingles Lasted Out the Galveston Tornado.**

Galveston, Texas,
2518 Ave. F.
Sept. 1st, 1916.

Dear Sirs:—

It no doubt will be exceedingly gratifying to you to know that Ambler Asbestos Shingle roofs came through our last storm 100 per cent undamaged. Sheet metal shingles was its closest rival, then tin roofs, tile, slate, corrugated iron and lastly asphalt paper shingles and roofing.

C. PUCKETT,
2518 Avenue F.



**Complete in One Shipment, Ready to Lay.**

# FLINT SURFACED ASPHALT ROOFING

## HEAVILY SURFACED WITH FLINT SAND

This roofing which is made in three different weights for use on different classes of buildings, is heavily surfaced on one side with clean flint sand and on the other side with mica and, from the nature of its making, offers great resistance to fire. As an inexpensive roofing for residences, barns, stores, etc., the use of the 3-ply weight is to be recommended. Where a cheaper roof is desired, the 2-ply may be used. The use of the 1-ply is to be advised only on temporary buildings, sheds, outbuildings, etc.

### Thoroughly Impregnated with Asphalt

Our Flint Surfaced Asphalt Roofing is guaranteed to be made from a long-fibre felt and impregnated with an asphalt composition that is absolutely free from deteriorating animal oil and that is warranted not to melt or run in summer.

There is

### No Oil or Coal Tar

in its entire make-up which fact alone helps to make it more fire-resisting and water-proof. Our flint surfaced roofing is 32 inches wide and put up in rolls containing 108 square feet. These rolls have a guaranteed covering surface of 100 square feet, the extra 8 square feet being given you free to ensure a perfect 2 inch lap.

### Needs No Coating or Painting

Like our other roofings, our Flint Surfaced Asphalt requires no painting and is very much cheaper than wooden shingles. It can also be put on easier and more quickly. This roofing meets the demand for a high-grade flint surfaced roof covering, and, being made in the three weights, enables you to buy what you want at the price you want to pay—depending upon the purpose for which you intend using it. Quality for quality, you will find these prices the lowest ever offered.

**FREE!**

**With every roll, we furnish free plenty of large-headed GALVANIZED, barbed roofing nails and sufficient cement to lay this roof together with full directions for laying. If this roofing is to be used over shingles be sure to ask for 1¾ inch nails, otherwise ⅞ inch nails will be sent. We guarantee quick delivery. Freight charges are low.**

# QUALITY RUBBER

2½PLY $1.80

## Guaranteed Roofing—The Best That Money Can Buy!

### AN ASPHALT ROOFING HEAVIER BY ½-PLY THAN YOU CAN BUY ELSEWHERE.

**OUR "QUALITY" ASPHALT RUBBER ROOFING** is heavier, thicker and stronger than any Roofing you heretofore have been able to buy. It is made and priced in 1½, 2½ and 3½-Ply. Weighs 5 pounds to the square heavier than the usual 1, 2 and 3-Ply. We offer you a roofing that will outwear tin, tar or gravel and stand as long as the average shingle roof. It is made of heavy, strong, long fibre felt, thoroughly saturated with asphalt.

**It is elastic, pliable and tough. Not affected by changes of climate.** Roof your house, farm buildings and out-buildings with this roofing. **It is the best permanent protection for houses, barns, sheds, etc.**

**IT'S GUARANTEED BY GORDON-VAN TINE CO.**

Notice the guarantee shown in prices given below. 1½-Ply guaranteed for 7 years, 2½-Ply for 10 years, and think of it, the 3½-Ply for 12 years.

**BEWARE OF LIGHT WEIGHTS!**

Be sure that you get the weight of roofing that you purchase; whether you buy from a dealer or some one else. Our Quality Roofing is extra heavy. 1½-Ply weighs 40 pounds, 2½-Ply 50 pounds and 3½-Ply 60 pounds.

**DO NOT USE TAR ROOFING!**

There is not an ounce of tar or rosin in the Gordon-Van Tine "Quality" Roofing. **Asphalt,** the marvelous mineral substance which forms the base of this Roofing, is the most remarkable preservative for roofing that has ever been found. Modern science, with all its achievements, has never found anything better than asphalt for roofing purposes.

**THE ROOF THAT'S PROOF AGAINST:**
**Heat, Cold, Snow, Rain, Wind and Sparks**

Any Roofing that has the above qualities, is bound to meet the demand of people wanting an extra quality of prepared roofing for high class residences and other buildings.

Unaffected by the conditions of the weather; **either Heat, Cold, Snow or Rain.** Impervious to the action of acid, gases and fireproof against flying sparks and embers. **Easy to Lay. Inexpensive to Maintain.**

**PRICE COMPARISON—(16 Square Roof)**

| ★ A ★Shingles | | "Quality" Roofing, 3½-ply. |
|---|---|---|

| $104.00 | Against | $33.60 |

**Samples Sent Free on Request**

### Don't Buy Roofing Without Making Tests

On page 81 we show you four remarkable tests that you can make yourself without any trouble. There can be but one result, and that will satisfy you that the "QUALITY" Roofing is the best roofing you can buy.

These four tests, simple as they are, will tell you the difference between good and bad roofing.

**We guarantee every roll of "QUALITY" Rubber Roofing for 7, 10 and 12 years, according to the ply. You are not taking any chance in purchasing this Roofing.**

**TO REDUCE YOUR FREIGHT CHARGES!**

In order to reduce freight charges and avoid delays in transit, we will fill your order from the warehouse nearest you. **We maintain warehouses and shipping facilities on roofing in Davenport and Chicago.**

The price is the same no matter from which point your Roofing is shipped.

**TAKES LOW RATE OF FREIGHT!**

A roll of 1½-Ply Rubber Roofing can be shipped 500 miles for only 13 cents freight charges; 2½-Ply for only 17 cents; 3½-Ply for only 20 cents.

**Thus the freight charges are insignificant compared to the saving we make you in price.**

### WE FURNISH ROOFING NAILS AND CEMENT FREE!

With every roll of "QUALITY" Roofing we furnish large headed galvanized roofing nails and plenty of cement for lapping seams or joints. Each square contains 108 square feet, thus allowing for laps, so that each roll will cover 100 square feet.

If you are going to lay this roofing over an old shingle roof, it will be necessary to use the 1¾-inch nails, otherwise ⅞-inch nails will be sent. Be sure to make special request for 1¾ inch nails if roofing is to be laid over shingles.

# BARGAINS IN BUILDING PAPER

***All prices on Building Paper and Felts are subject to change without notice. Orders will be priced at lowest possible prices when received. This action is forced upon us by war conditions.***

## Deadening Felt

No. E 358
Price per roll, containing 50 sq. yds., 36 in. wide. Weight, about 50 lbs. to the roll.
**$3.00**

We Cannot Ship Less than a Roll

## Tarred Felt at Cut Prices

The extremely low price at which we sell Tar Felt—3c per pound in full rolls—is no reflection on the quality, which we guarantee to be the best. We do not call it "roofing," like many firms we could name. We sell it for exactly what it is—a satisfactory material for temporary roofs and siding, at trifling cost. We cannot ship less than a roll.

Our TARRED FELT Comes in About 46 to 50 Pound Rolls.

No. E 357. G. V. Brand Tarred Felt, weight 15 lbs. to 100 square feet; about 50 lbs. to a roll. A roll of Tarred Felt will cover from 300 to 350 square feet. Price per roll..... **$1.75**

Prices on Building Paper and Tar Felt subject to market changes.

## ROUND RIDGE ROLL

No. E 706. Galvanized Ridge Rolls, 1½ in. diameter of roll, girt 8 in. Comes in 10 ft. lengths only. Price for 10 ft. piece..... **55c**

## Waterproof Building Paper

Black Waterproof Building Paper keeps your buildings warm on cold days, cool on warm days and always stays dry.

Make Your Screen Doors into Storm Doors. Use under Stucco Walls and siding.

Comes in rolls 36 inches wide, containing 500 square feet.

## Red Rosin Sized Sheathing

We sell thousands of rolls of high grade Building Paper for use in house building in all parts of the United States.

It is absolutely the best value in Building Paper obtainable, and lasts as long as the building. We do not handle the shoddy, rotten goods that flood the market, because such paper does not pay at any price. You will save many times the cost of our Red Rosin Sized Sheathing in your fuel bill.

Never expose to weather. We do not cut rolls of Building Paper.

No. E-353. AA Brand Red Rosin Sized Sheathing is a strong, smooth finished paper, put up in rolls of 500 square feet, weighing about 32 lbs. to the roll. Price per roll..... **$1.44**

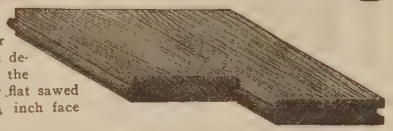
No. E-354. A Brand Red Rosin Sized Sheathing is the same brand as AA Brand, but not quite so heavy. Put up in rolls of 500 square feet, about 27 lbs. to a roll. Price per roll..... **1.22**

No. E-356. C Brand Red Rosin Sized Sheathing is a durable, low-priced paper. Put up in rolls of 500 square feet. Price per roll..... **.81**

# Flooring, Ceiling, Wainscoting and Finishing Lumber

## Save Half Your Freight Charges by Making Up Car of Millwork and Lumber

## Yellow Pine and Fir Flooring



**YELLOW PINE FLOORING** is carried in two kinds, namely: "B and Better Edge Grain" and "B and Better Flat Grain." Both kinds are clear and practically free from defects and will lay without waste. Edge Grain is sawed with the grain and is sometimes called Straight Grain. Flat Grain or flat sawed is not sawed with the grain. Yellow Pine Flooring is 3¼ inch face and comes in random lengths from 10 to 16 feet.

**FIR FLOORING** is carried in both 13-16 inch and 1¼ inch thickness in 1st Clear Best Grade only. Fir Flooring is the ideal covering for porch floors, kitchens and rooms where hardwood flooring is not desired. Fir flooring is 3¼ inch face and comes in random lengths from 6 to 16 feet.

**IMPORTANT, NOTE**

In ordering be sure to allow ¼ for waste in cutting and laying and the difference in width, as this flooring is figured as 4 in. wide. Yellow Pine Flooring weighs 2,000 pounds per 1,000 feet. Fir Flooring ⅞ in. thick weighs 2,000 pounds per 1,000 feet. Fir Flooring 1¼ in. thick weighs 2,200 pounds per 1,000 ft.

### PRICES ON YELLOW PINE FLOORING

| Catalogue No. | Grade | Trade Size | Finished Size | Thickness | Per 1,000 Feet Board Meas. |

| 1¼ | x | 8 | Not Carried | .59 | .69 | .79 | 55.00 |
| 1¼ | x | 10 | " | .75 | .88 | 1.00 | 56.00 |
| 1¼ | x | 12 | " | .90 | 1.05 | 1.20 | 56.00 |
| 2 | x | 6 | " | .90 | 1.05 | 1.20 | 70.00 |
| 2 | x | 8 | " | 1.20 | 1.40 | 1.60 | 70.00 |
| 2 | x | 10 | " | 1.50 | 1.75 | 2.00 | 70.00 |
| 2 | x | 12 | " | 1.60 | 2.10 | 2.40 | 70.00 |

1 inch Thick is surfaced to ¾ inch Thick. 1¼ inch to 1⅛ inch. 2 inch to 1⅝ inch.

## OAK FINISHING LUMBER

### Clear Grade, Surfaced Two Sides

We only carry one grade of Oak Finishing Lumber, known in lumber terms as first and second clear. Up to five inches in width is practically free from all serious defects. Wider than five inches will allow a small number of defects in proportion to the width. Will finish from ⅛ to ⅝ inches scant on full width measurements, specified in table below. We show prices on each piece and also on 1,000 feet random lengths. Oak Finishing will weigh approximately 3,500 pounds to the thousand board measure feet. Split or checked ends are not regarded as defects.

No. E 952. PRICES ON RED OAK FINISHING LUMBER

| SIZE Thickness Inches | | Width Inches | Price per Piece 8 Feet | 10 Feet | 12 Feet | 14 Feet |
|---|---|---|---|---|---|---|
| 1 | x | 6 | $0.31 | $0.39 | $0.47 | $0.56 |
| 1 | x | 8 | .42 | .52 | .64 | .74 |
| 1 | x | 10 | .54 | .67 | .81 | .96 |
| 1 | x | 12 | .68 | .85 | 1.03 | 1.22 |

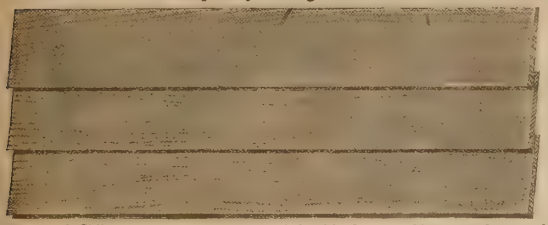
No 1¼ carried in Plain Red Oak. 1 inch Thick is surfaced down to ¾ inch Thick.

# Siding, Lath and Shingles at Saw Mill Prices

## Can be used to make up Carloads from Davenport with Millwork and Save Freight

**SIDING, LATH and SHINGLES, together with the Flooring, Ceiling and Finishing Lumber can be loaded in with Millwork, and an average house bill will make a small car, which will save you at least one-half in your freight charges.**

**We do not ship any Rough Lumber from our Davenport yard, as this is carried in stock in our St. Louis distributing yard.**



Bevel Siding, sometimes called Lap Siding or Clapboards, is carried in Red Cedar, and Western or White Pine.

The Siding is carried in ½x4 inch and ½x6 inch and comes in random lengths 4 to 18 feet. Only a very small percentage of 4 to 10 feet and this works up very easily between door and window openings.

### How to Figure Amount of Siding Required

Four inch Siding lays with a waste of one-third and six inch Siding lays with a waste of one-fifth. If you need Siding to cover an area 10x10 ft. this figures 100 square feet, and you should order the following:

4 inch Siding 100 square feet, plus one-third equals 134 ft.
6 inch Siding 100 square feet, plus one-fifth equals 120 ft.

### PRICES WHITE PINE SIDING

| Catalog No. | Grade | Thickness | Width | Price per 1,000 Feet Surface Measure |
|---|---|---|---|---|
| E 880 | Clear | ½ inch | 4 inches | **$28.00** |
| E 881 | Clear | ½ inch | 6 inches | **28.00** |

White Pine has been used for siding so many years a description is unnecessary. Many builders will use nothing else, both because it works easily, takes paint well and lasts a lifetime.

We carry White Pine Siding in both 4 and 6 inches random lengths.

### GRADING RULES White Pine Siding Clear

White Pine Siding consists of "B" and all the better products of the stock. This siding is practically clear, but admits of two or three small sound tight knots not to exceed one-half inch in diameter, well scattered over the face of the piece, or in the absence of knots, a small amount of blue stain, or a slight trace of pitch, if local. This siding is called clear in retail yards, and will meet your expectations in every way.

## Metal Building Corners for Wood Siding

Inside of Angle

Outside Corner

Every carpenter knows what a particular job is to cut and bevel the end of weather boarding in order to make a perfect mitered corner. It takes time and time is money.

By using our metal building corners, a perfect mitered corner is secured with an immense saving of labor. (Fully $2.00 on each corner.)

These corners are made of galvanized iron shaped to fit the bevel corner formed by the siding and are pierced with nail holes. The lower edge is overlapped making a tight joint at the lower edge of the boards.

Note the two illustrations at the left showing how the corners are applied. These come in two sizes: one for 4-in. siding and one for 6-in. siding. Weight per thousand, 4-in., 60 pounds; 6-in., 90 pounds.

Metal Building Corners

| | | |
|---|---|---|
| EH-436. | Outside Corners, 4 inch Siding..Per 100, | $1.60 |
| EH-437. | Outside Corners, 6 inch Siding..Per 100, | 1.60 |
| EH-438. | Inside Corners, 4 inch Siding...Per 100, | 1.60 |
| EH-439. | Inside Corners, 6 inch Siding...Per 100, | 1.60 |

**FOR BAY WINDOWS**—You can use the inside or outside corners shown above and by bending can secure the correct angle.

**NOTE**—Metal corners are put up in packages of 100, and are sold in full package at above price. Less than full package 2c each.

## WASHINGTON RED CEDAR SHINGLES

We carry here in Davenport an immense stock of the very finest Washington Red Cedar Shingles. Especial care is taken in the manufacture of these Shingles, and the grades are even better than you secure in most of the local retail yards.

Shingles are carried in two grades: Extra Star A Star (sometimes called 6 to 2), and extra Clear (sometimes called 5 to 2). See grading rules below.

We give you below the official grading rules under which these shingles are manufactured, but in most cases the shingles are above grade.

**Extra Clear—16-inch**—Variation of 1 inch, under or over, in length, allowed in 10 per cent. Random widths, but not narrower than 2½ inches. When dry, 25 courses to measure not less than 9½ inches. To be well manufactured, 90 per cent to be clear, remaining 10 per cent admits slight defects 12 inches or over from butt.

**Extra Star A Star—16-inch**—Variation of 1 inch, under or over, in length, allowed in 10 per cent. Random widths, but not narrower than 2 inches. When dry, 25 courses to measure not less than 7¾ inches To be well manufactured, 80 per cent to be clear, remaining 20 per cent admits defects 10 inches or over from butt. If not to exceed 2 per cent (in the 20 per cent allowing defects 10 inches from butt), shows defects closer than 10 inches, the shingles shall be considered up to grade.

**Remember that Freights on Lath and Shingles are very low.** Shingles weigh 160 to 180 lbs. to the 1,000.

### PRICES ON SHINGLES

| | | |
|---|---|---|
| No. E 957. | Extra Star A Star, 6 to 2. Price per 1,000 Shingles..... | $3.50 |
| No. E 958. | Extra Clears, 5 to 2. Price per 1,000 Shingles..... | 3.80 |

Extra Star A Star weigh 160 lbs. to the thousand. Extra Clears, 180 pounds to the thousand, Association weights.

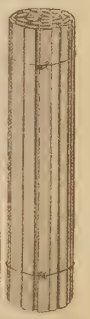
### SHINGLE NAILS

**Our Special Shingle Nail** is an extra heavy gauge, galvanized. Is manufactured from 13 gauge wire and will give you longer wear and better satisfaction. Order these with your shingles. It takes 4 lbs. of nails to lay 1000 shingles.

| | |
|---|---|
| Price SD Galvanized Shingle Nail, E154, Kegs, 100 lbs. | $6.10 |
| In less than keg lots, per lb. | 7c |

## No. 1 CYPRESS LATH

No. 1 Cypress Lath are carried in only one grade, and are finely manufactured, clean, bright stock. We carry at all times an immense stock, and can make you prompt shipments. The Lath are 4 feet in length, and weigh about 500 lbs. to the thousand.



### PRICE ON LATH

| | | |
|---|---|---|
| No. E 959. | No. 1 Cypress Lath, 4 feet. Price per 1,000 Lath..... | $5.50 |
| No. 1 | Cypress Lath, 32 inches. Price per 1,000 Lath..... | 2.75 |

**The prices on this page are for our customers only. We reserve the right to refuse any orders from lumber dealers for these items at these money-saving prices. Prices on building material shown on these two pages are subject to market changes. We do not look for any advance during the life of this catalog.**

**Send for Free Lumber List for Wholesale Prices on Lumber in Carloads or Less. It will save you $300 to $500 Per Car**

# This is the Yard That Saves You $100 and More on a Car of Lumber

**These photographs shown here are the Gordon-Van Tine Company's great lumber yards—the largest independent lumber concern in the United States. You can have all your Lumber wants supplied at a moment's notice and at much less than the retailers' prices, saving you $100 to $300 on a car.**

Loading Cars for Out Shipment

## We Ship Direct From These Yards

Every order we fill goes to the actual user—we sell no dealers whatever. Every car we ship means a saving to the buyer of $100 to $300—because that is what the dealer usually makes on a car. But you can be your own dealer—buy at wholesale and take the profits yourself. On every estimate we specify exactly the grades you will get and we ship you what we specify, and if any shipment is not up to specifications in every way, we agree to refund the amount without question or argument. Our immense lumber yards connect direct with twenty-six lines of railway, affording us splendid facilities for quick shipments.

## BETTER LUMBER

It is a fact that our lumber is better than the lumber handled by most retail dealers, and this is only natural. The retail dealer is handling over his lumber every day, and it is a constant temptation to ship a fairly good "number two" board into the "number one" pile. Thus, HIS GRADES GO DOWN INSTEAD OF UP. Our lumber is graded at the mills according to standard grading rules. When it is received at our yards, it is again carefully inspected. Many pieces that the mill grader puts into number one, we consider slightly off grade and put them in number two. Thus, by our double checking and grading system, OUR GRADES GO UP INSTEAD OF DOWN. We guarantee our grades to be as good or better than the standard grading rules—if the lumber is not fully up to our representations your money will be refunded.

### 15,000,000 Feet of Clean, Dry Seasoned Lumber Sold at Wholesale

Dimension, Heavy Joists and Timber, Drop Siding, Bevel Siding, Ceiling, Flooring, Partition, Wainscoting, Finishing Lumber, Lath, Shingles, Boards, Posts, Poles and Battens, in fact everything in the lumber line. All the finest lumber that ever came out of a saw mill. It is graded in accordance with the grading rules of the Lumbermen's Association. Every stick graded up to the standard and in most cases above the ordinary grade.

# Ceramic Mosaic Floor Tile—Glazed Wall Tile

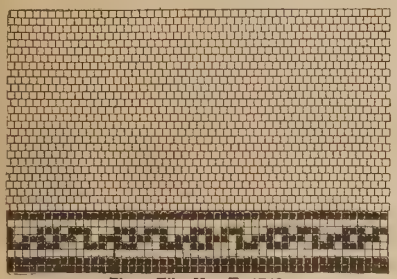
## Sanitary, Artistic, Easily Cleaned, Complete Instructions for Laying

CERAMIC MOSAIC FLOOR TILE is acknowledged to be the cleanest and most sanitary kind of floor that can possibly be laid. It is absolutely dirt proof, waterproof and vermin-proof. Every housewife wants tile floors in her bathroom and kitchen, and our wonderfully low prices and easy methods of furnishing it, now make it possible for everyone to have it.

DRUG STORES, ICE CREAM PARLORS, BANKS, SALOONS—why not have the cleanest, hardest, and most durable floor—the floor that is easiest cleaned and never needs paint or varnish?

Ceramic Mosaic Floor Tile is MOUNTED ON PAPER in the designs illustrated. Each order is filled according to the measurements furnished. **Be sure and send a sketch of your room with the order.** It comes in sheets, all ready to lay, and while care must be used in laying it, any handy man can do the work. We furnish COMPLETE INSTRUCTIONS free with every order.

Ceramic Mosaic Floor Tile can be laid over an old wood floor, but it is better to bed it in cement, according to our regular directions furnished with each order.



Floor Tile No. E 1543

Border 6½ inches wide. Body tile plain white ¾ inch squares. As shown above, per square foot..... **27c**

**All designs of floor tile are furnished in plain black and white, as illustrated, unless otherwise ordered. The tile shown in black can also be furnished in any of the following colors without extra charge.**

Gray, Cream, Salmon, Red, Chocolate or Buff. For pink, light or dark green, light or dark blue—add to total price according to number square feet of border wanted, 10c extra per square foot.

**All Gordon-Van Tine Tile is strictly First Quality. We do not handle seconds.**

### PLAIN WHITE FLOOR TILE

Mounted on paper for any size room, no border included—¾-inch squares, 1-inch hexagons or 1⅛-inch rounds (state which is wanted). Per square foot..**23c**

### GLAZED WALL TILE

**FURNISHED ONLY IN PLAIN WHITE.**

Makes a beautiful, durable and sanitary wall. It is the wall you should have in your bathroom and kitchen. Notice we furnish round edge base and cap—no dust catchers.

The base and cap are figured separately, and the total cost for any wall varies according to the number of angle pieces wanted. If you have any trouble figuring your requirements, send us a sketch of your room for estimate.

Wall tile must be set in cement, similar to the way in which floor tile is laid. We furnish **COMPLETE DIRECTIONS FOR LAYING** with every order.

# "QUALITY" BARN PAINT

## It's the Best Barn Paint that Money Can Buy

### USE GORDON-VAN TINE'S "QUALITY" BARN PAINT

### It Means Success with Your Painting

Your Barn, more than any other building on your place, should be kept well painted, because it's big and prominent, everybody sees it. It's the one best evidence of thrift and of "getting on." You farmers judge each other in this way.

"Quality" Barn Paint will make your barn look good, the paint will keep it so for a long time. It's good paint and we know it. We don't sell anything but good paint.

Our "Quality" Brand Barn Paint is especially adapted for barns and outbuildings, and is equally good for shingle or metal roofs, fences, bridges, grain elevators and silos. It is as weather-proof as it is possible to make a paint and will lengthen the life of shingles and metal roofing. It is a wood preservative and will add years to the life of your buildings.

You may use this paint with perfect confidence and know that we will stand back of every can or barrel. Only the best ingredients are used. It is ground to an unusual fineness and thoroughly mixed and remixed by the most up-to-date machinery.

One gallon of our Barn Paint can be depended upon to cover about 250 square feet of surface two good coats, and in many instances more surface, depending entirely upon the condition of the lumber. Give this paint a trial and you will never regret it.

Never paint your barn in damp or wet weather. Always stir paint thoroughly before using. Stir with a flat paddle from bottom up.

On account of the high prices of lead and zinc, due to the war, the price on Light Gray Barn Paints have advanced materially. See Color Card for prices.

**Mention Name of Color and Catalog No. when you order**

No. P-1151. Venetian Red
No. P-1153. Princess Red
No. P-1152½. Light Gray

See following pages for Colors of Barn Paint

| **$1.00** | **$1.10** | **$1.15** |

# Shingle Stain and Preservative

The use of our Shingle Stain will prevent dry rot and preserve your shingles, and at the same time improve the appearance of your roof. So at a very trifling cost you accomplish all these things. It costs money to re-shingle your roof, so too much stress cannot be laid on the necessity of preserving your roof against the elements of the weather. The use of our Shingle Stains will add many years to the life of your roof.

Our Stains have been made from a formula that has been proven correct, and is the result of many years test. Creosote is the best preservative for woods of all kinds. This is proven by the fact of the railroads using it on timbers, ties, etc.

### Shingles can Either be Dipped or Painted

You can either dip the shingles into the stain or apply with a brush. On new roofs we advise dipping if possible, but on old roofs put on with a brush.

When applied with a brush, one gallon will cover about 150 square feet of surface one coat, or 100 square feet two coats. When dipped, 2½ to 3 gallons will cover 1000 standard shingles. It is only necessary to dip two- thirds of the surface of the shingle.

# Roof Preservative

Preserves Steel or Felt Roofing from the action of the weather and will make your roof last many years longer. It is a real roof preservative, not a cheap "Tar" paint, is made of asphalt and "takes hold" of any surface, metal, wood or felt, and never "lets go." It forms as nearly as possible a water-proof, acid or alkali and fire-resisting coating.

### Our Roof Preservatives Do Not Contain Coal Tar

The basis of this product is asphalt, which is practically indestructible by the agency of water and is unequalled for preserving prepared roofing or metal roofs. It is guaranteed free from coal tar.

One gallon will cover about 100 square feet.

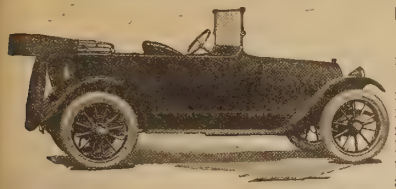
# Automobile and Carriage Paint



## GLOSS PAINT AND FINISH

Our "Quality" Auto and Carriage Paint is a combination of Elastic Coach Varnish and permanent colors. Should be used for painting automobiles, carriages, buggies, also for finishing lawn seats, swings, porch furniture, in fact any surface on which an extreme high gloss, wearing finish is required.

Easily applied, leaving a perfect, smooth and brilliant finish.

By using this paint, your car or carriage may be entirely refinished in much less time than any other carriage paints or can be retouched in spots. No varnish required, as this is a combination of coach varnish and colors.

One coat produces a beautiful and durable finish, but we recommend two-coat work as more satisfactory. One gallon is all that is required for two coats for a small car. Brushes for painting your own car or carriage are shown below.

No better auto paint is made and you will be delighted and pleased with this paint.

**No. P1264—Black**

½ Pints..... **28c** Pints..... **43c** Quarts..... **66c**

## "FITCH" Flowing Varnish Brush

| No. P-1224. Price each | 33c | 45c | 56c | 68c |

## WAGON AND IMPLEMENT PAINT

A paint made expressly for wagons and farm implements. Has wonderful wearing qualities, made of the very best materials with non-fading colors.

Being extremely tough, it will not crack or peel off. It is cheaper to use paint than to allow your wagon and farm implements to go to decay.

One gallon will in most instances finish any implement on the farm.

It is an ideal implement paint because it can be used on iron as well as wood.

Saves many times its cost by preventing rust and decay.

Don't compare this paint to the many cheap wagon and implement paints on the market. Protect your wagons and implements. Have a can on hand. It pays to do it.

|---|---|---|
| No P-1206. Price each | 55c | 72c |

## CONCRETE FLOOR ENAMEL AND CEMENT FLOORS AND WALLS

This concrete floor and wall coating is the most durable and efficient paint for concrete. It penetrates the pores of the surface and on hardening thoroughly seals them. It equalizes the color of the surface in parts of finish of stone-like texture that is artistic and attractive.

Is a strictly cement coating prepared to meet all weather conditions.

This paint is especially adapted for painting cement floors and walls. One gallon covers approximately 100 square feet, and is easily applied.

In order to get the best results, the surface should be thoroughly washed and allowed to dry. Then brush over the surface with a solution of muriatic acid made up in the following proportions: One part of acid, eight parts of water. After the floor has been thus treated wash again to remove all traces of acids. Then allow to dry and apply the cement coating.

No. P-1282. Drab Concrete Enamel.

| Barrels | 1 Gallon |

| **$1.60** per gallon | per gallon **$1.85** |

## LINOLEUM VARNISH

This varnish is used to preserve and beautify linoleum and oil cloth. It dries dust free in about 6 hours and hard enough to use in about 12 hours. The linoleum should be cleaned and perfectly dry before it is varnished. One application of this varnish will restore the color of your linoleum and increase its life. Is very tough and elastic. This varnish is not affected by hot or cold weather, or blister. Has a fine natural gloss.

Will not crack

No. E-1281. Linoleum Varnish.

¼ pint cans, per can..... **35c**

# Mission Oil Stain

Produces a most beautiful, soft effect that is so much desired in mission work. The stain can be used satisfactorily for all kinds of woodwork, interior finish, furniture, wainscoting, etc. Architects and designers are specifying Mission Oil Stains in the finest homes in America.

Particular attention is called to the fact that these stains will thoroughly penetrate the wood and do not require any wiping. Also that our stains do not raise the grain or flake of the wood, thus leaving the wood clean, and will not show a muddy, painted effect, as is the case in most oil stains.

The fact that these stains are used by the most particular piano and furniture manufacturers is good evidence of their worth.

## ANYONE CAN APPLY THEM

A knowledge of wood finish is not necessary. Our directions on each can are explicit and can be understood.

The stain is applied direct to the wood, does not require any sanding, as the stains will not raise the grain. Immediately after applying this stain, the surplus should be removed from the surface by wiping with cotton cloth or old, clean rags. After the stain has become thoroughly dry, then apply a coat of shellac and finish with varnish or prepared wax, depending whether you desire a wax or dull finish.

For applying Mission Oil Stains, use brush No. P-1205, 1½ inches wide, shown on page 102.

## Costs You But Little to Improve Your Home

A gallon of our stain will cover 700 to 1,000 square feet, depending entirely upon the kind of wood you are finishing. The shade of stain obtained is governed by the texture of the wood upon which it is used. A soft wood like pine or poplar will absorb stain to greater extent than birch, oak and other hard woods.

These stains are durable and dependable.

## BRUSHES FOR APPLYING MISSION OIL STAINS

Chiseled Flat Varnish Brush, strictly pure black bristles, nickel bound. The best value.

No. P-1205. 2½ inch.. **28c** 3 inch..... **37c**

# VARNISH STAINS

This is an honest name which signifies what the material is, namely, a combination of first quality durable varnish with stain enough in it to produce the desired effect. It is intended for finishing or renewing old work, such as interior woodwork, furniture, floors, etc. Is easily applied, dries quickly, with a rich, permanent lustre.

## STAINS AND VARNISHES IN ONE OPERATION

If you want to refinish or renew old work, and desire a lighter shade, apply a coat of ground color, and then a coat of the shade desired. On old work, sandpaper loose paint or stains and then apply coat of varnish stains. Our varnish stains are transparent, do not show smut or raise the grain of the wood.

CONCLUSIVE EVIDENCE

Alvin, Texas, July 24, 1915.

Messrs. Gordon-Van Tine Co.,
Davenport, Iowa.

Gentlemen:

Three years ago, when I built my place here at Alvin, I ordered your paint to finish my residence and barn. After completing them, I put up a number of out-buildings, for which I required more paint. Not wishing to wait the time it would take for another shipment to reach me from Davenport, I decided to use paint purchased locally, and by way of experiment bought small quantities of a number of different brands, the prices of which ranged all the way from $1.50 to $2.50 per gallon. The method, time and number of coats used were the same in each case, one coat of primer and one finish coat.

Without mentioning the names of the various brands used, will say that one after the other they each failed, so that at the present time your paint is the only one remaining and still giving service.

I have lived in a number of places throughout the States, but the climate of the Gulf Coast country is the severest test I have found that outside paint could be put to.

I feel sure that the Gordon-Van Tine paint will far surpass any other in lasting qualities, this together with the very low price at which they are sold, will be sure to bring results.

Very truly yours,

GEO. A. KNAPP, Civil Engineer.

# Household Paints and Supplies

## BATH TUB ENAMEL

An extra high grade Bath Tub Enamel. Can also be used for finishing iron beds and other articles having iron surface.

Produces a hard lustrous surface that hot or cold water cannot affect.

One pint is sufficient to cover an ordinary bath tub two coats. Enamel is ready for use.

## FURNITURE POLISH

### Keep Your Furniture New

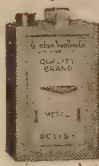
A perfect Polish for Furniture, Pianos, Floors, Interior Woodwork, Automobiles, Carriages and varnished surfaces. It thoroughly cleans and polishes at the same time, removing dust, dirt and grease and will not injure the most highly varnished surface. It stimulates the finish, revives and maintains the life of the varnish and makes the article look like new.

Our Polish is put up in oval tins, is non-inflammable and contains no injurious acids harmful to gum or shellac varnishes and may be used without injury to the hands.

Try a can with your order for paints, it will bring you better results with less labor than any preparation on the market.

No. P-1040. Pint Cans, per can.... **25c**

## "QUALITY" METAL POLISH



This liquid metal polish is without any doubt the very best metal polish possible to produce. Is a liquid preparation for cleaning and polishing metals. It gives the surface its original luster and brilliancy.

Unlike other metal polishes, it requires but very little rubbing even on old metal that has not been polished for a long time.

It is a great boon to auto and garage owners on account of its ease of application and thoroughness with which it cleans the lamps and other brass or nickel plated fittings. It requires but half the time to apply and clean and will not scratch the surface. It is equally useful in polishing all kinds of metal in the household.

Shake thoroughly before using and apply with a cloth and allow to dry for a few moments; then rub briskly with a soft dry cloth. Little physical effort is required.

Quarts..... **40c**

## WALL PAPER CLEANER

No other Wall Paper Cleaner will give you the satisfaction that our "Quality" Brand does. It is the best and easiest to work and will save you many dollars.

Can be used for cleaning wall paper, window shades, kalsomines, etc. It is put up in cans ready for instant use and sufficient to clean an ordinary sized room. Makes your wall paper like new, not only saves you repapering, but makes your home clean and sanitary.

Makes no dirt and is an absolute necessity in cleaning house. We ask you to give this cleaner a trial and convince yourself. Any one can use it. Your money refunded if "Quality" Wall Paper Cleaner is not entirely satisfactory.

No. P-1067. Per Can—Sufficient to clean ordinary sized room..... **7c**

# "QUALITY" PAINT

## An IDEAL Paint for Houses

## GUARANTEED Mixed Paint

As man to man we advise strongly the use of our "Quality" Paint. It will give you better service, wear longer and costs you very much less. Consider what paint is for, first to preserve your buildings, secondly to improve the appearance of your buildings. The Paint that can best perform these two functions is the Paint you want. And that Paint is our "Quality" Brand. It is guaranteed and more than that we stand behind every can.

We can go on indefinitely telling you hundreds of technical points about paint. How it is made. What ingredients were used, etc. But what you are principally interested in is the paint you are going to buy—GOOD PAINT! Will it last and give you service? That's the question.

To sum it all up, you have to depend upon the people back of the paint you buy. Have they a reputation to maintain?

Gordon-Van Tine Company have a reputation for "Quality," gained by years of painstaking efficiency. You can depend upon the fact that under no circumstances would we misrepresent a single item in our entire line. We could not afford to put our unqualified guarantee behind our goods without knowing they were right.

"Quality" Brand House Paint contains just the right proportion of each ingredient necessary to make the right kind of house paint. No paint offered you can excel the paint you buy of Gordon-Van Tine Company. "Quality" is our watchword every minute in the day.

### FULL MEASURE

When you buy a gallon, quart or can of our Paint, according to the quantity ordered, you get absolutely full measure and full weight.

The full formula is printed on every package we sell. You do not have to take any man's word for what is in our paints. You have our guarantee besides. When you buy paints from the dealer you pay the profits of the manufacturer, the jobber, the salesman and the retailer. When you buy from us you pay only one profit. We earnestly request that you see that the paint is used just as received from us. If too thick, thin with Boiled Linseed Oil. Since we save you money and give you dependable paints, why not buy your paints from us?

Color Cards shown on next Page

Brushes, see following Pages

## OUR GUARANTEE

OUR "QUALITY" PAINT is guaranteed to contain the highest grade ingredients. Full formula on every package. Is further guaranteed to cover 250 to 300 square feet, two coats to each gallon if properly applied.

We agree to furnish new paint free should our "QUALITY" Brand Paint fail to come up to our guarantee as to weight, formula and quality.

GORDON-VAN TINE COMPANY.

### HOW TO FIND HOW MUCH PAINT IS REQUIRED

In order to find the quantity of paint you require, measure the length, width and height of the building. Add together the total number of feet of the two sides and two ends of the building that you want to paint. This will give you the total length of the surface you are going to paint. Then multiply this by the height of the building in feet, which will give you the number of square feet of surface to be covered with paint. (See example below.)

One gallon of "Quality" Paint will cover from 250 to 300 square feet according to the condition of the surface, as wood will vary in absorbing paint. Therefore in figuring we advise that you take the basis of 250 square feet to the gallon. Divide the number of square feet you get by 250 and this gives you the number of gallons required for the building.

Thus you see it will require about 8 gallons to cover the surface of a building of this size with two coats. For this order you would buy one 5 gallon kit at $1.27 per gallon and three 1 gallon cans at $1.32 per gallon or a total of $10.30 for two coats of paint for this size house.

**FOR EXAMPLE**

P-1119—Dark Oak

P-1117—Walnut

# "Quality" Floor Paint

## Ready-To-Use Mixed Floor Paints

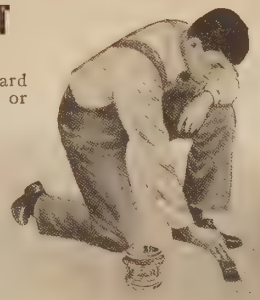
### INTERIOR FLOOR PAINT

**HARD DRYING**

Floor paint is subjected to constant hard wear and must not show heel marks or scratches. Our "Quality" brand Inside Floor Paint is made to withstand wear and constant usage, and can be scrubbed over or washed without injury.

It dries quickly and hard and insures the housewives a clean floor. It is the best all around floor paint on the market. Will cover about 250 square feet two coats to the gallon. **Makes old floors like new.** Never use prepared washing powder or sal-soda for washing floors. It destroys the paint.

An old discolored floor can be made clean and sanitary with one or two coats at a very small expense, is easily applied and costs but little. If the cracks are large and unsightly, use our Crack Filler (see following pages.) **Will dry in a single night.**



### EXTERIOR PORCH FLOOR PAINT

Our Exterior Porch Floor Paint is made especially for outdoor use. Any paint that has the hard wear and severe weather to contend with must be the best.

Our Porch Paint will resist the action of wind, rain and weather.

Keep your porch floors and steps painted because no part of your house has the hard wear that your porches do. Haven't you noticed how quickly your steps and floor decay and rot?

Keep them painted often and use only the best paint, and that is Gordon-Van Tine's Exterior Porch Floor Paint.

A gallon will cover about 250 square feet of surface, two coats.

Be sure to mention name of color and Catalog number.

**PRICES AND LIST OF COLORS**

# ADD YEARS TO THE LIFE OF YOUR SCREENS

### WIRE SCREEN PAINT

Increase the life ot your screens many years. A few cents spent for this wire screen paint will save many a dollar in replacing screen wire. Paint the screens in the spring when you put them up and in the fall give the wire a coat of boiled linseed oil.

This paint is ready for use and easily applied. Does not clog meshes of screen wire, and one coat will make your old screens look like new. Be sure to mention color and Catalog number when ordering.

# ARCHITECTURAL WHITE ENAMEL

## FOR INTERIOR WOODWORK, ETC.

**This ENAMEL is prepared to meet the demand of those who desire THE BEST IN ENAMELS and we offer you this knowing THERE IS NO BETTER ENAMEL MADE.**

The wonderful ease of application, self-leveling qualities, and covering capacity, will demonstrate at once its practical adaptability to any grade of work, considered from an economic standpoint. Its use means economy even in the cheaper grades of work, although there is no finer enamel produced.

The highest grade interior Enamel especially prepared for finishing woodwork, such as doors, casings, mouldings, bathrooms, etc.

"Quality" Architectural Enamel is scientifically prepared to meet the demand for a permanent high grade finish and is not to be compared to the many cheap Interior Enamels on the market.

Let us suggest that you finish a bedroom all in enamel. It gives a sweet, clean appearance and is at the same time sanitary.

Designers and architects are specifying enamel finishes in the finest homes; sometimes a parlor or stair finished in enamels and doors in Mahogany Stain, oftimes finishing one or more bedrooms in enamel and always finishing the bathroom.

This Enamel requires an undercoating or primer to give proper results. See Undercoating quoted below.

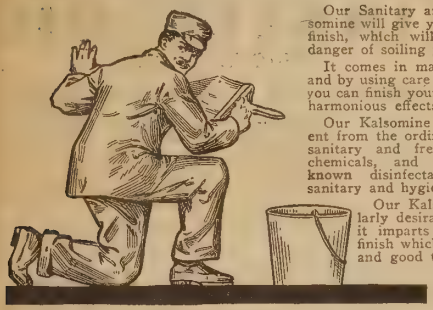
No. P 1120. **White Undercoating.** Pints..... **40c** Quarts..... **60c** Gallons..... **$2.00**

# WALL TINT

## A Sanitary and Healthful KALSOMINE



Our Sanitary and Healthful Kalsomine will give you a smooth, hard finish, which will not rub off, no danger of soiling your clothing.

It comes in many beautiful tints and by using care in selecting colors you can finish your room in rich and harmonious effects.

Our Kalsomine is entirely different from the ordinary kalsomine, is sanitary and free from injurious chemicals, and includes a well known disinfectant rendering it sanitary and hygienic.

Our Kalsomine is particularly desirable for homes, as it imparts a warm, velvety finish which bespeaks culture and good taste, looks better than wall paper and is very much cheaper.

### You Need no Experience to do Good Work

In a recent test a pound each of five prominent brands, including our own, was mixed and a thorough practical test was made with the following results: One pound of our kalsomine covered approximately 152 square feet as against 110, 98, 99 and 70 square feet of the other four brands.

Our Colors are absolutely uniform, practically light proof and will never grow dull or shabby. Full directions are given on each package.

**You can Kalsomine an entire room for only . . . . 60c**

A package contains four pounds and will cover approximately 300 square feet of surface. A room 12x14 feet with an 8 foot ceiling has 584 square feet of surface, so, you see 2 packages of four pounds at 30c each will give you ample material to cover an average size room.

### LIST OF COLORS AND PRICES

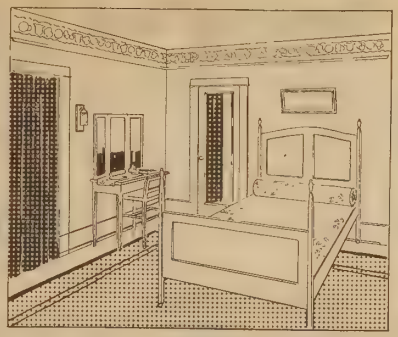
Price each..... **60c** **75c**

# "MURALTONE" A Perfect Wall Paint

## A Perfect Wall Finish



"Muraltone" Wall Paint is the real modern wall covering. Our Flat Wall Paint dries with a beautiful velvet-like finish.

### CHEAPEST AND MOST BEAUTIFUL

The most economic wall finish ever made, the use of which beautifies the home with a soft, velvet-like tone that adds cheer and comfort.

It is made with the very best materials—pure oil colors and specially treated linseed oil, together with other special thinners, which make it very durable.

This paint dries **perfectly flat,** unlike most of the so-called flat paints on the market today, which dry with an egg-shell gloss. Dries hard over night. Dirt does not easily adhere to it and it can be washed when dirty.

For reasons of economy, the wonderful ease of application and lasting beauty, we recommend these colors in preference to any wall finish known.

Best results can be obtained on either Old or New Walls, and we recommend shellac or our special sizing **$1.00** per gallon.

## Sanitary—Beautiful—Durable

### We Offer You a Selection of the Most Desirable Tints Made

We maintain a Decorative Department. Write Gordon-Van Tine Co. Decorative Department and we will send you suggestions for your entire house. Will select a suitable color and send you a Decoration Scheme. Interior Experts will give you practical, modern ideas. Write today.

# "Southern" Brand White Lead

**A Strictly Pure Lead Ground in Pure Linseed Oil—*Guaranteed Pure***

## "Dutch Boy" Lead

"SOUTHERN" brand White Lead is made under the old Dutch process and is a strictly pure white lead. This is manufactured by the National Lead Co. and no better white lead can be bought at any price.

It is absolutely pure and ground in pure high grade linseed oil, corroded by the old Dutch process, ground as fine as the very latest modern machinery could produce it. A smooth easy working lead with a great covering capacity and a fine whiteness that denotes the pure corrosion.

### OUR $100 OFFER

**We will pay $100 in gold to anyone who detects any impurity in our "Southern" Brand White Lead. This is how sure we are of its purity.**

Complete analysis on every keg.

NOTE:—The price on Lead which is used in White Lead has advanced in price due to the extraordinary conditions created by the present war. The price may go down and if so, we will promptly refund the difference. If the price advances, we will notify you before shipping.

| | Gallons | .90 |
| | Five gallons | 4.00 |

# LINSEED OIL

**STRICTLY PURE**

## WRITE FOR TODAY'S PRICES

The question of pure Linseed Oil is of great importance to the painter as well as the user of paint. Some 70 per cent of the annual production of Linseed Oil is used for paints.

The buyer of Linseed Oil can hardly be expected to conduct laboratory tests to determine the quantity and pureness of the oil.

We have been most careful in our selection of Linseed Oil, and you can depend upon its pureness and its adaptability to paints.

The clear color of our oil is retained and it will cover a greater surface than the average Linseed Oil. We urge you to use this oil because we know you will be absolutely satisfied with it.

Inasmuch as the price of Linseed Oil changes with the market on flax, it makes it impossible to quote you a guaranteed price. In order not to delay you, we are giving below the current market prices of Linseed Oil at the time this catalog was printed. We, of necessity, reserve the right to change these prices as the market goes up or down.

We ask you to send us your order based on these prices below, and if the market is down, we will at once refund you the difference. If the market is up we will notify you, giving you the price on the date the order is received.

The chances are that there will not be any great difference in the prices shown, but this we can not guarantee.

### Current Prices Linseed Oil

| | |
|---|---|
| Full barrels, about 50 gallons, per gallon | $1.04 |
| 10 gallon cans, per gallon | 1.10 |
| 5 gallon cans, per gallon | 1.12 |
| 3 gallon cans, per gallon | 1.14 |
| 2 gallon cans, per gallon | 1.17 |
| 1 gallon cans, per gallon | 1.26 |

Above prices are for Raw Linseed Oil. Boiled Linseed Oil is 1c per gallon more.

## PURE TURPENTINE

On account of the frequent changes in price of Turpentine, it is impossible for us to guarantee any fixed price, but we give you below the prices in effect at the time this Catalog is printed. Send us your order and we will give the lowest market price. If prices are lower than those noted below, we will immediately refund you the difference; if the market has gone up, we will notify you of the difference.

3 GALLON CANS. Price per gallon..... 65c
2 GALLON CANS. Price per gallon..... 69c
1 GALLON CANS. Price per gallon..... 76c

## SUBSTITUTE TURPENTINE

Substitute Turpentine is the equal in every way to turpentine, and is very much cheaper. The high cost of turpentine makes it almost prohibitive for painting and you will find that Substitute Turpentine is entirely free from the objectionable features in other so-called substitutes which are made of a coal oil base and are greasy and do not dry properly.

Our Substitute Turpentine mixes thoroughly with paints, varnishes, stains, fillers and Japans, is water white and evaporates as slowly as turpentine, is free from grease, naphtha and coal oil.

Try a five gallon can and if you are not satisfied with the first gallon you use, return it to us at our expense with no charge for the quantity used.

# "QUALITY" DRY COLORS

## IN DRY COLORS—LIKE EVERY THING IN PAINTS—WE HANDLE THE BEST

You will find a very complete line of Dry Colors and you can rest assured of their quality. They are unsurpassed in strength, permanency and purity. Probably no other article is so easily adulterated as Dry Colors, so purchase these from a firm in whom you have faith. Some use Dry Colors for painting purposes by mixing with linseed oil. This we do not recommend unless the mixture is put through a paint mill as it is almost impossible to get the correct mixture by hand. However, if you wish good dry colors, we have them.

Note—Barrels will be shipped direct from mill in Illinois, less quantities from Davenport.

# House and Floor Varnishes

**EVERY Varnish we sell you is the best that it is possible to manufacture. You have our positive assurance as to the high quality, nothing but the best gums and necessary liquids that can be obtained are used in the making of each Varnish. When you buy a can of Gordon-Van Tine Varnish you know you are getting the very best; we stand back of each and every can.**

Each Varnish is made to produce a specific result. Some dry more quickly than others, according to the conditions that have to be met. You can safely entrust your wants in varnish to us.

### OUR GUARANTEE ON VARNISH

We guarantee this varnish to be the best that can be made for the purpose for which it is intended, and we will refund the purchase price if the varnish does not prove satisfactory.

GORDON-VAN TINE CO.

### FREIGHT ON VARNISH IS ALMOST NOTHING

Don't allow the matter of freight charges to worry you, because the freight is not an item worth considering. All freight rates from Davenport are low. The freight on varnishes in cents per gallon is as follows:

| Varnishes | Miles | 100 | 200 | 300 | 500 | 1000 |
|---|---|---|---|---|---|---|
| | Rate | 2c | 3c | 4c | 6c | 6 to 12c |

## FINE INTERIOR VARNISH

A very high grade Fine Interior Varnish, recommended for all kinds of interior finishing (except floors) and finest grades of work. Is pale in color, easy working and free flowing, and good body. Is a prime favorite with the Master Painter.

Dries dust free in two hours, hard in 24 hours and ready to rub in 36 to 48 hours. No better varnish can be made for fine interior work.

No. P-1155. Fine Interior Varnish.

| Quarts | Gallons | 5 Gallons |
|---|---|---|
| **65c** | **$2.20** | **$10.75** |

## No. 1 COACH VARNISH

### For Interior Work

Is a good grade Interior Varnish, and recommended for medium grade work, when one coat of filler and only one or two coats of varnish are required. Has a good body, easy working, free flowing, and quick drying.

You can obtain the best of results with this varnish. The name No. 1 Coach refers in no way to a Varnish for Coach or Carriage work, but is intended solely for interior wood finishing.

No. P-1156. Coach Varnish.

| Quarts | Gallons | 5 Gallons |
|---|---|---|
| **50c** | **$1.45** | **$7.00** |

## AUTO AND CARRIAGE COLOR VARNISH AND PAINT

Very best grade automobile and carriage paint. Made of elastic coach varnish and permanent colors.

| | | | |
|---|---|---|---|
| No. P-1264—Black | | ½ pints | 27c |
| Pints | 40c | Quarts | 60c |

## OUTSIDE SPAR VARNISH

This is a Varnish that will give you good service where surfaces have to stand the severest exposure to outside weather conditions, such as moisture, frost, etc.

Is suitable for Outside Front Doors, Storm Fronts, Window Sills, Yachts, Boats, Bath Rooms, etc.

Should be applied directly to the surface with no Liquid Filler or Shellac under it.

No. P-1158.

Quarts, **75c** Gallons, **$2.75**

## LIGHT HARD OIL FINISH

Light Hard Oil Finish is made for the grade of work which is not intended to be rubbed. Is medium in color and dries with a brilliant lustre. Is especially adapted for either grained work or light natural woods. Brushes freely. Has a heavy body, medium color, and is an easy working Hard Oil.

One coat of Filler and one coat of Hard Oil will usually be found ample.

Can also be used for Wall Sizing by mixing equal quantities of Benzine and Hard Oil, producing an Extra High Grade Wall Sizing.

No. P-1157. Light Hard Oil Finish.

Quarts **45c** Gallons **$1.35** 5 Gallons **$6.50**

## LINOLEUM VARNISH

High grade varnish for linoleum and oil cloth.

No. P-1281

| | |
|---|---|
| Pints | 30c |
| Quarts | 50c |

## FLAT VARNISH

Produces a durable, elastic finish, having the appearance of a rubbed surface, saving expense and labor of rubbing.

Can be used over surfaces which are simply stained or filled, or over those finished with high gloss varnishes.

Dries dust free in one hour, dries hard in five to six hours. Should be thoroughly stirred while being used, and applied with soft clean brush. Surfaces should be thoroughly clean and dry.

No. P-1159.

Quarts.....**70c** Gallons.....**$2.50**

## DENATURED ALCOHOL SHELLAC

This is the best quality of Shellac, cut in 190 proof specially selected denatured alcohol, producing the highest grade of Shellac, cut heavy in body and light in color.

Shellac is the best first coater for furniture, woodwork, or any surface that is to be finished in Varnish, except floors.

Orange Shellac will give the wood an oak color. White Shellac is used where no coloring is desired.

Should also be used for coating knots and sappy streaks before painting.

In ordering state whether you want Orange or White Shellac.

| No. P-1149—Orange | | White—No. P-1148 |

Brushes Shown on Pages 102 and 103

## VARNISH STAINS

This is an honest name which signifies what the material is, namely, a combination of first quality durable varnish with stain enough in it to produce the desired effect.

It is intended for finishing of any new work, or refinishing or renewing old work, such as interior woodwork, furniture, floors, etc., is easily applied, dries quickly with a rich permanent lustre.

For Color Samples, see preceding pages

### Stains and Varnishes In One Operation

If you want to refinish or renew old work, and desire a lighter shade, apply a coat of ground color and then a coat of the shade desired. On old work sandpaper loose paint or stains and then apply coat of Varnish Stains. Our Varnish Stains are transparent, do not show smut or raise the grain of the wood.

Damar Varnish should not be used for furniture or outside work.

No. P-1288 Damar Varnish. Quarts.....**70c**

Gallons .....**$2.50**

# FLOOR VARNISHES AND SUNDRIES

IT WILL PAY YOU TO KEEP YOUR FLOOR IN GOOD CONDITION

## HOW TO TREAT HARDWOOD FLOORS

AFTER Oak Floors have been scraped and thoroughly smoothed with sand paper a coat of prepared wood filler should first be applied evenly over the entire surface and allowed to stand several hours, then rubbed off with a soft cloth.

Understand that by using a little coloring in this filler any shade desired can be produced. When a varnish finish is desired, apply two coats of floor varnish very thin, allowing the first to dry thoroughly, and going over the entire surface lightly with a very fine sand paper before applying the second.

Should the gloss of a varnish floor not be desirable then rub the floor lightly with a good rubbing oil and pumice stone along with a piece of burlap. Then wipe perfectly dry and the gloss will disappear, leaving a dull finish.

When a wax finish is desired follow the filler with two light coats of white floor shellac, allowing the first to stand a day before applying the second. When this is dry use No. 0 sand paper on the surface, lightly removing any specks or lines that may appear and then apply two coats of a prepared floor wax, rubbing each to a polish with a weighted brush made for this purpose.

## FLOOR VARNISH "QUALITY" BRAND

No. P 1154.

A perfect durable Floor Varnish in every way, and made to walk on. Is tough and elastic, will not scratch or mar white, dries hard over night; surface dry in 30 to 36 hours, and can be rubbed.

In this varnish we have combined all the essential features necessary to produce the most satisfactory Floor Varnish. One gallon will cover between 500 and 600 square feet one coat. Never put Liquid Filler or Shellac under Floor Varnish, or it will mar easily and scale off. See General Directions for applying Floor Varnish under description of "Gordon" Brand.

**"QUALITY" FLOOR VARNISH**

Quarts **60c** Gallon **$1.95** 5 Gallons **$9.50**

## FLOOR VARNISH "GORDON" BRAND

No. P 1154½.

A good, tough, elastic Floor Varnish, a little cheaper in price than the "Quality" brand Floor Varnish, but will give you splendid results. Dries with a high gloss over night.

On new wood, on Pine or Maple, thin the first coat with 10% Pure Spirits of Turpentine or Substitute Turpentine, balance coats as it comes from can.

On new Oak Floors, first fill with shade desired of Floor Paste Filler, then proceed as on Pine or Maple. If floors have been previously varnished, sandpaper till perfectly smooth before applying varnish.

**"GORDON" FLOOR VARNISH**

Quarts **50c** Gallon **$1.75** 5 Gallons **$8.50**

### OUR GUARANTEE ON FLOOR VARNISH

We guarantee this varnish to be the best that can be made for the purpose for which it is intended, and we will refund the purchase price if the varnish does not prove satisfactory. GORDON-VAN TINE CO.

## FLOOR WAX

Floor Wax in paste form for polishing on woodwork, floors and furniture. Apply very sparingly with a cloth and in 10 or 15 minutes polish with a dry cloth polishing mit, or on floors with a polishing brush (see below) which will produce a rich, subdued, lustrous finish.

Our Floor Wax will give you long, good service. Floors finished with this wax will not need to be entirely rewaxed more than once or twice a year. 1 pound will cover about 250 to 300 square feet.

| | | |
|---|---|---|
| No. P. **1042.** | 1 Pound Can, per can | **$0.35** |
| | 2 Pound Can, per can | **.68** |
| | 4 Pound Can, per can | **1.25** |

## PASTE WOOD FILLER

To be used in filling the pores in all open grain woods, such as Oak and Ash.

It requires about 4 pounds of filler to cover 100 square feet. The usual reduction is in the proportion of from 10 to 12 pounds of filler to the gallon of benzine.

After the filler has been applied it should be rubbed thoroughly with excelsior five minutes after applying, and the varnish coat should be applied in twelve or fifteen hours after the paste is put on.

It is carried in 3 shades, Natural, Light Golden Oak and Medium Antique Oak. State which shade you want when ordering.

| | | 2 lb. can | 5 lb. can |
|---|---|---|---|
| No. P **1037.** | Natural Oak | **21c** | **50c** |
| No. P **1038.** | Light Golden Oak | **21c** | **50c** |
| No. P **1039.** | Antique Oak | **21c** | **50c** |

## GLOSS OIL

Gloss Oil is a low priced sizing varnish, which is used principally for sizing plaster walls preparatory to painting or kalsomining. It should not be confused with Hard Oil or Interior varnishes and is not suitable for producing a varnish finish.

| | | |
|---|---|---|
| No. P-**1284.** | Gloss Oil. | |
| 1 gallon cans, per can | | **$0.55** |
| 5 gallon cans, per can | | **2.10** |

## PASTE CRACK OR CREVICE FILLER

Filler for cracks or crevices in floors, also small openings in floors and woodwork. Is not oily or greasy and dries sufficiently in 24 hours to permit finishing coats. Is very elastic and expands and contracts with the wood. Comes in 1, 2 and 5 pound cans.

| No. | 1 lb. cans | 2 lb. cans | 5 lb. cans |
|---|---|---|---|
| P **1036.** | **13c** | **27c** | **65c** |

## WATER PUTTY CREVICE FILLER

A new sanitary preparation for filling cracks, joints and crevices, is specially adapted for floors and household use. Is put up in powder form, and mixed with water to a pliable putty and applied, dries granite hard and is permanent, will not decay or become soft, is more easily applied than ready-mixed putty. Can be varnished over or painted.

No. P **1036½.** 1 lb. Cans..**15c** 2 lb. Cans..**27c**

## LIQUID WOOD FILLER

Liquid Filler or Wood Sealer is a transparent Filler, to be used where gum, liquids and pigments are thoroughly ground together. Is recommended for use on close grain work.

Works easily, dries nearly flat, and can be sanded in 18 hours for varnishing.

No. P **1150.** Liquid Filler.

Gallons ..... **$1.10**

## POWDERED PUMICE STONE

# GRATES FOR WOOD OR BRICK MANTELS

## GRATE OUTFIT NO. 2

Interior View of No. 2

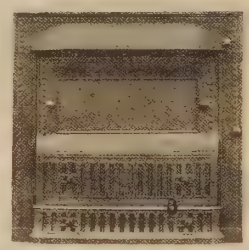
Side View of No. 2

No. 2 is a "set grate," being complete with iron sides and top, and tile back. It has both check and draft dampers, operated by rods which project through the front. This grate outfit can be regulated like a stove, and will burn any kind of fuel without smoking. The fire grate can be tipped with a poker so as to shake the ashes through.

Grate outfit No. 2 is about 13 inches deep over all. Ornamental steel front is included in the price.

| Width | Height | Black Finish | Finish Oxidized Copper |
|---|---|---|---|
| 24½ | 30¼ | $ 8.75 | $10.45 |
| 30½ | 30¼ | 10.40 | 12.05 |

## GRATE OUTFIT NO. 4



Front View No. 4

Side View of No. 4

### GRATE OUTFIT NO. 4.

This is a high grade "Set Grate," with heavy iron front and frame. Both sides and back are fitted with fire tile. The top has check and draft dampers, operated by rods from the front. The removable front is of heavy iron, and can be used as a blower in starting the fire. The ash screen is supplied with sliding dampers so as to create a strong draft from the front.

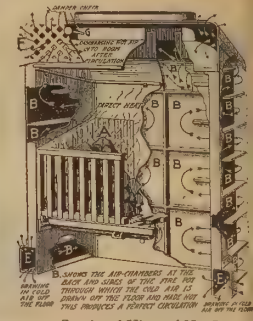
The grate bars revolve so as to grind up the ashes, and are operated by a shaker from the front. This grate will burn any kind of fuel, will hold a fire longer than outfits No. 1 or No. 2, and is operated more easily. We recommend outfit No. 4 for service and durability. Depth about 13 inches over all.

PRICES.

| Width. | Height. | Oxidized Copper or Dull Brass Finish. |
|---|---|---|
| 24½ | 30¼ | $15.79 |
| 30½ | 30¼ | 18.76 |

## GRATE OUTFIT NO. 5

Interior View of No.



DRAWING IN COLD AIR OFF THE FLOOR
B SHOWS THE AIR-CHAMBERS AT THE BACK AND SIDES OF THIS STOVE FOR DRAWING THROUGH WHICH THE COLD AIR IS DRAWN OFF THE FLOOR AND MADE HOT
THIS PRODUCES A PERFECT CIRCULATION

Sectional View of No. 5

### ALDINE GRATE OUTFIT No. 5

This is the famous ALDINE GRATE. It differs from other set grates in that it is built on the return draft principle. The side and rear walls are double, and fitted with a series of deflecting plates. At the front of the grate on either side, the air is taken in off the floor, travels up and back and forth over the deflecting plates, and is finally discharged into the room through the iron grill at the top.

Thus, in addition to the heat usually thrown out by an open fire, the Aldine is causing a constant circulation of heated air, SAVING 85 PER CENT OF THE HEAT which is wasted in other grates.

This outfit is fitted with check and draft dampers, sliding dampers in ash screen, and shaker grate—all operated from the front.

The Aldine can be bricked into a corner and piped to a chimney like a stove. It keeps a fire night and day, without dust, gas or smoke in the room.

The Aldine means added comfort and perfect ventilation, and its additional cost over other grates is paid for in one year by the saving in fuel. It will burn any kind of coal or wood.

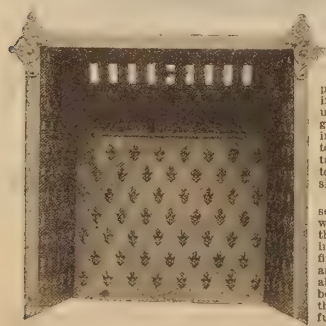
PRICES

Width, 30½ inches. Height, 30¼ inches. Oxidized Copper or Dull Brass Finish.... $29.70

The Aldine grate is made only in the one size listed above. Depth about 13 inches over all. Special Aldine Booklet, describing its construction and advantages, sent free on request.

**The above prices are for grates only as illustrated. For prices on complete Mantle outfits, including these grates, see following pages.**

**When complete Mantle outfit is ordered, including grate, we always ship grate 24½ inches wide, and black finish, unless otherwise specified by customer.**



## IRON LINING OUTFIT No. 6

When an open fire place is wanted, this iron lining outfit is used instead of a set grate. It consists of iron sides, back and top, with ornamental front frame. The top is fitted with a sliding damper.

This outfit can be set into the chimney with ordinary brick, the iron lining taking the place of the fire brick. Gas logs, and irons, or portable fire baskets can be used in it, so that any kind of fuel can be burned.

PRICES

| Width. | Height. | Black Wrought Iron Finish. |
|---|---|---|
| 30¼ | 30¼ | $7.76 |

Outfit No. 6 furnished only in above size. Depth, 14 inches.

## PRICES ON TILE

### GLAZED TILE

1½x3 inches of 1½x6 inches in any of the colors mentioned above.....50c per sq. ft.

### MATT FINISH TILE

A smooth tile, but with a dull finish which has a very soft, satiny appearance. Furnished in solid colors only, as follows: Dark green, light green, dark brown, tan, dark red.
Size 1½x3 or 1½x6 inches.
Price .....80c per sq. ft.

### FAIENCE TILE

A moulded tile with an uneven, pebbly surface—very artistic and attractive. Extensively used for hearths, and complete mantel fronts. These tile do not show any decided spots or mottles, and yet contain a variety of soft colors, shading off into reds, greens, and browns, also made in solid red, green, brown or ox-blood.
Size 3x3, 3x6 or 6x6 inches.
Price .....$1.10 per sq. ft.

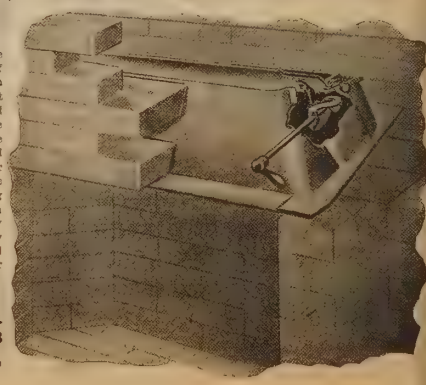
## DOME DAMPERS FOR OPEN FIREPLACES

Have you ever called on a friend who had just completed his new home and noticed when he started a fire in his new fireplace that the smoke instead of going up through the flue was forced out into the room? The material which entered into the construction of his fireplace may have been the very best, but owing to faulty construction the throat of the flue was not correctly built and caused the smoke to be forced into the room. The use of our new Dome Damper, illustrated herewith, protects you against any such possibility. If you have in mind the building of a new fireplace. From the fact that it can be adjusted like a watch, the draft can be regulated to suit weather conditions. No brick or tile mantel should be built without one of these dampers. It serves the double purpose of giving the proper shape to the throat, and also a means of regulating the draft. The objection to the old style dome damper was that the thumb latch was operated from the center of the arch, which when heated became very difficult to operate. The damper we show herewith is operated by a thumb screw and rod from the outside of the fireplace. The arrangement is the simplest and easiest operated extant. The mechanism permits one to have either a full or graduated opening, as desired.

PRICES

For 30 inches wide opening.....$5.34
For 36 inches wide opening.....5.78

Dome Dampers are not required where Grate Outfits Nos. 1, 2, 3, 4, 5 or 6 are used.



# EVERYTHING NEEDED FOR THE FIREPLACE

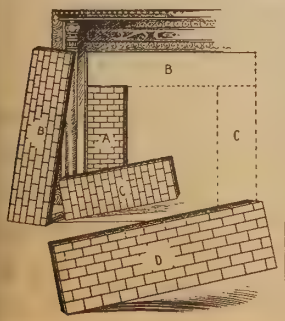
They are made up after order is received, and sizes and exact dimensions can be changed to suit your requirements.
When ordering BE SURE TO SEND SKETCH showing exact width and projections of chimney breast, and state whether shelf will project around end of chimney breast or set against a flat wall.
All mantel shelves are made of selected clear lumber, and are shipped set up, ready for use. We crate carefully and guarantee safe delivery.

## MOUNTING TILE IN SLABS



**When prepared in this manner they can be set in place by any one, and do not require the services of a skilled mechanic.**

The beauty of a mantel depends largely upon how the tile facing and hearth are set, and if you desire a nice smooth job of tile work and can not command the services of a good tile layer, we recommend that you have us mount the tile for you. We take particular pains in packing the slabs when mounted and always ship the large slabs packed on edge, which we find to be the very best way to ship them, as they almost invariably reach destination in perfect condition.

The accompanying illustration shows our tiling mounted in slabs as we send it out (when so ordered), all ready to place in position. "A" represents a section of facing in position; "B" and "C" represent similar sections of facing to occupy the blank spaces so marked; "D" represents tile hearth.

**FOR MOUNTING TILE FACING—in slabs ready to set, add to price of Mantel and Outfit..... $2.75**
**FOR MOUNTING TILE HEARTHS—in slabs ready to set, add to price of Mantel and Outfit $3.25**

Prices are for mounting only and do not include tile. Tile are furnished loose with different outfits.

# Artistic Modern Mantels and Grates

## They Have a Charm That's all Their Own---Buy One For Your Home

### Bungalow Mantel, No. 708

This design is particularly suitable for living rooms and has a unique arrangement of doors and drawers. The drawers in the center section are 15¾ inches in width by 3½ inches high and 10 inches deep. The main shelf has 1½ inch face and is 38 inches wide by 11 inches deep. The bookcase division is made in two sections, the lower section containing three adjustable shelves and the entire space is 10¼ inches deep by 9 inches wide. All glass is clear leaded crystal set in lead bars. The lower light measures 8x40 inches and the upper light 8x8 inches. The mantel is 5 feet 2 inches high and 5 feet wide. The tile opening measures 36 inches wide by 39 inches high. The tile projection is 6 inches. The wood is selected quartered oak, finished golden oak, also made of birch, imitation mahogany.

FOR DESCRIPTION OF GRATES SEE PAGES 104 AND 105.

### Old Hickory Mantel, No. 55

Can you imagine anything more inviting to the guest or friend who, upon entering your home on a wintry evening, is greeted with a cheery fire in a mantel like the one shown above? It adds to the hospitality of your home by the added cheer with which it surrounds your friends. From the fact that it is one of the very latest designs along Mission lines produced by our designer, you can rest assured through its selection that your taste is absolutely correct. It is 5 feet 8 inches high and 5 feet wide. The tile opening is 42 inches wide, 42 inches high. Tile projection 3¾ inches. The wood used is our well-known quality of oak finished in any desired color, either superior flowed or waxed finish. Looks particularly well in any of the Mission Finishes, such as Weathered, Antwerp, or Flemish.

## Monarch Mantel, No. 668

If you are desirous of securing an all quarter sawed oak mantel representing high class cabinet work throughout and built along correct lines and proportions we certainly recommend this mantel. Special attention is called to the handsomely figured veneered columns and to the beveled face box shelves. This represents one of the newest creations in mantel building, and has received merited approval from our customers. It is adaptable to any room in the house, and must be seen to be fully appreciated. It is made of well seasoned quarter sawed oak, and finished in our superior flowed golden oak finish. Can also be had in birch body, stained mahogany and real mahogany veneered columns. Height 7 feet. Width 5 feet. Square plain edge plate mirror 36x18 inches. Tile opening 42 inches wide, 42 inches high. Tile projection 3 inches. Columns 4 inches.

FOR DESCRIPTION OF GRATES SEE PAGE 104

## Home Comfort Mantel, No. 718½

Mantels built somewhat on this order are frequently to be seen in many homes, and this clearly testifies to their popularity. For a low priced mantel with mirror top, this style is rather difficult to excel, and while we have, therefore, kept closely to the general construction of the old popular mantel, we have made a number of improvements in its details, working these out so as to make the mantel what it should be—perfect in proportion as well as in construction.

The fronts of the shelves as well as the columns are veneered in handsome figured quarter-sawed oak, the balance being the best selected plain sawed finished in our rich golden oak, superior flowed finish.

Height 6 feet 8 inches. Width 5 feet. Tile opening 36 inches wide by 39 inches high. Tile projection 3¾ inches. Columns 4 inches Selected bevel plate mirror 16x28 inches.

Mantel complete with enameled or unglazed tile, any color, for hearth and facing and combination coal and wood burning grate as shown in outfit No. 1 ..... **$28.49**

Mantel complete with enameled or unglazed tile, any color, for hearth and facing and Mounted Buckeye Grate as shown in outfit No. 2 ..... **34.95**

# BUILDERS' HARDWARE AT ONE-HALF DEALERS' PRICES

**Trustworthy Goods—Solid and Substantial—Representing Exceptional Values**

BLACKHAWK HOTEL
Gordon-Van Tine Co. Furnished all the Hardware on this Beautiful $750,000 Hotel

## A WORD CONCERNING DEPENDABLE HARDWARE

**In Our Builders' Hardware Department** you will find prices all the way from 25 to 50 per cent lower than are offered anywhere by dealers, for goods of equal quality. You will find our guarantee of quality, safe delivery and satisfaction as strong as the English language can make it—backed by our ample capital and reputation.

You will find cuts and complete descriptions of every article and net prices. Keep in mind that there is a bit of difference in the quality of Builders' Hardware, so we desire to state with all the emphasis at our command that Gordon-Van Tine quality is the highest. In describing the various articles we have confined ourselves to the plain, unvarnished truth—have in no case exaggerated the facts regarding our goods and prices. You will find the material and workmanship of our goods up to the highest standard.

We carry, wherever necessary, our designs in both Genuine Bronze and Steel. The appearance is practically the same, the Genuine Bronze having a little richer finish than the Steel. We advise the use of Genuine Bronze for outside work, because Steel will not stand the attack of outside elements like Genuine Bronze.

**Be sure and include your Hardware in your order for other goods; it will save you money on your freight and besides a big saving to you on "Good Hardware."**

In case you order small hardware to be sent by mail, please include postage.

### CHEST CORNER

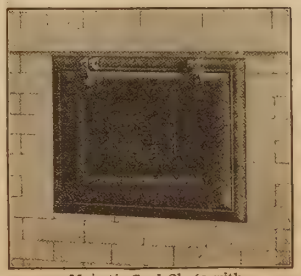
Japanned steel Size 1½x3¼ in. Without screws. Wt. about 3 oz.

No. EH **2844**. Price each ..... **6c**

# MAJESTIC COAL CHUTE



Majestic Coal Chute with Door Closed.

The Majestic Foundation Coal Chute is designed to be placed in the foundation wall, for depositing coal, wood or vegetables into the cellar. The door locks open automatically, and protects the building just where the protection is needed, which is just above the opening; and instead of the coal striking against the side of the building, as is the case with the ordinary cellar window, it strikes the door, falls into the hopper, and passes to the basement, without being scattered upon the lawn or disfiguring the side of the building.

Size of wall opening; 24 inches wide and 17 inches high; 13 inches deep.

### PRICES

No. EH-**3178**—With ¼-inch Ribbed Glass Door, with Hopper ..... **$8.82**

No. EH-**3179**—With ¼-inch Ribbed Glass Door, without Hopper ..... **7.50**

## SASH CHAIN FASTENER

Consists of four hooks, four rings and four irons. See price of sash chain above. Wt. per set about ½ lb.
No. EH **3014.**
Price per set for two sash. 15c

## SASH BALANCES

### "Pullman" Unit Sash Balance

These sash balances take the place of cords and weights for windows. The "Pullman" is simplicity itself. It has only six parts. The face plate is of pressed steel and thoroughly unbreakable. One-half the case forms a revolving drum in which there is a block spring of proper strength to support the sash. This insures uniform tension and balances the sash at any desired point. It is rust proof.

Outside the drum is wound a special brass tape that supports the sash. Tape is of great tensile strength; several hundred per cent above the load carried.

The spring takes the place of noisy weights, and the tape is used instead of the unsightly, perishable cords.

These sash balances are adapted for use in new buildings and also on old buildings. It is a very simple matter to change from spring bolts to regular double hung weighted windows.

Finish, Plain Black, lacquered. Shipping weight about 5 lbs. per set of four. One set packed in a box. Average wt. per set 6 lbs.

| Cat. No | For Complete Window Weighing | Face Dimensions | Length of Tape | Selling Price per set of 4 |
|---|---|---|---|---|
| EH **388** | 20 to 22 | 1¼x5½ | 46 | $1.40 |

### GATE LATCH

For gate to swing one way. Size of case 2¼x1¼ in. Without screws. Wt. per set 16 oz.
Price per set
No. EH **2870** **11c**

### GATE LATCH

Secret gate latch. Nubian bronzed. Reversible. Size case 2x2½ in. Operated by pressing secret lever on under side of case With screws. Wt. each 16 oz.

No. EH **2454**. Price each..... **55c**

### GATE HINGE

Reversible, heavy cast iron. Upper hinge 3¾ x ⅛ in. Lower hinge 3½x4 in. Without screws. Wt. per pair 2¾ lbs.

No. EH **2865** Price per pair..... **22c**

### GATE HINGE

Double action, reversible. Swings both ways Upper plate 3⅜x2½ in Lower plate 2¼x4 in. Without screws. Wt. pr., 3 lbs.

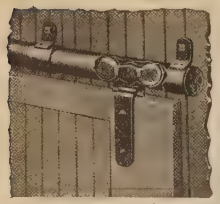
No. EH **2866** Price per pair..... **28c**

### SPRING GATE HINGE

Double acting, japanned malleable iron. Plate 4x2¾ in. Does not raise gate. Without screws. Wt. per pair 4¾ lbs.

No. EH **2868** Price per pair..... **$1.10**

# BARN DOOR HARDWARE



No. EH 142½

## BARN DOOR TRACK AND HANGER

Track, tubular steel, 14 gauge, 2¼ in. diameter. Track ends meet at center of the socket and lock. Roller bearing axle. Malleable iron end brackets. Aluminum finished wrought steel track in three foot lengths. With the 12 and 16 ft. openings we furnish two pair hangers. With the 4, 6, 8 and 10 ft. openings one pair hangers.

No. EH 142½. Price complete with track, end brackets and center bracket.

| | | | |
|---|---|---|---|
| 4 ft. openings | $3.05 | 10 ft. openings | $5.00 |
| 5 ft. openings | 3.60 | 12 ft. openings | 6.95 |
| 8 ft. openings | 4.00 | 16 ft. openings | 8.20 |

In case you desire brackets, track or hangers separate, prices are given below:

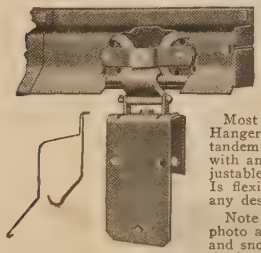
| | | | |
|---|---|---|---|
| End Brackets, each | 11c | Track, per foot | 15c |
| Center Brackets, each | 11c | Hangers, per pair | $1.50 |

## BARN DOOR TRACK AND HANGER

No. EH 147

The Gordon Barn Door Hanger has been put out by us to meet a special demand for a first-class round track hanger. The hanger and hood are one malleable piece, thus making the hanger strong enough for the largest size doors. A lip projecting below the wheels make it impossible for the hanger to jump the track. The track is put up in two-foot sections only, 1⅛ in. in diameter. Frame and Pendent 5⅛x10 inches, finished in aluminum, with roller bearings, bolts and two end brackets. Comes complete.

| | 4 ft. Door | 6 ft. Door | 8 ft. Door | 10 ft. Door |
|---|---|---|---|---|
| Per pair with rail | $1.35 | $1.75 | $2.15 | $2.45 |



## Barn Door Track and Hangers

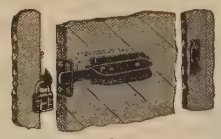
Most desirable features combined in this Hanger and track. The Hangers are of the tandem type insuring free and easy carriage with ante-friction steel roller bearings. Is adjustable to doors from 1½ to 2 inches thick. Is flexible allowing the door to swing out to any desired angle.

Note the section in lower left hand part of photo and you will understand why water, ice and snow cannot get into the working parts of the hanger.

Track is 16 gauge steel. Hangers consist of 2 hangers with bolts for attaching hangers to the door, also lag screws, and stops and splice cover for rail. Weight hangers, 9 lbs. per pair, track, 3 lbs. per foot.

No. EH-140. Hangers, per pair ..... $1.23
No. EH-141. Track, per foot ..... 16c

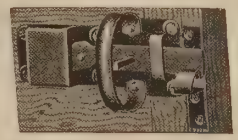
## ALL STEEL BARN DOOR OR GATE LATCH



Two catches so that door can be held open and closed. Secure pad lock hasps. Japanned wrought steel; 5x1¾ in. plate. Length 7 in. Without screws. Wt. about 26 oz.

No. EH 327. Price per set ..... 30c
Price per dozen $3.45

## BARN DOOR LATCH



Wrought steel, Japanned; 8¼x3¾ in. over all. Latch bar is operated by gravity. Complete with screws. Wt. per set 2¼ lbs.

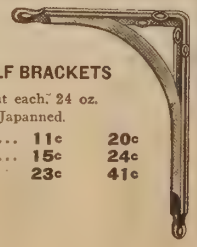
No. EH 3067. Price per set ..... 50c

## STEEL FOLDING SHELF BRACKETS

Locks automatically when opened and folds flat when lowered. Wrought steel. Japanned. Without screws. Wt. about 3 lbs.

No. EH 2605.

| Size | 12x12 | 16x16 |
|---|---|---|
| Price, per pair | 83c | $1.47 |



## STEEL SHELF BRACKETS

Average weight each, 24 oz.

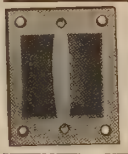
No. EH 132. Japanned.

| | | |
|---|---|---|
| 8 x 10 " | 11c | 20c |
| 10 x 12 " | 15c | 24c |
| 12 x 14 " | 23c | 41c |

## PETERSON'S BARN DOOR LATCH

For Swinging or Sliding Doors, right or left hand. No spring. Locks with padlock. Made of best malleable iron. Has outside and inside handles. Length over all, 6 in. Suitable for doors up to 2¼ in. thick. Wt. per set, 1¼ lbs.

No. EH-255. Price per set, complete ..... 40c

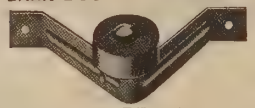


## FLUSH DOOR PULL

Cast iron Japanned. Size 5x4 in. Without screws. Wt. about 2¼ lbs.

No. EH 3066. Price each ..... 17c

## BARN DOOR STAY ROLLERS



No. EH 348

For inside or outside doors, flexible wrought steel braces, 1½ in. wide. Cast iron roller 2x1 in. Takes No. 16 screws or ⅜ bolts. Price without screws or bolts. Wt. each 1¾ lbs.

No. EH 348. Price each ..... 15c

For Inside Doors.

Japanned finish, wrought iron screw, 7x⅞ inch screw; 2x1 inch roller. Weight about 12 oz.

No. EH 3062. Price, each ..... 11c
Price, per dozen ..... $1.10

No. EH 138

## GRAVITY BARN DOOR CATCH

Designed to fasten to side of building to hold door open and prevent swinging. Wt. each 12 oz.

Price per catch 6c

## OFFSET HINGES for Gable Hay Doors

No. EH 3222.

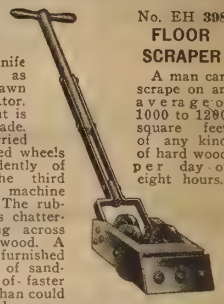
Price per pair, 75c

Allow door to swing down out of the way when loading. Keeps the snow and rain out when closed. Made of best malleable iron with steel pin.

## FLOOR SCRAPER

This is the best medium priced Floor Scraper, on the market. The knife scrapes the floor as the machine is drawn toward the operator. 85% of the weight is resting on the blade.

The frame is carried on two rubber tired wheels working independently of each other. The third wheel carries the machine on back stroke. The rubber pad eliminates chattering when working across the grain of the wood. A polishing knife is furnished to take the place of sanding and permits of faster and better work than could be done with sander.



No. EH 398 FLOOR SCRAPER

A man can scrape on an average of 1000 to 1200 square feet of any kind of hard wood per day of eight hours.

No. EH 398. Floor Scraper. Width of cut 8⅞ in. Complete with four cutting knives, three roughing knives, one polishing knife, oil stone, filing clamp, burnishing tool, mill file and wrench.
Price each ..... $25.00

## PADLOCKS

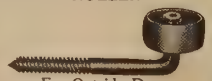
Six levers, heavy cast brass case, self locking. Two keys. Wt. about 12 oz.

No. EH 2190. Each ..... 60c

Six brass levers and rivets, 2 in. brass, self locking, 12 changes; 2 keys. Wt. about 10 oz.

No. EH 87. Price each ..... 25c

## BARN DOOR STAY ROLLER



For Outside Doors

Japanned finish, wrought iron screw, size 8x⅞ inch screw, 2x1 inch roller. Wt., 14 oz.

No. EH-3063. Each ..... 11c
Per dozen ..... $1.10

## MORTISE GATE LATCH

Plain cast iron Mortise Swingboth ways. Length of face 3½ inches. Without screws. Wt. about 16 oz. per set.

No. EH 2871 Price set ..... 11c

## PAD LOCK EYES

Without screws. Wt. about 2 oz.

No. EH 2881. Size 1¾x1¼ in., malleable iron. Price each ..... 6c
Price per dozen ..... 55c

## BARN DOOR PULL

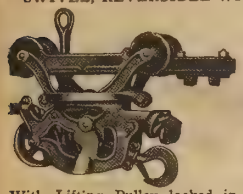
Wrought steel, Japanned, with screws; 10½ in. long; width 1⅝ in. Weight, 20 oz.

No. EH-2088.
Price each ..... 22c

# COMPLETE HAY CARRIER OUTFITS AND HAY TOOLS

## HAY CARRIER

SWIVEL, REVERSIBLE WITH LIFTING PULLEY



With Lifting Pulley locked in frame.

With Lifting Pulley disengaged.

This Hay Carrier is without question the best on the market. Can be used with hay slings by substituting sling pulleys in place of the fork pulleys. Has open throat, swivel and reversible. Japanned malleable iron frame. 3½ inch travelers, ¾ inch tread, 14 inches long, 7½ inches wide, 10½ inches high.

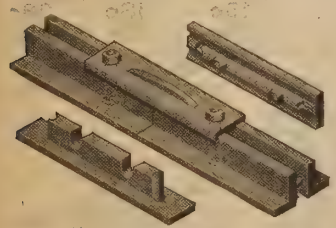
Use our double angle steel hay track No. E 418 shown below.

The locking device is positive in operation and is constructed without springs. The fork hook is permitted to swing upward very near to the track, enabling the carrier to fill the mow close to the roof.

No. E 417. Hay Carrier, wt. 23 lbs., price each. **$4.50**

## HAY CARRIER TRACK

DOUBLE ANGLE STEEL TRACK FOR HAY CARRIER



Hay Carrier Track.

This track is intended for the Hay Carrier, No. E 417, shown above, and is made of two pieces angle steel with extra strong splice joint. This splice is held by heavy bolts, and it renders the track as strong and rigid as the joint as elsewhere.

It is impossible for the track joint to slip, as it is not a friction coupling.

The hangers are inserted from the lower side and will slide to any point desired. Made in 6 ft., 8 ft. and 12 ft. lengths, complete with couplings. Note that this track is 2¼ lbs. to the foot, whereas most track is only 2 lbs.

No. E 418. Steel Track, 6 ft., 8 ft. and 12 ft. lengths. Wt. per ft., 2¼ lbs. Price per foot..... **14c**

## TRACK HANGER WITH OPEN EYE

To be used on Track E. 418. By the use of these Eyes the track can be readily taken down. Made of malleable iron. Length 5½ and 7½ in.

No. E 419. Open Track Eyes, 5½ inch, price each..... 10c Per dozen.. **$1.05**

No. E 420. Open Track Eyes, 7½ inch, price each..... 10c Per dozen.. **1.05**

## HAY FORK PULLEY

Knot Passing Hay Fork Pulley. Heavy Japanned iron frame, malleable iron swivel eye, large rope opening, 2⅜ in. diameter, over all, 11 inches. 6 inch Maple Wood Wheel, Cast Iron Frame.

No. E 431. Hay Fork Pulley.

Weight 3½ lbs. Price each..... **30c**

## TRIP BLOCKS OR BUMPERS

These Trip Blocks or Bumpers are 4½ inches long, intended for the double angle steel track hangers. Weight, ¾ lb. each, 9 lbs. per dozen.

No. E 422. Trip Blocks or Bumpers, 4½ inches, price each..... 45c Price per doz..... **$5.15**

## FLOOR HOOKS

Wrought Iron with lag screw end. To be used for anchoring pulleys in Hay Carrier Outfits. Can also be used for suspending weights from ceilings. 7½ in. long, ¾ in. diameter, wt. per dozen 13 lbs.

No. E 423. Floor Hooks, 7½ inches, price each. 12c Price per dozen..... **$1.35**

## RAFTER BRACKETS

For wood or steel track hanging brackets. Are made of steel and so crimped that the track eye hangs on a round surface. Provided with spur points to be driven into rafters, 6¼ inches from point to point. Weight per dozen 3 lbs.

No. E 424. Rafter Brackets, price each..... 6c Price per dozen..... **60c**

## SNATCH BLOCK PULLEY

This device shortens the travel of the horse. Tie a knot in the rope and put the washer in front of it—see cut above. The rope can then be thrown off the snatch pulley, thus allowing the fork to be returned to the load without waiting for the return of the horse.

Malleable Iron Frame. Diameter to sheave, 4 in. Made for 1 in. rope or smaller. Wt. each, 5½ lbs.

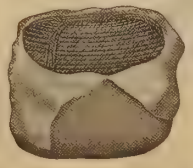
No. E 429. Snatch Pulley Block, price each..... **75c**

### Combined Pulley Fasteners and Carrier Blocks

These Combined Pulley Fasteners and Carrier Blocks are intended for our double angle steel track. Made of malleable iron with bolts. Weight per dozen, 7 lbs.

No. E 421. Combined Pulley Fasteners and Carrier Blocks, price each..... 15c Price per dozen.... **$1.65**

## BEST, QUALITY MANILLA ROPE



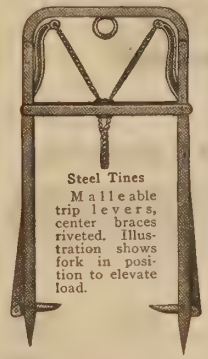
No. E 432

Pure Manila Rope, made of selected long, pure fibre. The best working size is ¼ inch and ¾ inch.

No. E 432. ¼ Inch Rope, per foot..... **1c**

¾ Inch Rope, per foot, **6c**

## DOUBLE HARPOON HAY FORK



Steel Tines

Malleable trip levers, center braces riveted. Illustration shows fork in position to elevate load.

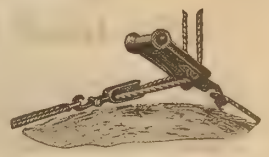
Double Harpoon spear point steel, malleable iron trip levers; two center braces riveted to frame.

No. E 425. Double Harpoon Fork. Length Tines 25 in., Length over all 35 in., width 18 in., wt. ea. 18 lbs. Price each..... **1.35**

No. E 426. Length Tines 31 in., length over all 41 in., width 18 in., weight each 21 lbs. Price each..... **1.65**

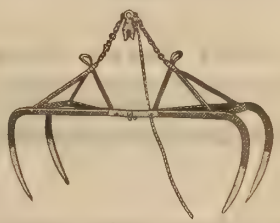
## SLING PULLEY

This Sling Pulley can be used for any make of Hay Carrier. It cannot be misplaced on the load as it can be used with either side up and with any shape or style of fork pulley.



No. E 430. Universal Sling Pulley. Malleable Iron, takes ¾ in. rope. Weight 19 lbs. Price each.... **$2.50**

## GRAPPLING HOOK



Spring Steel Tines and Frame, malleable iron lever, trip lock and harpoon, black Japanned, trimmed in gold with polished points.

No. EH-440. Grapple Hook; 4 Tine, length closed 28 in., width, 28 in., thickness, 17 in., greatest spread, 64 in. Price each **$6.50**

No. EH-441. Grapple Hook, 6 Tine, length closed 38 inches, width 30 inches, thickness 17 inches, spread 40 in. Price each..... **$7.50**

## STANDARD HAY SLING

Will handle fine or coarse Hay, Straw, Corn Stalks, Baled Hay, etc. By using these Slings, a load of hay can be unloaded and deposited in the barn in one-quarter the time. Normal length, 17 ft. Adjustable from 15½ ft. to 19½ ft. Can be used with any Hay Carrier.

No. E 427. Standard Hay Sling, 4 ft. wide, weight 20 lbs. Price each..... **$2.60**

## CALIFORNIA HAY SLING

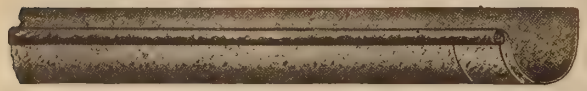
Normal length, 17 ft. Adjustable from 15½ ft. to 19½ ft. Has 1¼ inch Square Oak Spreaders, loose ropes with adjustable take-ups at each end. Can be used with any Hay Carrier.

No. E 428. California Hay Sling. Made extra strong for heavy work. 6 ft. wide, weighs 25 lbs. Price each..... **$4.25**

# Tinners Supplies, Eaves Troughs, Conductor Pipe and Fittings

## Slip Joint Eaves Trough

(No Soldering Required)



One end is fitted with a folded seam, into which the plain end of the other length can easily be slipped and it locks itself so securely as to make it water tight, thus doing away with the expense and inconvenience of soldering.

Slip Joint Eaves Troughs are made in 10 foot lengths without a seam. They come in either right or left hand. Right hand means the water is to be discharged at the right hand end of the trough, and left hand, at the left hand end of the trough.

No. E **155.** Galvanized Slip Joint Eaves Trough, right hand.
No. E **156.** Galvanized Slip Joint Eaves Trough, left hand.

| Size, Inches | 4 inches | 5 inches |
|---|---|---|
| Price per 10 foot length | **60c** | **69c** |

(State whether you want Right or Left Hand)

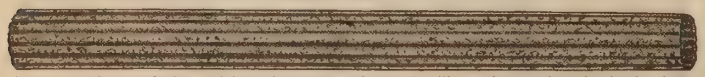
## Lap Joint Eaves Trough

Lap Joint Eaves Troughs are made of standard gauge material, well galvanized and come only in 10 foot lengths without a cross seam.

No. E **157.** Galvanized Lap Joint Eaves Trough.

| Size, Inches | 4 inches | 5 inches |
|---|---|---|
| Price per 10 foot length | **57c** | **66c** |

## Galvanized Corrugated Round Conductor



Galvanized Corrugated Conductor is made without cross seam and being corrugated is stiffer and better than the plain round pipe and is easily put together and will not burst when filled with ice, the corrugation allowing the metal to expand and making it safe from frost and ice. Made and sold only in 10 ft. lengths and made to fit the following combinations.

No. E **158.** Galvanized Corrugated Round Conductor.

| Size, Inches | 2 inches | 3 inches | 4 inches |
|---|---|---|---|
| Price per 10 foot length | **56c** | **65c** | **86c** |

## O. G Galvanized Box Gutter

Made of standard gauge metal. Galvanized. Comes only in 10-foot lengths. Without cross seam. Width, 4 inches; depth, 4 inches; girth, 12 inches.

No. EH **443.** Price per lineal foot..... **12c**

### OUTLETS

No. EH **445.** Three-inch Outlets, galvanized, for use with O. G. Box Gutter No. EH 443 and Plain Roof Gutter No. E 412. Price, each..... **12c**

### STRAP HANGER FOR BOX GUTTER

These hangers are for the box gutter. Cut shown above.

No. EH **444.** Strap Hangers, each..... **5c**

Above price complete with necessary bolt.

### ENDS AND MITRES FOR BOX GUTTER

EH-**446** Right Hand Ends, for 4 in. Box Gutter, each..... **30c**
EH-**447** Left Hand Ends, for 4 in. Box Gutter, each..... **30c**
EH-**448** Outside Lap Joint Mitres, for 4 in. Box Gutter, each..... **80c**
EH-**449** Inside Lap Joint Mitres, for 4 in. Box Gutter, each..... **80c**

### CONDUCTOR FUNNEL

No. E **295** Conductor Funnel, for running two conductors into one. Size indicates size of lower spout. Made of galvanized steel.

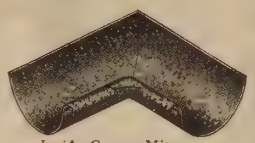
| Size. | Price each |
|---|---|
| 2 in. | **30c** |
| 3 in. | **35c** |
| 4 in. | **45c** |

### FLUE THIMBLE

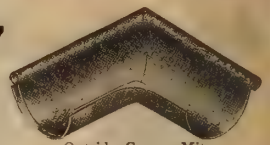
No. E H **3182.** Galvanized steel, weight about 6 ozs.

| Diameter | 6 in. | 7 in. |
|---|---|---|
| Price each | **12c** | **15c** |
| " per doz. | **1.25** | **1.50** |

## Corners or Miters, Galvanized



Inside Corner Miter



Outside Corner Miter

These miters are made complete, ready for use, for both inside and outside bead, either slip or lap joint.

If slip joints are ordered, be sure to state if wanted right or left hand.

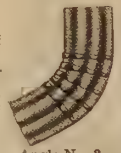
No. E **159.** Inside Corner, Slip Joint, Right Hand.
No. E **160.** Inside Corner, Slip Joint, Left Hand.
No. E **161.** Inside Corner, Lap Joint.
No. E **162.** Outside Corner, Slip Joint, Right Hand.
No. E **163.** Outside Corner, Slip Joint, Left Hand.
No. E **164.** Outside Corner, Lap Joint.

| Size of Eaves Trough, Inches | 4 inches | 5 inches |
|---|---|---|
| Price of each, Slip Joint | **30c** | **35c** |
| Price of each, Lap Joint | **30c** | **35c** |

## Elbows and Shoes

Galvanized, corrugated, one-piece elbows are made of standard gauge steel, and well galvanized. Corrugated Elbows are made in two different angles, as shown herewith. Be sure to specify angle wanted and catalog number of same. Round Corrugated Conductor Shoe made same as Elbows, with the exception of having a heavy metal band around one end which adds strength.

No. E **172.** Corrugated Elbow, Angle No. 2.
No. E **173.** Corrugated Elbow, Angle No. 3.
No. E **174.** Corrugated Conductor Shoe.



Angle No. 2

Angle No. 3

Shoe

| Size, Inches | 2 inches | 3 inches | 4 inches |
|---|---|---|---|
| Conductor Elbows | **15c** | **18c** | **28c** |
| Conductor Shoes | **17c** | **22c** | **35c** |

Rain Water Cut-off

### RAIN WATER CUT-OFF

No. E **165.** This Rain Water Cutoff is galvanized, durable and simple and very cheap. It is the strongest and best Rain Water Cutoff that has ever been put on the market and is thoroughly galvanized.

Size, Inches, 2 inches Price of each..... **40c**
Size, Inches, 3 inches Price of each..... **45c**
Size, Inches, 4 inches Price of each..... **55c**

Galvanized Wire Conductor Strainers

### GALVANIZED WIRE CONDUCTOR STRAINERS

No. E **170.** Galvanized Wire Conductor Strainers placed in the outlets of the eaves trough prevents leaves and so forth from entering or stopping up conductors.

Size, Inches, 2 inches Price of each..... **15c**
Size, Inches, 3 inches Price of each..... **20c**
Size, Inches, 4 inches Price of each..... **25c**

## Plain Roof Gutter

Made of 28 guage galvanized sheet. This roof gutter comes in lengths of 10 ft., ⅝ in. bead. End pieces and drops must be made by the workman who puts up the gutter and the joints must be soldered. The cut on the right shows how the hangers are to be applied.

By using this gutter and hanger, there are no exposed nails or screw heads, therefore there can be no leaks as in the old style way with wood front and wood brackets.

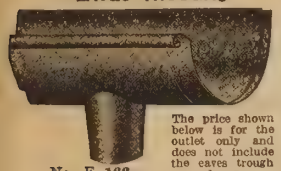
No. E **412.** Plain Roof Gutter.

E **412.** Plain Roof Gutter, 10 ft. lengths. Price, each..... **$1.05**
E **413.** Hangers for above gutter, each..... **6c**
Per dozen..... **55c**

This illustration shows how hangers are to be applied

# TINNERS' SUPPLIES

## ADJUSTABLE OUTLET FOR EAVES TROUGHS



No. E 166

The price shown below is for the outlet only and does not include the eaves trough or end cap.

No. E 166. This picture shows the outlet in position. End of trough closes with Slip Joint End Cap. You can put this on yourself, no soldering needed. For price of End Cap see below.

| To fit Eaves Troughs, inches | 4 in. | 5 in. | 6 in. |
|---|---|---|---|
| Fitted for Conductor, inches | 2 in. | 3 in. | 4 in. |
| Price each | 10c | 12c | 15c |

No. EH 445. Outlets to fit O. G. Box Gutter No. EH 443 and Plain Roof Gutter No. E 412. Galvanized, size 3 inches.

Price, each ..... 9c

## END CAPS FOR EAVES TROUGHS

No. E 167. End Cap Slip Joint for either Eaves Troughs or Adjustable Outlets.

| To fit Eaves Troughs, inches | 4 in. | 5 in. |
|---|---|---|
| Price each | 10c | 11c |

## WIRE EAVES TROUGH HANGERS

No. E. 168

These Hangers are made of the best galvanized steel wire together with triple cross bars. Can be easily and quickly adjusted to the trough, and is the only hanger making a complete brace, as well as hanger, and holds trough in shape as well as in place.

No. E 168. Wire Eaves Trough Hanger.

| Size, inches | 4 in. | 5 in. |
|---|---|---|
| Price per doz. | 22c | 25c |

## STEEL HOOKS FOR CONDUCTOR PIPE

## ROOFING TIN

### FOR FLAT ROOFS AND VALLEYS

**Ross Old Style 20-lb. Coating Tin Painted Two Sides**

No. EH 305. Is made with Open Hearth Base, coating consists of 70 per cent double Refined Lead and 30 per cent Best New Straight Tin. Strictly hand made, coated with Best Lagos Palm Oil. Seams well soaked with solder and special highest grade paint, both sides. Our Roofing Tin is put up in continuous rolls, locked and soldered together. In using on flat roofs, edges should be turned up, double seamed and soldered.

| Width | 14 in. | 20 in. |
|---|---|---|
| Price per lineal ft. | 10c | 11c |
| Price per Roll of 50 lineal ft. | $4.00 | $4.75 |

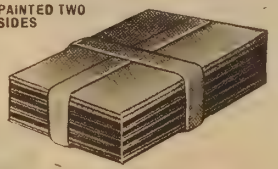
**Standard Tin Painted Two Sides**

No. E 175. Made of good grade tin plate in continuous strip, with special lock joint. Our Valley Tin comes painted on two sides, while most Valley Tin is painted only on one side.

| Width | 14 in. | 20 in. |
|---|---|---|
| Price per lineal ft. | 7c | 9c |
| Per Roll of 50 ft. length | 2.90 | 3.75 |

## TIN SHINGLES OR FLASHINGS

PAINTED TWO SIDES



No. E 171. Made of good grade roofing tin and cut to exact sizes. Useful for repairing old roofs, and making a tight joint around chimneys. Painted on two sides. Most tin shingles are painted only one side.

| Size, inches | 5x7 | 4x9 |
|---|---|---|
| Price each | 2c | 2½c |
| Per 100 | $1.50 | $1.60 |

## ROUND RIDGE ROLL

No. E 706. Round Ridge Roll

No. E 706. Galvanized Round Ridge Roll, 1½ inch diameter of roll, girth 8 inches. Comes in 10 foot lengths only ..... 55c

## RIDGE ROLL FINIAL

Galvanized Iron Finial to be used with our Ridge Roll shown on this page. This finial is to be used at the ends of the ridge.

You will see from the illustration that this is just the article you need to put a finish on your roof.

No. E 414

No. E 414. Galvanized Ridge Roll Finial.

Price each ..... 40c

## HIP SHINGLES

Ornamental Galvanized Hip Shingles are designed for the covering of hips of roofs, either straight or curved. They can be adjusted to the different widths shown to the weather.

These shingles are intended to take the place of plain tin strips, wood or metal rolls.

There is no need to make close joints in the shingles at the hips, as the offset or border at the side forms a gauge or guide by which to keep them straight.

They may be used with shingles, slate, felt or any of the flat styles of metal roofings.

No. E. 415 Ornamental Galvanized Hip Shingles, size 4x9, price, per crate of 100 ... $2.75

Price each ..... 3c

## CONTINUOUS HIP SHINGLES

Has appearance of ornamental Hip Shingles, but is furnished in 10 foot sections. Saves much time in putting on and is very practical. Diameter 3⅞ inches.

No. EH 450. Continuous Hip Shingle, price per foot 3c

Shipped from Davenport, Chicago or mill in Ohio.

# WIRE NAILS at Manufacturer's Prices

Prices quoted herewith are for full kegs of 100 lbs. of any one size nail. You will find it to your advantage to buy 100 pounds whenever possible, as there are considerable reductions from prices in less than full kegs.

If you cannot use a full keg, we quote prices on nails of all sizes in less than full kegs at 5c per pound.

Owing to the constant fluctuations of the prices in the nail market, we have to reserve the right to subject the following prices to market changes and conditions.

While we do not look for any advance on them during the life of this catalog, yet it is necessary to protect ourselves against a future rise in the market. Send us your order on these prices and if nails have gone down we will give you the advantage of the lower prices.

### PRICES QUOTED ARE FOR FULL KEGS OF 100 POUNDS OF ANY SIZE NAILS

# Guaranteed Furnaces and Complete Outfits $77.50 and up

## Easiest and Cheapest to Install—Burns any Fuel—Heavy Castings—Large Air Space—No Waste Heat—All Pipes and Fittings Ready for Use.

**Our special Furnace blank which we have prepared will enable anyone to measure a house correctly and in a very short time. Fill in blank below.**

**We have also made provision in this Furnace for our quick heating hot water coil, which may be had if desired for $2.00 extra**

All fittings are made of heavy I C Tin, the best grade manufactured. All elbows are reversible and adjustable to any angle. Elbows and boxes are all furnished in correct sizes to suit the pipes and register so that these parts are ready to install without cutting.

**TO MAKE IT DOUBLY EASY** for you we cut the holes for hot air pipes in the furnace hood, and also cut the hole in the casing to receive the large cold air pipe. It is practically impossible for a novice to cut these round holes in the curved galvanized casings, so we cut them for you. This greatly simplifies the work of installation. **Anyone who is handy** with tools can put up one of our outfits.

**Sectional Fire Pot**—Made of two heavy sections of corrugated castings and will never crack from contraction and expansion as will a one-piece fire pot. Notice the top of fire pot is dome shape where radiator connects, thus centralizing the heat and causing the greatest possible radiation.

**All Cast Radiator**—Note in cut the circular radiator marked all-cast. This takes the heat from center of fire pot entirely around the furnace before it reaches the smoke flue—thus you get heat from your fuel in the rooms of your house, in place of its escaping through the chimney.

Write us today and see how well we are equipped to serve you. We are reliable as you can ascertain for yourself by looking us up in any banking house in the world. WE ABSOLUTELY GUARANTEE OUR FURNACES as represented so you stand no chance to lose. Our experience and advice are at your disposal—call on us today.

Milaca, Minn.
April 30, 1916.

Gordon Van Tine Co.,
Davenport, Iowa.

Gentlemen:

Your favor of April 28th received and noted. I have used the Fire King furnace in house built from Plan No. 196 and will say it has given very good satisfaction, as has everything else I have gotten from Gordon Van Tine Co.

I have ordered a Gordon Van Tine furnace for Plan No. 164 and shall have one for each Plan No. 301 and No. 323, as soon as the buildings are finished.

Yours truly,

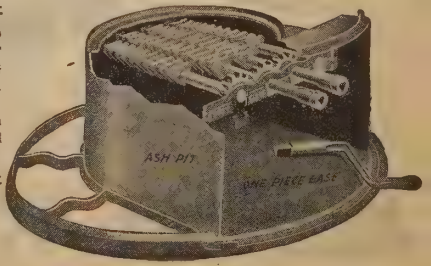
CARL EBERHARDT.

The shape of the valve in the Gordon Van Tine Register increases the velocity of the air and consequently the size of the pipe. It also sends the air into the room at an angle which prevents the over-heating of the wall and possible damage to the paper directly above the register. We guarantee that a furnace will deliver more air into a room with one of these registers than with any other style.

**The success of any furnace depends upon the construction of the grates. The cut below shows our triangular grate bar, which in revolving clears the fire and grinds up the clinkers. This is the finest type of grate known to the furnace world.**

IF INTERESTED IN STEAM OR HOT WATER HEATING PLANTS, WRITE US. Cut out coupon at left and state on coupon that you are interested in steam or hot water.

**ALL FURNACES SHIPPED DIRECT FROM FACTORY IN MICHIGAN**



Triangular Grate Bar used on all Furnaces

# Guaranteed Pipeless Furnace, Complete $72.80 AND UP

## Absolutely the Most Efficient—Most Durable—Most Economical Furnace on the Market Today—As Easy to Set Up as a Stove—Heats the Entire House.

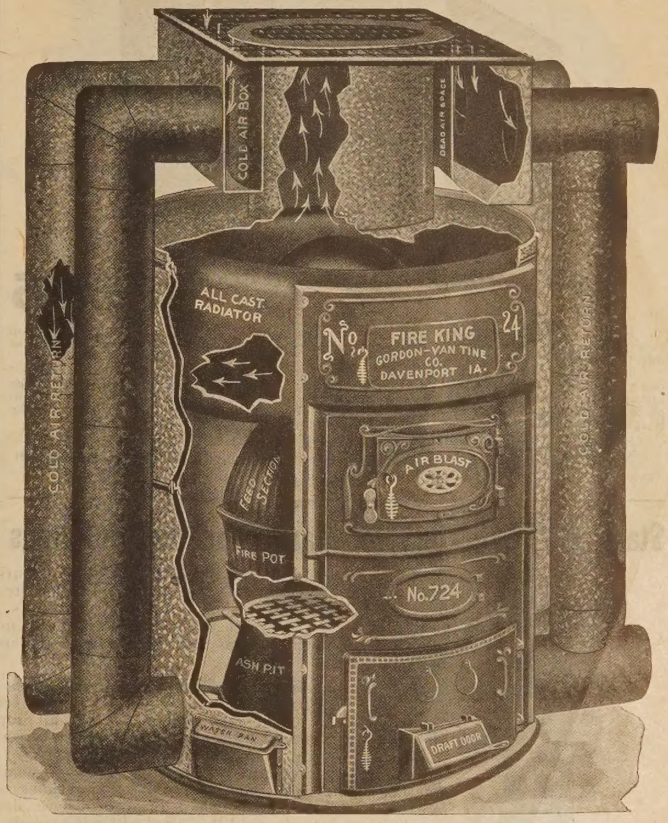
Every conceivable detail has been perfected on this furnace. The drafts and dampers on the Fire King Pipeless Furnace are easily controlled from the living room by means of chain regulators connected with both the draft in front and check draft in the rear. These chains may be continued to the second floor if so desired and draft controlled from sleeping rooms. You will have no complaint because of the dryness of the air. We have overcome this fault by means of vapor pans to supply moisture to all air passing through the furnace. We equip every furnace with a dust flue, which connects the ash pit with the dome, thus taking away all dust from the ash pit, caused by shaking the grate.

This furnace comes in sections all fitted with bolts, etc. There is absolutely no difficulty in putting the parts together. Any handy man can do this job. The only tools needed are the hammer, small monkey wrench, and screw driver. With a stove you are roasting hot near the stove and cold a few feet away. With the Fire King Pipeless Furnace you have an even heat all over the house. No more cold floors with the Fire King Furnace—all floors are kept evenly warm.

Without a doubt the warm air heating systems are the healthiest on the market. No one can deny that fact, as they keep a continual air circulation, and we emphatically state that when draft, area, heating capacity, maximum amount of heat and minimum fuel qualifications are studied and perfected the warm air plant that combines these with durabillty has nothing to excel, or even equal, it in the heating world. This is the reason that Gordon Van Tine Fire King Furnaces are giving satisfaction in thousands of homes. Our furnace is heavier than any other furnace of corresponding size on the market. That means that our castings are thicker and will not so readily burn out. In other words, it adds years to the life of the furnace.

**SET THE FURNACE UP**—Build a fire and quit worrying about the heating problem, it has solved itself. We GUARANTEE this furnace to give perfect satisfaction. There will be less than 3 degrees difference in temperature between most distant rooms and the one where register is placed, if connecting doors are left open to allow free circulation. THIS IS a POSITIVE GUARANTEE.

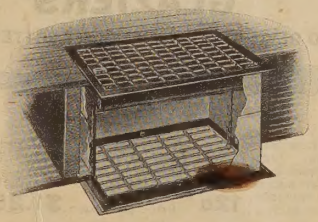
**AVOID SPOILING YOUR BASEMENT**—No pipes or cold air returns take up your cellar space. Note arrangement of register, the hot air forced out through center. A dead air space, then the cold air intake, which pulls the cold air down, and two large pipes on either side carry it to base of casing where it again is heated. This keeps a constant circulation—the hot air is forced up, the cold air being heavier rushes to the floor where it is pulled down to furnace by the cold air intake pipes to be reheated.



### Ventilation Ceiling Register

If you have upstairs rooms to heat—place a ventilation register in the ceiling. We advise that these be used with our Pipeless Furnace in all two-story houses. This register has a white enameled ceiling face, and black Japanned floor face, is adjustable, set with a spring, will fit any size joist. Size, 10 in. by 12 in. Price,..... **$4.00** each

(Complete with upper and lower faces and adjustable box.)



**ALL CASTINGS EXTRA HEAVY**

Stillingson, Sweden, May 24th, 1915.

Gentlemen: I wish to acknowledge the reception of the furnace you sent me per S. S. Soliand which arrived at Gothenburg May 3rd, after being held up for two weeks in England. Apparently the furnace is in good condition as it was packed with great care, which I noticed when the custom house officers opened the different cases. It has not been installed as yet beause the house will not be ready before Aug. 15th.

I want to thank you for the business-like manner in which you handled the transaction. As you know, I am building my house after your plans, No. 126, with some minor changes, and when completed I will send you a photo of same.

Respectfully,

F. O. Ardahl, Stillingson, Sweden.

Norman, Oklahoma, February 3, 1913.

Gordon Van Tine Co., Davenport, Iowa.

Dear Sirs: We are well pleased with the furnace. The man whose house I installed it in, says this is the fourth house he has had built and had a furnace installed in each one of them. He says they are all different makes, but the Gordon-Van Tine furnace beats them all and burns almost one-half the fuel the others did.

Yours truly,

R. L. PIERSON.

**WRITE US FOR PARTICULARS AND FURNACE CIRCULARS. LET US SOLVE YOUR HEATING PROBLEM.**

| Catalog No. | Diameter Casing, inches | Diameter Fire Pot, Inches | Heating Capacity, Cubic Feet | Weight, Pounds | Price Complete |

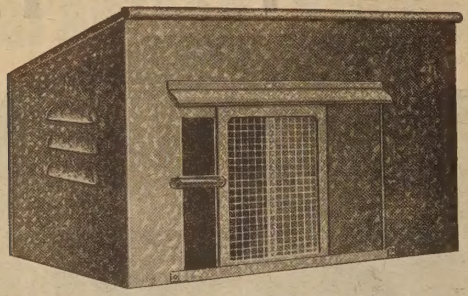
# SANITARY BROOD COOP



GALVANIZED IRON BROOD COOP **$1.25**

No. EH-433. Each, (in lots of 6)..... **$1.25**

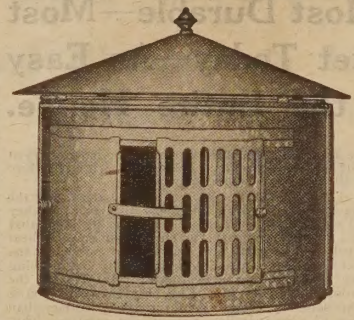
Sanitary Brood Coop is without question the very best and most practical Brood Coop ever put on the market. It is made of heavy galvanized iron and will not harbor lice and infectious diseases like the wooden coops.

They are rat, mink and weasel proof. The coop is made with two doors, one solid and one screen door. The sides of the coop are made to give plenty of ventilation and still be rain proof. Are shipped in a knocked-down form and are easily put together and held in place by small bolts which are furnished. When the brooding season is over you can take it apart and store it away in a very small space. Our Brood Coop has a bottom.

Size of coop, 23x18 inches, 16 inches high in front, 12 inches in back.

No. EH-433. Sanitary Brood Coop. Price each in crates of 6, **$1.25** or **$7.50** per crate. In crates of 3, **$1.30** each or **$3.90** per crate. In lots of 1, **$1.40** each.

# New Ventilated Cone Top Collapsible Coop



**Cool in Warm Weather Warm in Cool Weather**

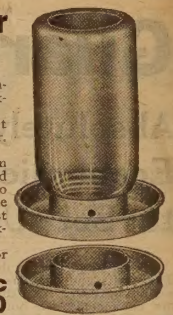
This new sanitary cone top complete coop is easier to clean, no dirt catching angles. It is stronger, simpler and more easily adjusted. Chicks cannot crowd into the corners.

This coop is warm proof and closes up tight for winter, but for hot weather the top lifts one inch all around and the top is turned into a ventilator where the air can ventilate in, through and upward. It is put together in a moment. The size of the coop is 21 in. diameter, 14 in. high, 20 in. top of cone. Has a galvanized bottom.

**BROODER COOP EH 434. (Round)**

In lots of 6.....each, **$1.40**
In lots of 3..... " **1.45**
In lots of 1..... " **1.50**

# Drinking Fountains for Chickens



This fountain is inexpensive and is indispensible to any one who raises chickens.

First, the illustration at the right shows the fountain with any fruit jar. We do not furnish the fruit jars.

The second illustration at the bottom shows the fountain just as it is furnished to you and all you have to do is to put any size fruit jar that you may have right on top of it. It makes the best kind of fountain, but at very little expense.

Include fountains in your order for coops.

No. EH 435. Fountain Each.... **10c**
Per dozen..... **$1.00**

It is very essential for the health of fowls to have a constant flow of fresh clean water. This, the W-K Fountain will supply automatically.

It has more drinking space than any other fountain of the same capacity.

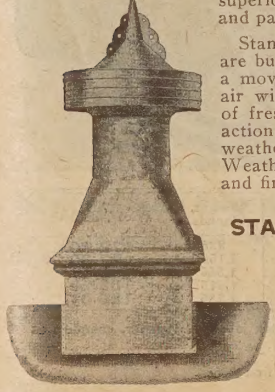
Large chickens can not step into it and carry filth into the water, and little chicks can not drown in it.

It is made of galvanized iron and will last for years. It is filled the same as a pail by taking the bottom pan off and turning the bucket over, and after it is filled replace the pan and fasten with the latch. Reverse the fountain and it is ready for use. Being round, it is easily cleaned, having no corners to catch the dirt.

This Fountain being made flaring, allows the pan and bucket to nest the same as an ordinary water pail taking up less room and lower freight rate.

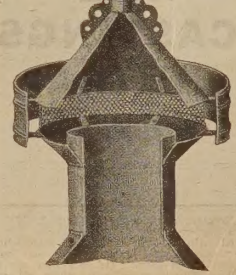
This Fountain holds about two gallons.
No. EH 3176. Fountain. Price each..... **45c**

# Standard Ventilators for Barns and Out Buildings



These handsome highly ornamental Cupolas ventilate the building on which they are placed. Constructed of heavy galvanized steel sheets, all nuts and bolts galvanized. They are practically indestructible and much superior to wooden cupolas that require frequent repairs and painting.

Standard Cupolas are screened to keep out birds and are built on approved scientific principles. They create a movement of air upward that draws out all impure air without creating draughts. They insure a supply of fresh, pure air in the building at all times. Their action is not interrupted by the vagaries of wind or weather. They will earn their cost many times over. Weather vanes are furnished of appropriate design and finished in pure gold leaf that will not tarnish.



**STANDARD CUPOLAS ARE FURNISHED IN THE FOLLOWING SIZES**

| | Base | Height | Price |
|---|---|---|---|
| No. A. | 24x24 in. | 16 in. ventilating flue. 6 feet | **$8.50** |
| No. B. | 27x27 in. | 18 in. ventilating flue. 7 feet | **11.00** |
| No. D. | 36x36 in. | 20 in. ventilating flue. 9 feet | **20.50** |
| No. E. | 46x46 in. | 24 in. ventilating flue. 11 feet | **23.00** |

Larger sizes priced on application. In ordering sizes A, B and C be sure and mention pitch of roof.

# GLAZIERS' SUPPLIES

**RED DEVIL STEEL WHEEL GLASS CUTTER**

No. EH 356

These wheels are specially selected for glaziers' work. Steel handle, polished and bronzed. If shipped by mail postage will be 3 cents extra.

We accept [illegible] for glass cutters by mail in any quantity.
Price each... **12c** Price per dozen **$1.25**

**SURE CUT GLAZIERS' DIAMOND**

No. EH 355

Any one can cut with this style, no matter how inexperienced in glass cutting, as it merely requires to be set on the glass and drawn over it to make a perfect cut.
Price each..... **$4.50**

## EXPLANATION OF TRADE TERMS, SIZES AND USAGES

In connection with the Lumber trade as well as every other business, there are certain well defined trade terms which every Lumber Dealer, Contractor or Carpenter understands.

In our Catalog and correspondence it is our aim to keep away from the use of trade terms and to make every description as plain, frank and complete as possible. It might, however, be well to explain a few of the trade terms used in this Catalog.

### DOORS

The width of a door is always given first and then the height, as for example, 2-8x6-8. This means that the width of the door is 2 feet and 8 inches and the height 6 feet and 8 inches. Doors are carried in various thickness, ¾, 1⅛, 1⅜ and 1¾ inches.

Take for example a door 1⅜ inches thick. This door is manufactured from lumber 1½ inches thick, and after the stock has been run through the machines, the thickness is as near 1⅜ in. as possible. Depending upon the kind of wood, the door may run a fraction under or over the thickness given, namely, 1⅜ in. The same difference applies to all the thicknesses of doors.

### WINDOWS

The width of a window is always given first, and then the height. If you order a window 24x30 2 lights, it means a window with two sash, each sash glazed with a light of glass 24 in. wide and 30 in. in height. If a window is ordered with opening size say 2-4⅛x5-2-2 lt. 1⅜ in. check rail, it means the entire opening in the Frame for the whole window, which consists of two pieces, one upper and one lower sash. That is, the width of the window including wood is 2-4⅛ and the height 5-2. The 1⅜ in. is the thickness of the sash (see explanation below) and check rail means the bevel meeting rails that fill the space taken up by the parting stop.

The thickness 1⅜ in. applies just as the thickness of a door, that is 1⅜ in. windows are run from lumber 1½ in. thick and may run a fraction under or over, but it is the desire of every good manufacturer to make his windows or doors as thick as the lumber will permit. Same applies to windows of all thicknesses which we list. Also storm sash.

### MOULDINGS AND INSIDE FINISH

In running mouldings through the machines, a very small traction of an inch may be lost owing to the kind of wood, its softness or hardness and a certain moulding may show a slight difference in thickness or width. The same applies to floorings, ceilings, etc.

### FINISHING LUMBER, SIDING, ETC.

Let us quote you from the Standard Classification Grading and Dressing Rules as adopted by the Yellow Pine Mfrs. Assn.

### DRESSED YELLOW PINE LUMBER

Finishing shall be dressed to the following 1 in. surfaced one side or two sides to ⅛ in, 1¼ in. surfaced one side or two sides to 1⅛ in.

### WIDTHS

On stock width shipments of all finishing Lumber, no piece should be counted as standard width that is more than ¼ in. scant on 8 in. and under, ⅜ in. scant on 9 or 10 in. and ½ in. scant on 11 or 12 in. or wider. ⅝ in. ceiling shall be worked ⅜ in. We work Mouldings, Casings and Base to about ¾ in.

### BEVEL SIDING

(Rules—The Association Bureau of Grades)

"6 in. Siding should run ⅜ in. thin edge. ½ in. thick edge, 5½ in. wide. 4 in. siding, same thickness, 3½ in. wide. That is 6 in. siding means run from 6 in. wide lumber, and 4 in. siding from 4 in. wide lumber."

### GLASS

The terms S. S. and D. S. refer to single strength and double strength glass. Single strength glass runs from 12 to 15 lights to an inch. Double strength from 8 to 10 lights to an inch.

### SHINGLES AND LATH

All our Shingles are graded and sold under official grading Rules.

In making these explanations as to trade terms, sizes and usages, it is our desire to acquaint the customer with the facts. We have nothing to conceal. We are proud of our grades and claim, grade for grade, as good if not better quality than you can buy elsewhere. We take no advantage of any grading rules, and want you to understand that these explanations are not made to you as an excuse, but we think you are entitled to an explanation as to trade terms, sizes and usages.
